

Name

Roll No.:

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each

Read the given passage and answer the questions (1-3) that follow:

The Dead Sea, located between Israel and Jordan, has fascinated travellers for centuries. Known for its extremely high salt content, it allows people to float effortlessly on its surface. Yet beyond this unique experience, the Dead Sea is also regarded as a natural spa, celebrated for its therapeutic benefits. Historical accounts suggest that even Cleopatra valued its mineral-rich mud as part of her beauty routine, making it one of the oldest recorded skincare practices.

Today, the Dead Sea wellness industry is a booming sector. Globally, over 1,000 skincare products—from face masks to exfoliants—are derived from its minerals and mud. In Israel alone, this industry generates nearly \$300 million every year, providing employment to thousands and attracting health tourism from across the world. Experts estimate the global market could double to \$3.5 billion by 2035.

What makes the Dead Sea so special is its unusual mineral composition. With almost ten times the salinity of normal seawater, it is rich in magnesium, zinc, potassium, and other trace elements. Dermatologists claim that these compounds strengthen the skin's barrier, reduce inflammation, and help people suffering from conditions like psoriasis or eczema. Scientific studies also confirm that regular exposure to its minerals can hydrate the skin, calm flare-ups, and even slow down signs of aging.

The mineral-packed mud, when applied directly, acts as a gentle exfoliant. It removes dead skin cells, stimulates blood circulation, and provides antioxidant protection against pollution and sun damage. However, the same qualities that make it powerful also demand caution. Overexposure—beyond 15 to 20 minutes a day—may lead to irritation or dryness, especially in individuals with sensitive skin or allergies.

Doctors advise certain groups, such as those with open wounds or hypersensitive skin, to avoid such treatments altogether. Simple precautions—like applying body oil, using sunscreen, and keeping the eyes protected—can make the Dead Sea experience both safe and rejuvenating. Ultimately, the lesson is one of balance: nature's gifts can heal and restore, but only when used wisely. In a broader sense, the Dead Sea stands as a paradox—both a sanctuary of wellness and a stern reminder of nature's potency. Its mineral cocktail, often romanticised as liquid gold, symbolizes the delicate equilibrium between indulgence and restraint.

1. Which of the following BEST explains why the Dead Sea is described as both a **"sanctuary of wellness"** and a **"stern reminder of nature's potency"**?
 - A) Its minerals provide therapeutic benefits, yet excessive use can lead to irritation and harm.
 - B) It has been a symbol of luxury from Cleopatra's time but is also facing severe ecological decline.
 - C) It attracts global health tourism, though only certain groups can safely use its treatments.
 - D) It is commercially marketed as "liquid gold," though its true benefits remain scientifically uncertain.
2. In the sentence **"Its mineral cocktail, often romanticised as liquid gold, symbolizes the delicate equilibrium between indulgence and restraint,"** the word **"romanticised"** most nearly means:
 - A) Idealised or glorified beyond reality
 - B) Explained in purely scientific terms
 - C) Simplified to make it more understandable
 - D) Associated with love or affection
3. What is the author's primary purpose in this passage?
 - A) To promote the Dead Sea as a tourist destination through persuasive language
 - B) To highlight the historical, scientific, and commercial significance of the Dead Sea
 - C) To warn readers about the dangers of mineral overexposure and discourage treatments
 - D) To narrate Cleopatra's legendary beauty practices as evidence of ancient wisdom

Read the poem and answer the questions (4-6) that follow:

Spades take up leaves
No better than spoons,
And bags full of leaves
Are light as balloons.

I make a great noise
Of rustling all day
Like rabbit and deer
Running away.

But the mountains I raise
Elude my embrace,
Flowing over my arms
And into my face.

I may load and unload
Again and again
Till I fill the whole shed,
And what have I then?

Next to nothing for weight,
And since they grew duller
From contact with earth,
Next to nothing for color.

