Roll No.:

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each

Read the case-based passage and answer the questions(Q1-3) that follow: (404 words)

In several Indian cities, an unusual idea has transformed how citizens think about both hunger and plastic waste. The “Garbage Café” model, first launched in Ambikapur, Chhattisgarh, allows people to pay for their meals with plastic waste instead of money. At these cafés, one kilogram of plastic earns a person a full meal—rice, two curries, dal, roti, salad, and pickles—while half a kilogram buys breakfast items such as samosas or vada pav. The initiative, supported by the Ambikapur Municipal Corporation, began in 2019 as a dual response to two urgent social problems: plastic pollution and urban poverty.

The scheme has brought immediate relief to low-income individuals, especially ragpickers and homeless people who depend on the collection of waste materials for survival. Instead of selling plastic for minimal profit to scrap dealers, they can now exchange it for nutritious food. Workers at the café describe how this simple exchange not only fills empty stomachs but also helps clean the city. By 2024, Ambikapur had reduced its landfill waste dramatically and gained recognition as one of India’s cleanest cities. Collected plastic is sorted, recycled, or even used to construct roads, while wet waste is composted, creating a model of circular sustainability.

However, despite its success, the initiative has limits. Environmental experts caution that such schemes address the symptoms of plastic pollution rather than its root causes—overproduction and poor segregation. Ragpickers, who perform the most hazardous part of the work, often lack protective equipment, leaving them exposed to toxic materials. Moreover, replicating the model in larger cities such as Delhi has proven difficult due to weaker public participation and inadequate recycling infrastructure. In some regions, similar programmes have been discontinued because of inconsistent funding or logistical challenges.

Still, supporters argue that the Garbage Café concept represents a meaningful start. It provides immediate social and environmental benefits while promoting civic awareness about sustainability. Beyond India, similar exchanges of plastic for food or rice have appeared in countries like Cambodia, suggesting that such local experiments may have global potential. As Ahmedabad University’s Minal Pathak observes, these cafés “teach people about the problem and show that local solutions can have an impact,” though broader systemic changes remain essential.

Ultimately, the Garbage Café initiative demonstrates that innovation and empathy can intersect effectively. While not a complete solution to plastic pollution, it offers a compelling example of how small, community-based efforts can inspire larger conversations about waste management, hunger, and social responsibility.

1. Which of the following statements is NOT supported by the passage?
 - a) The Garbage Café model has helped improve waste management practices in some Indian cities.
 - b) The initiative completely eliminates the problem of plastic waste at its source.
 - c) The cafés provide immediate relief to low-income individuals while encouraging civic responsibility.
 - d) The concept has inspired similar practices in countries outside India.
2. The word “**hazardous**” in the sentence “Ragpickers, who perform the most hazardous part of the work...” can be best replaced by –
 - a) onerous
 - b) perilous
 - c) arduous
 - d) grievous
3. Read the statements given below and choose the option that best captures the inference drawn from them.

Statement 1: The success of the Garbage Café model depends on consistent community participation.

Statement 2: Its replication in larger cities has faced obstacles due to weak public engagement and

infrastructure.

- a) Both statements highlight that citizen participation is indispensable, though external systems also affect sustainability.
- b) Statement 1 stresses civic involvement, while Statement 2 dismisses its significance in urban contexts.
- c) Together, they suggest that infrastructural reform alone can ensure success in all cities.
- d) The two statements are unrelated, since one deals with participation and the other with policy limitations.

Read the case-based passage and answer the questions(Q4-6) that follow: (306 words)

Climate change is the defining challenge of our time. From shifting weather patterns that disrupt food production to rising sea levels that threaten coastal communities, its effects are global, unprecedented, and accelerating. Without urgent collective action, adapting to these changes will become more costly and difficult with each passing decade.

Since the 1800s, human activities — especially the burning of coal, oil, and gas — have been the main drivers of climate change. These actions release greenhouse gases (GHGs), such as carbon dioxide, which trap heat in the Earth's atmosphere like a thick blanket. The concentration of these gases has been rising steadily since the Industrial Revolution, causing a corresponding increase in average global temperatures.