Next to nothing for use,
But a crop is a crop,
And who's to say where
The harvest shall stop?

4. Which interpretation BEST captures the central idea of the poem?
- A) The futility of gathering leaves reflects human labor that seems meaningless yet continues as part of life's cycle.
 - B) The poet criticizes autumn for stripping trees bare and leaving behind useless foliage.
 - C) The act of collecting leaves represents the heavy burden of wealth and material possessions.
 - D) The poem suggests that farming and harvest always lead to prosperity, regardless of effort.
5. Which TWO literary devices are MOST prominent in the lines:
"Spades take up leaves / No better than spoons, / And bags full of leaves / Are light as balloons"?
- A) Simile and Hyperbole
 - B) Alliteration and Onomatopoeia
 - C) Irony and Personification
 - D) Metaphor and Symbolism
6. What does the speaker MOST LIKELY imply in the lines:
"Next to nothing for use, / But a crop is a crop, / And who's to say where / The harvest shall stop?"
- A) Even seemingly worthless labor can hold meaning, since effort itself has value.
 - B) The endless cycle of work is absurd and should be resisted at all costs.
 - C) Agricultural harvest is unpredictable and depends on divine will.
 - D) Leaves symbolize wealth that eventually loses all its worth over time.
7. Although respected for his wisdom, the professor was known to be taciturn, rarely joining in casual conversation.
Which of the following does NOT capture the meaning of the underlined word?
- A) Reticent
 - B) Laconic
 - C) Diffident
 - D) Reserved
8. Which of the following words is the closest synonym of **prudent**?
- A) Cautious
 - B) Stingy
 - C) Shrewd
 - D) Practical
9. In discussions on global governance, the term pragmatic is often contrasted with idealistic. Which of the following BEST reflects the meaning of **pragmatic** in this context?
- A) A pragmatic leader focuses on visionary reforms without compromise, even if they remain unattainable.
 - B) A pragmatic leader balances lofty goals with practical steps that can actually be implemented.
 - C) A pragmatic leader avoids responsibility by delaying decisions until external pressures resolve the issue.
 - D) A pragmatic leader relies solely on traditional customs, resisting any form of adaptation to changing circumstances.

10. Which discourse marker can **BEST** replace by the same token in the sentence below without altering its meaning?
"Regular exercise improves mental health; by the same token, it also strengthens the immune system."
 A) Similarly B) Equally C) Correspondingly D) In like manner
11. In each of the following sentences, identify whether the underlined verbs are main verbs (M), auxiliaries (A), or modals (Mod):
 i) She might have completed the assignment before the teacher checked it.
 ii) The students are presenting their projects in the auditorium today.
 iii) He runs a small business alongside his studies.
 iv) The researchers will be analyzing the survey results over the next week.
 A. i) might – Mod; have – A; completed – M ii) are – A; presenting – M iii) runs – M iv) will be – A; analyzing – M
 B. i) might – A; have – M; completed – M ii) are – M; presenting – A iii) runs – A iv) will be – M; analyzing – A
 C. i) might – Mod; have – M; completed – A ii) are – A; presenting – M iii) runs – M iv) will be – A; analyzing – M
 D. i) might – Mod; have – A; completed – M ii) are – M; presenting – M iii) runs – M iv) will be – Mod; analyzing – M
12. Identify the number of sentences in the paragraph which do not follow the subject–verb agreement.
 As I look back on the vast stretch of years that lie behind me and see in clear perspective the history of my early development, I am struck by the change that have taken place both in my own attitude and in the psychology of my countrymen – a change that carry within it a cause of profound tragedy.
 Our direct contact with the larger world of men was linked up with the contemporary history of the English people, whom we come to know in those earlier days. It was mainly through their mighty literature that we formed our ideas with regard to these newcomers to our Indian shores.
 A) 1 B) 2 C) 3 D) 4
13. Choose the option in which the underlined clause is identified correctly:
 i) I don't know what he intends to do after graduation.
 ii) The book, which was left on the table, belongs to Riya.
 iii) We will cancel the trip if it continues to rain heavily.
 iv) She couldn't believe that he had completed the project so quickly.
 A) i) Noun clause, ii) Adjective clause, iii) Noun clause, iv) Adverb clause
 B) i) Noun clause, ii) Adjective clause, iii) Adverb clause, iv) Noun clause
 C) i) Adjective clause, ii) Adjective clause, iii) Adverb clause, iv) Noun clause
 D) i) Noun clause, ii) Adverb clause, iii) Adjective clause, iv) Noun clause
14. What does the idiom "**cash cow**" most likely mean in the sentence below?
"After years of steady sales, the old software became the company's cash cow."
 A) A risky product that might fail soon. B) A consistently profitable product.
 C) A product that is expensive to maintain. D) A new venture requiring heavy investment.
15. Which sentence uses the phrasal verb incorrectly?
 A) The company had to bail out the struggling branch to prevent losses.
 B) His anger began to boil up after hearing the unfair criticism.
 C) The unexpected gift completely bowled over her with delight.
 D) We will round on the bookshelves to organize the library.
16. In converting the following sentence into reported speech, which tense should replace the underlined tense?
 "By next week, I will have been working on this research project for six months," said Priya.
 A) Future perfect B) Future perfect continuous
 C) Past perfect continuous D) Present perfect continuous
17. Which literary device is most dominantly used in this line?
 "I have cried a thousand oceans for the dream that drowned in daylight."
 A) Hyperbole B) Enjambment C) Irony D) Consonance
18. Identify the sentence in which the contraction is incorrect or unnecessary.
 A) It's clear that the weather is changing quickly.
 B) We're hoping for better results this time.
 C) The dog wagged it's tail happily.
 D) She'll arrive before noon.