The United Nations Environment Programme reports that while progress has been made since the Paris Agreement of 2015, global emissions still need to fall by 28% for the 2°C target and 42% for the 1.5°C pathway. Each fraction of a degree matters: a rise beyond 1.5°C could result in more frequent heatwaves, heavier rainfall, and increased food and water insecurity. Approximately 3.5 billion people already live in areas highly vulnerable to climate impacts.

To prevent catastrophic outcomes, deep and sustained reductions in greenhouse gas emissions are needed across all sectors. The Intergovernmental Panel on Climate Change (IPCC) emphasizes the need for “climate-resilient development,” integrating adaptation with low-carbon growth. This involves improving access to clean energy, expanding public transport, and promoting walking and cycling — all of which enhance health and air quality while reducing emissions.

The Paris Agreement remains a cornerstone of global climate governance, uniting 194 countries in the goal of keeping temperature rise well below 2°C. Achieving this will demand rapid transformations in energy, transport, agriculture, and urban systems. The choices humanity makes in this decade will determine whether the planet can sustain future generations in safety and dignity.

- 4. What can be inferred about the Paris Agreement from the passage?
 - a) It has fully succeeded in curbing emissions, though some nations have withdrawn temporarily.
 - b) It remains symbolically important but lacks sufficient global commitment to meet its goals.
 - c) It has shifted the focus of climate policy entirely from mitigation to adaptation.
 - d) It has achieved uniform implementation across both developed and developing nations.
- 5. The word “**cornerstone**” in the line “The Paris Agreement remains a cornerstone of global climate governance” most nearly implies —
 - a) an outdated principle that once guided global policies
 - b) a fundamental base upon which broader frameworks are built
 - c) a controversial issue that divides international opinion
 - d) a temporary measure pending more effective strategies
- 6. Which option best captures the **author's tone** throughout the passage?
 - a) Cautiously hopeful, acknowledging urgency yet recognizing feasible solutions
 - b) Objective and emotionless, presenting data without interpretation
 - c) Defensively optimistic, downplaying the risks to highlight technological progress
 - d) Grimly persuasive, warning readers of an irreversible environmental collapse
- 7. Which is the correct **active voice transformation**?

The final report will have been reviewed by the principal before submission.

 - a) The principal reviewed the final report before submission.
 - b) The principal has reviewed the final report before submission.
 - c) The principal will have reviewed the final report before submission.
 - d) The principal is reviewing the final report before submission.
- 8. Which pair of words has the closest meaning in normal usage?
 - a) Meticulous – Painstaking
 - b) Reckless – Audacious
 - c) Austere – Elegant
 - d) Frugal – Miserly

9. After months of networking and attending seminars, Arjun finally got his foot in the door at the publishing company. What does the idiom "**foot in the door**" most likely imply in this context?
- Arjun literally stepped into the office.
 - Arjun has secured an initial opportunity to prove himself.
 - Arjun has gained complete control of the company.
 - Arjun is about to leave the company for a better one.
10. Which discourse marker can best replace "**Conversely**" without changing the meaning? Electric cars reduce greenhouse gas emissions. Conversely, their batteries can create environmental hazards if not disposed of properly.
- On the other hand
 - At the same time
 - Nevertheless
 - In contrast
11. Read the poem and answer the question:
- If I don't taste the complicated waves—
 if I only see the rolling,
 only hear the roiling up
 or smell those waves
 —then I will tumble
 head over
 stance. Then I spring
 up, drenched in partisan sand.
- The phrase "**drenched in partisan sand**" most likely suggests—
- The speaker's literal struggle against a tide.
 - A biased or one-sided experience that leaves a mark.
 - A feeling of purification and calm after immersion.
 - The separation between body and mind.
12. Which of the following is the correct reported speech form?
- Riya said, "The train leaves at six o'clock."
- Riya said that the train left at six o'clock.
 - Riya said that the train leaves at six o'clock.
 - Riya said that the train had left at six o'clock.
 - Riya said that the train will leave at six o'clock.
13. Identify the sentence that contains an error in subject–verb agreement.
- More than one candidate has qualified for the interview.
 - More than two students were absent yesterday.
 - More than one of the answers are incorrect.
 - More than three members have volunteered for the event.
14. Identify the option in which the main verb and auxiliary verb(s) are incorrectly labelled.
- She is being very generous today. (Auxiliary – is, being; Main – generous)
 - They have been waiting for you since noon. (Auxiliary – have, been; Main – waiting)
 - I do hope you can join us for dinner. (Auxiliary – do; Main – hope)
 - We are having lunch on the terrace. (Auxiliary – are; Main – having)
15. Identify the option in which the type of clause is incorrectly labelled.
- Whoever arrives first will get the front seat – Noun Clause
 - I went to the park because I needed some fresh air – Adverb Clause
 - The book that you lent me was fascinating – Adjective Clause
 - She sings better than she dances – Noun Clause
16. Each sentence below contains a tense error. Choose the option that correctly shows the tense each underlined verb should be changed to.
- By the time the guests arrived, the host was serving dinner.
 - I knew I forget my notebook at school.
 - She said she is knowing the answer all along.
 - If he studied harder, he will pass next time.