19. How many punctuation marks are required to make the following dialogue grammatically correct? (Count each individual punctuation mark separately, including commas, periods, quotation marks, question marks, etc.)
Mira asked do you think it will rain today Rahul replied I am not sure but we should carry an umbrella just in case Mira laughed and said you always say that
A) 11 B) 12 C) 13 D) 15
20. Choose the option in which passive to active voice transformation is correct:
The homework must have been completed by the students before the teacher arrived.
A) The students must have completed the homework before the teacher arrived.
B) The students must have been completing the homework before the teacher arrived.
C) The students must have completed by the homework before the teacher arrived.
D) The homework must have been completed by the students before the teacher arrived.
21. If the progression 3,10,17,..... and 63,65,67,..... are such that their n th terms are equal, then the value of n is ?
(a) 17 (b) 13 (c) 63 (d) 20
22. The largest number which divides 245 and 1029 leaving remainders 5 and 9 respectively is:
(a) 24 (b) 32 (c) 48 (d) 60
23. The pair of equations $2x+3y=8$ and $4x+6y=16$ has:
(a) One solution (b) Infinitely many solutions (c) No solution (d) Exactly two solutions
24. A quadratic equation has roots differing by 2, and the sum of the roots is 10. Find the equation.
(a) $x^2-10x+21=0$ (b) $x^2-10x+24=0$ (c) $x^2-10x+16=0$ (d) $x^2-10x+25=0$
25. The decimal expansion of $15/600$ will terminate after how many decimal places?
(a) 1 (b) 2 (c) 3 (d) 4
26. The ratio of the 10th term to the 30th term of an A.P. is 1:3. Find the ratio of the 1st term to the common difference.
(a) 1:1 (b) 1:2 (c) 2:1 (d) 3:1
27. The curved surface area of a cone is 308 cm^2 , and its slant height is 14 cm. Find the height of the cone.
(a) 7 cm (b) $7\sqrt{2}$ cm (c) $7\sqrt{3}$ cm (d) $7\sqrt{5}$ cm
28. If one zero of the quadratic polynomial $2x^2-3x+k$ is $3/2$, then the value of k is:
(a) 3 (b) 2 (c) 1 (d) 0
29. A card is drawn from a deck. The probability that it is neither a king nor a queen is:
(a) $12/52$ (b) $50/52$ (c) $44/52$ (d) $48/52$
30. The point of intersection of $x+y=6$ and $x-y=2$ is:
(a) (2, 4) (b) (4, 2) (c) (3, 3) (d) (1, 5)
31. If $\cot A = 5/12$, then $\operatorname{cosec} A = ?$
(a) $13/12$ (b) $13/5$ (c) $5/13$ (d) $12/13$
32. If a quadrilateral PQRS circumscribes a circle then.....
(a) $PQ + SP = RQ + SR$ (b) $SP + SR = PQ + RQ$ (c) $PQ + SR = SP + RQ$ (d) $PQ + SR + SP = RQ$
33. The three points (x_1, y_1) , (x_2, y_2) , and (x_3, y_3) are collinear if:
a) Area of triangle = 0 b) Area of triangle = 1
c) Distance = 1 d) $x_1 + y_1 = 0$
34. A kite is flying at a height of 50 m, the length of string is 100 m. Find the angle of elevation.
(a) 30° (b) 45° (c) 60° (d) 75°
35. The zeros of $x^2-7x+10$ are α and β . The value of $\alpha^2 + \beta^2$ is:
(a) 49 (b) 39 (c) 29 (d) 69
36. A number is chosen at random from 1 to 50. The probability that it is a multiple of 5 or 7 is:
(a) $19/50$ (b) $18/50$ (c) $17/50$ (d) $16/50$
37. A sphere and a cube have equal surface areas. The ratio of the volume of the sphere to that of cube is:
(a) $\sqrt{\pi} : \sqrt{6}$ (b) $\sqrt{6} : \sqrt{\pi}$ (c) $\sqrt{\pi} : \sqrt{3}$ (d) $\sqrt{3} : \sqrt{\pi}$
38. In $\triangle ABC$, $DE \parallel BC$, $AD = 3 \text{ cm}$, $DB = 2 \text{ cm}$, $AE = 4.5 \text{ cm}$. Find AC .
(a) 10 cm (b) 8.5 cm (c) 7.5 cm (d) 3 cm

39. The area of a sector of a circle of radius 10.5 cm is 77 cm². Find the angle of the sector.
 a) 60° b) 80° c) 90° d) 120°
40. The difference between the squares of two consecutive positive integers is 45. Find the numbers.
 a) 22 and 23 b) 20 and 21 c) 21 and 22 d) 23 and 24
41. What is the pH of a neutral solution at 25°C?
 a) 0 b) 7 c) 14 d) -1
42. Which salt is commonly used as an antacid?
 a) Sodium chloride b) Calcium carbonate c) Copper sulfate d) Aluminum chloride
43. When a substance that increases H⁺ ions reacts with one that increases OH⁻ ions, water and a crystalline solid are formed. What type of reaction is this?
 a) Neutralization b) Oxidation c) Reduction d) Hydrolysis
44. Which metal known for its ductility and ability to carry current efficiently is most commonly drawn in to wires for electrical transmission?
 a) Copper b) Zinc c) Iron d) Lead
45. Which metal known for its ductility and ability to carry current efficiently is most commonly drawn in to wires for electric transmission?
 a) Fluorine b) Oxygen c) Nitrogen d) Chlorine
46. Which property is characteristic of iron and not that of oxygen?
 a) Low melting point b) Brittleness c) Ductility d) Poor conductivity
47. What is the relationship between the magnetic field and the direction of current in a straight wire?
 a) Parallel b) Perpendicular c) Opposite d) Same direction
48. Which device converts electrical energy into mechanical energy?
 a) Generator b) Motor c) Transformer d) Electromagnet
49. What is formula for Pent-2-en-3-ol?
 a) C₅H₉O b) C₅H₁₀O c) C₄H₁₀O d) C₅H₈O
50. What type of wave is an electromagnetic wave ?
 a) Mechanical wave b) Transverse wave
 c) Longitudinal wave d) Stationary wave
51. Which type of bond is present in a carbon-carbon double bond?
 a) Two sigma bond b) Two Pi bond
 c) One sigma bond only d) One sigma bond and one Pi bond
52. What is the process of converting vegetable oils into solid fats?
 a) Hydrogenation b) Oxidation c) Fermentation d) Polymerization
53. Which system helps regulate body functions through chemical signals?
 a) Nervous system b) Endocrine system c) Circulatory system d) Respiratory system
54. What is the primary function of the pituitary gland in regulating bodily functions?
 a) To regulate growth and development b) To control body temperature
 c) To produce digestive enzymes d) To filter waste products
55. Biomagnification is the process where the concentration of persistent, toxic substances increases at successive trophic levels within a food chain. This phenomenon is a direct consequence of specific pollutant properties and ecosystem dynamics.
 Analyze the following statements regarding the characteristics of substances that undergo significant biomagnification (e.g., DDT, methylmercury, PCBs):
 Statement 1: For a pollutant to biomagnify significantly, it must be highly water-soluble to effectively enter the aquatic food web at the producer level.
 Statement 2: The primary reason a top predator accumulates a much higher concentration of a toxin than a primary consumer is that the top predator metabolizes the toxin at a much slower rate (low excretion rate).
 Statement 3: Substances prone to biomagnification are typically lipophilic (fat-soluble) and persistent, meaning they resist biological and environmental degradation.
 Statement 4: Biomagnification is exclusively an aquatic phenomenon because terrestrial organisms have more efficient detoxification pathways.

Which combination of statements is correct?

- A) Statements 1 and 2 only
- B) Statements 2 and 3 only
- C) Statements 1, 3, and 4 only
- D) Statements 2, 3, and 4 only

56. What is the primary function of iron in the human body?

- a) To produce energy
- b) To regulate body temperature
- c) To transport oxygen
- d) To support immune function

57. Which noble gas is used in MRI machines to create image of the body's internal structure?

- a) Helium
- b) Neon
- c) Argon
- d) Xenon

58. What is the primary function of calcium in the human body?

- a) To regulate heart function
- b) To support muscle contraction
- c) To maintain bone health
- d) To produce energy

59. What is the name of the hormone that stimulates the uterus to contract during childbirth and is also involved in milk letdown reflex during lactation?

- a) Oxytocin
- b) Vasopressin
- c) Adrenaline
- d) Prolactin

60. In a dihybrid cross between two pea plants, one with the genotype RrYy and the other with the genotype RrYy, what is the probability of getting offspring with the genotype RRYy?

- A) 1/16
- B) 1/4
- C) 1/8
- D) 1/2

61. Choose the incorrect statement about Romanticism and Nationalism in Europe:

- a) It was a cultural movement developing nationalist sentiment.
- b) Romantic artists did not criticize glorification of reason and science.
- c) It focused on emotions and mystical feelings.
- d) It aimed to create a shared collective heritage.

62. Ravi lives in a village where most people are engaged in agriculture. Recently, a factory opened nearby, offering jobs in packaging and transportation. Ravi, who earlier worked only on his family farm, now works part-time at the factory as well. What does Ravi's new situation indicate?

- a) Disguised unemployment
- b) Seasonal unemployment
- c) Shift from primary to secondary sector
- d) Reduction in underemployment

63. This female allegory shown in the image is a personification of :

- a) Germania – the symbol of German nation
- b) Marianne – the symbol of French nation
- c) Britannia – the symbol of Britain
- d) Liberty – the symbol of American Revolution

64. Which of the following is true about federalism?

- a) It centralizes power in one government.
- b) It abolishes state governments.
- c) It shares power between central and regional governments.
- d) It promotes dictatorship.