- a) 1 – Past Perfect, 2 – Past Perfect, 3 – Simple Past, 4 – Past (Conditional)
- b) 1 – Past Continuous, 2 – Past Perfect, 3 – Present Perfect, 4 – Past Perfect
- c) 1 – Present Perfect, 2 – Simple Past, 3 – Past Continuous, 4 – Simple Present
- d) 1 – Past Perfect, 2 – Present Perfect, 3 – Simple Past, 4 – Future Perfect

17. Read the following sentence carefully and choose the option that **BEST** captures the meaning of the word “**jaunty**” as used here. Despite the storm raging outside, Mira walked into the hall with a jaunty tilt of her hat and an air that defied the gloom.
- a) Cheerful and confident in manner, suggesting resilience in adversity
 - b) Carelessly indifferent, showing complete disregard for the situation
 - c) Nervous but trying to appear composed before others
 - d) Somber and withdrawn, reflecting the tense atmosphere
18. How many punctuation marks are required to make the following passage grammatically correct? The professor said the results were unexpected yet she seemed pleased when the students asked may we see the data she replied not until the report is published
- a) 4
 - b) 5
 - c) 6
 - d) 7
19. Identify the **transformation** that best retains the meaning of the sentence:
“Hardly had the train left when it began to rain.”
- a) The rain started just before the train had left.
 - b) The train left the station only after the rain had begun.
 - c) The rain began almost the moment the train departed.
 - d) The train was leaving while it was raining heavily.
20. Which two literary devices are featured most prominently in the lines below? The sheen of fine sweat on his face and his hands reflect back a light in the glow of the sun.
- a) Alliteration and Imagery – The repetition of the ‘s’ sound is combined with vivid visual description.
 - b) Simile and Metaphor – A comparison between sweat and light is made without using “like” or “as.”
 - c) Personification and Assonance – The sweat is given human qualities, and the ‘e’ sound is repeated.
 - d) Hyperbole and Onomatopoeia – The visual effect is exaggerated, and the words mimic a sound.
21. Riya starts a small online clothing store. She wants to know whether her business is profitable at the end of the year and whether her capital has increased or decreased. She approaches an accountant for help. The accountant tells her that a systematic record of all business transactions is needed to find out the profit or loss and financial position. What service is the accountant referring to?
- a) Management
 - b) Accounting
 - c) Auditing
 - d) Bookkeeping
22. Sunrise Pharmacy prepares its financial statements at year-end. The bank wants to see these statements before sanctioning a term loan. The owner’s brother, who has invested some money, also asks for the same statements to know whether he should continue his investment. In this case, the bank and the brother are:
- a) Internal users & internal users
 - b) External users & internal users
 - c) External users & external users
 - d) Internal users & external users
23. A proprietor, Mr. Imtiaz, says his accountant always ensures that the information in financial statements is free from material error, neutral, and can be relied upon by users for decision-making. The accountant avoids bias and personal judgement. Which qualitative characteristic of accounting information is primarily being ensured?
- a) Comparability
 - b) Timeliness
 - c) Reliability (Faithful representation)
 - d) Understandability
24. A shopkeeper buys a personal laptop for his son using cash from the shop. By mistake, he records this purchase as a business asset in the shop’s books, which increases the asset balance. Which basic accounting concept has been violated?
- a) Money Measurement Concept
 - b) Business Entity Concept
 - c) Going Concern Concept
 - d) Dual Aspect Concept

25. A café owner, Kriti, notes that customers are very happy with her service and ambience. She feels this is her biggest strength, but when the accountant prepares the balance sheet, there is no item for "customer satisfaction" or "good ambience." This situation is due to which accounting concept?
- Matching Concept
 - Money Measurement Concept
 - Consistency Concept
 - Prudence Concept
26. A stationery shop has been successfully running for 20 years. While preparing accounts, the proprietor assumes that the business will continue for the foreseeable future and does not plan to sell its assets at present market value. This assumption is based on which concept?
- Going Concern Concept
 - Materiality Concept
 - Cost Concept
 - Conservatism Concept
27. A small grocery store purchased shelves for ₹20,000 five years ago. Today, similar new shelves would cost ₹30,000. While preparing the balance sheet, the accountant continues to show the shelves at original cost less depreciation, not at current market price. Which concept is being followed?
- Matching Concept
 - Dual Aspect Concept
 - Historical Cost Concept
 - Realisation Concept
28. Rohan, a tutor, receives ₹8,000 tuition fees in March for classes already conducted in January and February. His accountant decides to record this income in the current year's profit and loss account. Assertion (A): Income is recorded when it is earned, not necessarily when cash is received. Reason (R): Under accrual basis of accounting, revenues and expenses are recorded on cash basis.
- Both A and R are true, and R is the correct explanation of A.
 - Both A and R are true, but R is not the correct explanation of A.
 - A is true, but R is false.
 - A is false, but R is true.
29. A trader has a stock of goods costing ₹50,000 at year-end. The market value of the stock has fallen to ₹45,000. His accountant values stock at ₹45,000. Assertion (A): Stock is valued at lower of cost and net realisable value. Reason (R): According to the conservatism concept, anticipated losses are accounted for, but anticipated profits are not.
- Both A and R are true, and R is the correct explanation of A.
 - Both A and R are true, but R is not the correct explanation of A.
 - A is true, but R is false.
 - A is false, but R is true.
30. A company hires an accountant and asks her to:
1. Prepare financial statements for shareholders.
 2. Analyse costs of production to control wastage.
 3. Estimate future profits and plan budgets.
- Which statements correctly match branches of accounting?
- 1–Financial Accounting, 2–Cost Accounting, 3–Management Accounting
 - 1–Cost Accounting, 2–Financial Accounting, 3–Management Accounting
 - 1–Management Accounting, 2–Cost Accounting, 3–Financial Accounting
 - 1–Financial Accounting, 2–Management Accounting, 3–Cost Accounting
31. A small retail shop hires a person to record daily sales and purchases in books of original entry and post them to ledger. Another expert is hired at year end to prepare trial balance, trading and profit & loss account, and balance sheet. Record-keeping by the first person is mainly:
- Auditing
 - Bookkeeping
 - Management Accounting
 - Financial Analysis
32. A newly set-up private school wants its accounts to be comparable with other schools and acceptable to banks. It decides to follow generally accepted rules and guidelines while preparing financial statements. The rules and guidelines referred to here are known as _____.
- IFRS
 - GAAP
 - MIS
 - ERP
33. In a big supermarket, the accountant writes off the cost of calculators worth ₹500 each as an expense in the year of purchase rather than showing them as assets and depreciating them over several years. Which concept justifies this treatment?
- Materiality Concept
 - Matching Concept
 - Consistency Concept
 - Dual Aspect Concept