65. Assertion (A): Democracy allows people to participate in decision making.

Reason (R): In a democracy, power is concentrated in a single ruler.

- a) Both A and R are true, and R is the correct explanation of A.
- b) Both A and R are true, but R is not the correct explanation of A.
- c) A is true, but R is false.
- d) A is false, but R is true

66. Which power project in India is famous for both hydel power generation and irrigation?

- a) Bhakra Nangal
- b) Hirakud Project
- c) Tehri Dam
- d) Sardar Sarovar

67. Match the following correctly and choose the right option:

Column A

- A. MNCs.
- B. WTO.
- C. Globalisation.
- D. Liberalisation.

Column B

- 1. Selling goods and services beyond national borders
- 2. Setting up factories or offices in more than one country
- 3. An international organisation supporting free trade
- 4. Removal of trade barriers and restrictions

Options:

- a) A-2, B-3, C-1, D-4 b) A-3, B-2, C-4, D-1
- c) A-4, B-1, C-2, D-3 d) A-1, B-4, C-3, D-2

68. Identify the statement that correctly defines Globalisation:

- a) It means reducing exports to protect local industry.
- b) It is integration of the economy with the world economy.
- c) It refers to complete isolation from world markets.
- d) It means banning foreign goods.

69. A political party is planning to participate in elections and present policies for governance. What core function is it performing?

- a) Avoiding public participation
- b) Making policies and contesting elections
- c) Suppressing opposition parties
- d) Ruling indefinitely without elections

70. What does the term "Outcomes of Democracy" refer to?

- a) Failure of democratic governments b) Political instability
- c) Results of democratic governance in society d) Rise of dictatorship

71. Which of the following was not among the major European powers in the 19th century?

- a) Britain b) Russia c) Prussia d) Switzerland

72. Pick the odd one out from the following and state why:

- i) Gondwana coal ii) Petroleum iii) Anthracite iv) Lignite
- a) (i), Because it is not a fossil fuel
- b) (ii), Because it is not a type of coal
- c) (iii), Because it is found in sedimentary rocks
- d) (iv), Because it is a metallic mineral

73. Look at the cartoon below carefully and answer the question that follows:

What does the cartoon BEST represent about Centre-State relations in India?

- a) The states have complete independence in decision-making.
- b) The central government is dominant in distributing powers and resources to the states.
- c) States control the central government through federal laws.
- d) There is no need for power sharing between the centre and states.

74. A village in Rajasthan depends on underground water. Over the years, the water table has gone down drastically due to excessive tube well usage. The government plans to build a small earthen structure that stores rainwater and allows it to percolate into the ground. Which traditional water conservation structure is BEST suited for this situation?

- a) Dams b) Rooftop rainwater harvesting c) Khadin or Johad d) Multipurpose river valley project

75. Who am I ?

- I am grown mainly in Tamil Nadu, Kerala and Maharashtra.
- I require high temperature, heavy rainfall and red laterite soil.
- I am used to tyres, gloves, and several industrial goods.

- a) Jute b) Rubber c) Tea d) Coffee

76. Assertion (A): Industrialisation helps in reducing unemployment and poverty in a country.

Reason (R): Industries create job opportunities and support the growth of the tertiary sector.

Choose the correct option:

- a) Both A and R are true, and R is the correct explanation of A.
 b) Both A and R are true, but R is not the correct explanation of A.
 c) A is true, but R is false.
 d) A is false, but R is true.

77. Which port is the deepest landlocked and well-protected port of India?

- a) Mumbai Port b) Vishakhapatnam Port c) Kandla Port d) Chennai Port

78. Which of the following is the most common indicator of development used for comparing countries?

- a) Per capita income b) Total income c) Literacy rate d) Infant mortality rate

79. Which of the following activities belongs to the tertiary sector?

- a) Farming b) Mining c) Teaching d) Manufacturing

80. Which organisation was set up in 1995 to promote free trade among countries?

- a) UNO b) WTO c) WHO d) IMF

81. Fill up the next letter in the particular series: B,C,E,G,K,M, _ _ _ _ _ .

- (a) V (b) W (c) Q (d) R

82. A and B can do a work in 12 days. B and C together can do it in 15 days and C and A together in 20 days. If A, B, C work together, they will complete the work in :

- (a) 5 days (b) 10 days (c) 12 days (d) $47/3$ days

83. In a certain code '415' means 'milk is hot'; '18' means 'hot soup'; and '895' means 'soup is brown'. What number will indicate the word 'brown'?

- (a) 9 (b) 8 (c) 5 (d) 4

84. If CEJQ is coded as XVQJ, then BDIP will be coded as:

- (a) WURQ (b) YWRK (c) WUPI (d) YWPI

85. If 18th February, 1997 falls on Tuesday, then what will be the day on 18th February, 1999?

- (a) Monday (b) Tuesday (c) Thursday (d) Friday

86. Select a figure from amongst the Answer Figures which will continue the same series as established by the five Problem Figures.

Problem Figures:

Answer Figures:

- (A) (B) (C) (D) (E) (1) (2) (3) (4) (5)

- a) (1) b) (2) c) (3) d) (4)

87. In a row, Anuj is 15th from the left end while Tina is 56th from the right end and 16th to the right of Rohit. Find out the total number of persons in the row?

- a) 70 b) 86 c) 91 d) Can't be determined

88. PxQ means P is the sister of Q; P+Q means P is the father of Q; P-Q means P is the mother of Q. Which of the following means S is the aunt of T?

- a) $T \times M + S$ b) $S + T \times M$ c) $S \times M + T$ d) $S \times M + R - T$

89. Mr. Ali runs 20m towards East and turns to right, runs 10m and turns to right, runs 9m and again turns to right, runs 5m and then turns to left, runs 12m and finally turns to right and runs 6m. Now which direction is he facing?

- a) East b) West c) North d) South

90. LOGIC : BHFNK :: CLERK : ?
 a) XVRPA b) QBKJA c) LPRTU d) JQDKB
91. What is the primary goal of the solar-powered artificial leaf technology developed by Cambridge researchers?
 A) To generate electricity for powering homes B) To produce clean hydrogen fuel for transportation
 C) To convert CO2 into valuable chemicals and fuels D) To increase crop yields for bioenergy production
92. Which Indian newspaper is known for its pioneering role in investigative journalism and was founded by G.P. Pillai in 1878?
 A) The Hindu B) Times of India C) Indian Express D) The Statesman
93. Which slang term describes online content designed to elicit anger and drive internet traffic?
 A) Click-fare B) Rage bait C) Anger-click D) Outrage hook
94. What is the name of the cybersecurity app that cellphone makers and importers must pre-install on handsets for sale in India?
 A) Digi-Shield B) GovScan C) Cyber Suraksha D) Sanchar Saathi
95. What is India's projected population peak?
 A) 1.5 billion by 2050 B) 1.8-1.9 billion by 2080
 C) 2.5 billion by 2100 D) 3 billion by 2125
96. Who is the Minister of Agriculture and Farmers' Welfare in India?
 A) Shivraj Singh Chouhan B) Piyush Goyal C) Dharmendra Pradhan D) Jitan Ram Manjhi
97. How many languages are recognized by the Indian Constitution?
 A) 18 B) 22 C) 25 D) 30
98. Who won the men's singles title at the Australian Open 2025?
 A) Jannik Sinner B) Alexander Zverev C) Novak Djokovic D) Carlos Alcaraz
99. What is unique about a dolphin's navigation?
 A) It uses its sense of smell B) It uses echolocation
 C) It uses its sense of touch D) It uses visual cues
100. What is the name of the project launched by the Indian government to conserve forests?