34. A business owner complains that financial statements do not reflect:
1. The value of loyal employees.
 2. Current market value of Plant & Machinery.
 3. Estimates used in depreciation and provisions. Which limitations of financial accounting are indicated?
- a) Only 1 and 2 b) Only 2 and 3 c) Only 1 and 3 d) 1, 2, and 3
35. A startup founder asks her accountant:
- "How much profit did we earn this year?"
 - "What is our financial position at year-end?"
- The accountant replies with income statement and balance sheet.
The primary objectives of accounting in this case are to:
- a) Maintain cost records and budget b) Ascertain profit or loss and financial position
c) Calculate tax only d) Check frauds only
36. A furniture dealer sells a table worth ₹10,000 to a customer on credit and issues a sales invoice. Later, the accountant uses this invoice to pass a journal entry in the books. This sales invoice acts as a:
- a) Ledger b) Trial balance c) Source document and voucher d) Contra entry
37. A new trainee in a wholesale shop sees that all daily transactions are first recorded in the journal, and later posted into different accounts such as Cash A/c, Purchases A/c, Sales A/c etc. This process of transferring entries from journal to ledger is called:
- a) Journalising b) Posting c) Balancing d) Totalling
38. Meera pays ₹5,000 cash to a creditor, Mr. Arjun. The accountant passes the entry:
Arjun A/c Dr. 5,000 To Cash A/c 5,000
Which rule of double entry is correctly applied here?
- a) Credit the receiver, debit what goes out b) Debit the receiver, credit what goes out
c) Debit all expenses, credit all incomes d) Debit the giver, credit what comes in
39. A business maintains a two-column cash book with cash and bank columns. It receives a cheque from a customer of ₹12,000 and deposits it the same day into the bank. How will this transaction be recorded?
- a) Debit cash column, credit bank column
b) Debit bank column, credit cash column
c) Debit bank column, credit customer's account
d) Debit customer's account, credit bank column
40. Riddhi compares the balance as per cash book with the balance shown in the bank statement and finds a difference due to cheques issued but not yet presented and cheques deposited but not yet collected. The statement she prepares to reconcile these differences is called:
- a) Trial Balance b) Adjusted Cash Book
c) Bank Reconciliation Statement d) Balance Sheet
41. At the end of the month, a business prepares a statement in which all ledger account balances, debit and credit, are listed. The arithmetical total of debit balances equals that of credit balances. This statement is called:
- a) Journal b) Trial Balance c) Income Statement d) Cash Flow Statement
42. A factory buys a machine for ₹5,00,000 to be used for many years. The accountant charges a part of its cost every year to the profit & loss account as an expense.
Assertion (A): Depreciation is charged to allocate the cost of a fixed asset over its useful life. Reason (R): Depreciation is provided only when the market value of the asset increases.
- a) Both A and R are true, and R is the correct explanation of A.
b) Both A and R are true, but R is not the correct explanation of A.
c) A is true, but R is false.
d) A is false, but R is true.
43. A shop purchases furniture for ₹60,000 with an estimated life of 5 years and no scrap value. It decides to use the straight line method of depreciation. What will be the annual depreciation?
- a) ₹6,000 b) ₹10,000 c) ₹12,000 d) ₹15,000

44. A sole proprietor has sundry debtors of ₹2,00,000 at year-end. Past experience shows that around 5% of debtors may not pay. The accountant decides to create Provision for Doubtful Debts. The main objective of this provision is to:
- Overstate profit
 - Understate assets deliberately
 - Meet possible losses from bad debts in future
 - Avoid creating reserves
45. While preparing the trial balance, a firm finds that the debit and credit totals do not tally. The accountant temporarily transfers the difference to Suspense Account and later discovers errors. Consider the statements:
- Suspense Account is used when trial balance does not tally.
 - If all errors are located and rectified, Suspense Account will be closed.
 - Suspense Account appears only in the Trial Balance, never in the Balance Sheet.
- Which statements are correct?
- 1 and 2 only
 - 2 and 3 only
 - 1 and 3 only
 - 1, 2, and 3
46. A purchase of furniture for ₹8,000 is wrongly debited to Purchases A/c instead of Furniture A/c. Later the accountant passes a rectifying entry.
- Assertion (A): This is an example of an error of principle.
- Reason (R): It arises because a capital expenditure is treated as revenue expenditure.
- Both A and R are true, and R is the correct explanation of A.
 - Both A and R are true, but R is not the correct explanation of A.
 - A is true, but R is false.
 - A is false, but R is true.
47. A busy grocery store records all credit sales of goods to customers in a separate book instead of journalising each transaction individually. This helps save time and effort. Which subsidiary book is being used?
- Purchases Book
 - Sales Book
 - Sales Return Book
 - Journal Proper
48. A firm returns goods worth ₹5,000 to a supplier due to quality issues. The accountant records this transaction in a special subsidiary book. This book is known as:
- Sales Return Book
 - Purchases Book
 - Purchases Return (Return Outwards) Book
 - Sales Book
49. A sole trader starts business with cash ₹2,00,000 and later takes a bank loan of ₹50,000. At the same time, he purchases stock worth ₹1,50,000. The basic accounting equation at this stage can be expressed as:
- Assets = _____ + Liabilities
- Cash
 - Capital
 - Profit
 - Debtors
50. A trader has a debtor, Aman, for ₹10,000. Aman becomes insolvent and the amount is written off as bad debt. Later, Aman unexpectedly pays ₹3,000. The accountant decides to credit this amount to Bad Debts Recovered A/c. This income will be shown in:
- Trading Account
 - Profit & Loss Account as other income
 - Balance Sheet under liabilities
 - Capital Account
51. A business maintains a single-column cash book. At the end of the month, the cash book shows a debit balance of ₹12,000. Consider statements:
- Cash book serves the purpose of both journal and ledger.
 - Debit balance of cash book represents cash in hand.
 - Credit balance of cash book is also possible.
- Choose the correct option:
- 1 and 2 only
 - 1 and 3 only
 - 2 and 3 only
 - 1, 2, and 3
52. A firm issues cheques for amounts greater than the balance available in its bank account, which the bank still honours. The pass book then shows a credit balance.
- Assertion (A): Credit balance as per pass book indicates bank overdraft.
- Reason (R): Overdraft means the firm has deposited more money than withdrawn.
- Both A and R are true, and R is the correct explanation of A.
 - Both A and R are true, but R is not the correct explanation of A.
 - A is true, but R is false.
 - A is false, but R is true.

53. A trader spends ₹30,000 on painting and decorating a newly purchased shop before opening it for business. This expenditure increases the usefulness and appearance of the asset. This expenditure is treated as:
- Revenue Expenditure
 - Capital Expenditure
 - Deferred Revenue Expenditure
 - Loss
54. At the end of the month, the total of debit side of a customer's account is ₹30,000 and total of credit side is ₹22,000. The net balance of the account will be:
- ₹8,000 debit
 - ₹8,000 credit
 - ₹52,000 debit
 - ₹52,000 credit
55. A small bakery records all direct expenses like wages, carriage inwards, power & fuel used in baking, along with purchases and sales of goods in a particular account to ascertain gross profit. This information is shown in:
- Profit & Loss Account
 - Balance Sheet
 - Trading Account
 - Cash Book
56. A sole trader pays rent of ₹4,000 per month. During the year, only 11 months' rent is paid. At yearend, the unpaid rent of one month remains outstanding. To find correct profit, the rent expense in Profit & Loss A/c for the year should be:
- ₹44,000
 - ₹48,000
 - ₹4,000
 - ₹40,000
57. The business pays insurance premium of ₹12,000 on 1st October for one year. The accounting year ends on 31st March. The accountant wants to show only the expense relating to current year in Profit & Loss A/c. How much insurance expense will be charged to current year?
- ₹12,000
 - ₹6,000
 - ₹3,000
 - ₹9,000
58. A sole proprietor has opening stock ₹30,000, purchases ₹1,70,000 and closing stock ₹40,000. Sales are ₹2,50,000. The closing stock is given as an adjustment outside the trial balance. In the final accounts, closing stock will be shown:
- Only on credit side of Trading A/c
 - Only on asset side of Balance Sheet
 - On credit side of Trading A/c and asset side of Balance Sheet
 - Only in Profit & Loss A/c
59. Rahul, a sole proprietor, withdraws ₹5,000 per month from business for personal use. At year-end, total drawings are recorded and adjusted. Statements:
- Drawings reduce capital.
 - Drawings are recorded on debit side of Capital A/c.
 - Drawings are an expense of the business.
- Choose the correct option:
- 1 and 2 only
 - 1 and 3 only
 - 2 and 3 only
 - 1, 2, and 3
60. A business pays wages of ₹90,000 during the year. At year-end, wages outstanding are ₹10,000. The accountant adds outstanding wages to wages paid while preparing Trading A/c.
Assertion (A): Total wages of ₹1,00,000 should be charged to current year's Trading A/c.
Reason (R): According to matching concept, expenses of a period should be matched with revenues of that period.
- Both A and R are true, and R is the correct explanation of A.
 - Both A and R are true, but R is not the correct explanation of A.
 - A is true, but R is false.
 - A is false, but R is true.
61. The following is extracted from the books of a sole trader:
- Opening Stock: ₹20,000
 - Purchases: ₹1,60,000
 - Sales: ₹2,40,000
 - Closing Stock: ₹30,000
- Carriage inward of ₹5,000 is also given. Find the gross profit.
- ₹55,000
 - ₹45,000
 - ₹65,000
 - ₹75,000

62. A sole trader has capital at the beginning of the year of ₹3,00,000. During the year, he introduces additional capital of ₹50,000. His drawings are ₹40,000 and the profit earned is ₹90,000. The capital at the end of the year will be:
 a) ₹3,50,000 b) ₹3,90,000 c) ₹4,00,000 d) ₹4,80,000
63. In the balance sheet of a sole proprietor, machinery is shown at ₹2,00,000 and Provision for Depreciation on Machinery is shown at ₹50,000. The firm charges depreciation every year and accumulates it in this provision account. The book value of machinery appearing in the balance sheet will be:
 a) ₹2,00,000 b) ₹50,000 c) ₹1,50,000 d) ₹2,50,000
64. A small kirana store prepares final accounts. Consider the following items:
 1. Carriage inward
 2. Salaries of staff
 3. Wages for factory workers
 4. Discount allowed to customers
 Which items are direct expenses generally shown in Trading A/c?
 a) 1 and 2 only b) 1 and 3 only c) 2 and 4 only d) 3 and 4 only
65. Rohan receives ₹80,000 as loan from bank and ₹20,000 as commission from an agency business. His accountant shows only ₹20,000 in Profit & Loss A/c and ₹80,000 in balance sheet as liability.
 Assertion (A): Commission is a revenue receipt, whereas bank loan is a capital receipt. Reason (R): Only capital receipts are shown in Profit & Loss A/c.
 a) Both A and R are true, and R is the correct explanation of A.
 b) Both A and R are true, but R is not the correct explanation of A.
 c) A is true, but R is false.
 d) A is false, but R is true.
66. A firm has Sales of ₹3,00,000 and Sales Return of ₹20,000. In the Trading Account, the amount shown on the credit side as Net Sales will be:
 a) ₹3,20,000 b) ₹2,80,000 c) ₹3,00,000 d) ₹20,000
67. A tuition centre has outstanding tuition fees (accrued income) of ₹6,000 at the end of the year, which relate to classes conducted in the current year but not yet received. In the final accounts, accrued income is shown as:
 a) Liability in Balance Sheet
 b) Deduction from income in Profit & Loss A/c
 c) Addition to income in Profit & Loss A/c and asset in Balance Sheet
 d) Neither in P&L nor in Balance Sheet
68. A student studies the financial statements of a sole proprietor's shop and notices:
 1. The business is owned and controlled by one person.
 2. The proprietor bears all risks and enjoys all profits.
 3. The proprietor's personal and business accounts are separately recorded in the books.
