

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each

Read the passage and answer the questions (1-3) which follow:

The question of why women tend to live longer than men has intrigued scientists, psychologists, and social thinkers for generations. Although the reasons are complex, most researchers agree that a combination of biological, behavioural, and social factors contributes to this persistent difference in life expectancy.

From a biological standpoint, women appear to possess certain natural advantages. Their bodies generally show greater resistance to disease and recover more efficiently from illness. Genetic differences play a significant role: women have two X chromosomes, while men have one X and one Y. The presence of a second X chromosome provides a kind of genetic safety net, protecting against potentially harmful mutations. Hormonal factors further add to this advantage, as oestrogen is known to support cardiovascular health and strengthen the immune system.

However, biology explains only part of the story. Behaviour and lifestyle choices strongly influence longevity. Men are more likely to engage in high-risk behaviours such as smoking, drinking, or reckless driving. Such habits, often encouraged by cultural expectations of toughness or independence, may bring short-term thrill but long-term harm. Additionally, men are less likely to visit doctors regularly or seek preventive healthcare, which means that illnesses often go undetected until they become serious.

Social patterns and emotional habits also play a significant part. Traditionally, women have taken on greater caregiving roles, caring for children, parents, or communities. These responsibilities, while demanding, often foster empathy, social connection, and a sense of purpose — all linked to better mental and physical health. Women also tend to maintain stronger social networks and express their emotions more openly, reducing stress and promoting psychological well-being. These qualities may collectively contribute to their longer lives.

Encouragingly, the longevity gap is not fixed. As gender roles evolve, more men are adopting healthier routines, participating in caregiving, and prioritising self-care. Experts suggest that men who “borrow” habits often associated with women — such as balanced eating, regular medical check-ups, and open emotional communication — can significantly improve both their quality of life and lifespan. Governments and health organisations are also promoting preventive care and mental health awareness among men to bridge this gap further.

Ultimately, the question of longevity is not about competition but understanding. It reminds us that the length and quality of life depend on more than genetics; they are deeply influenced by habits, attitudes, and social behaviour. By learning from one another and adopting balanced lifestyles, both men and women can work toward a healthier, longer, and more fulfilling life. Longevity, then, becomes not just a biological gift, but a conscious choice shaped by the way we live.

1. Which of the following statements is NOT supported by the passage?

- A) Women's longer lifespan is influenced by both biological and social factors.
- B) Men's reluctance to seek preventive healthcare contributes to shorter lifespans.
- C) The longevity gap between men and women is an unchangeable biological reality.
- D) Evolving gender roles have encouraged men to adopt healthier lifestyle habits.

2. Read the following two statements and answer the question that follows:

Statement I: The study suggests that the female advantage in longevity dates back millions of years and is rooted in evolutionary patterns across species.

Statement II: Men can completely eliminate the longevity gap by adopting healthier lifestyles and behaviors.

Which of the following best describes the relationship between the two statements?

- A) Statement II oversimplifies the implications of Statement I, which emphasize evolutionary influences.
- B) Statement I provides partial support for the optimism expressed in Statement II.
- C) Statement II contradicts Statement I by denying the role of evolution in longevity differences.
- D) Statement I and Statement II present independent explanations that are both equally valid.

3. Which of the following best describes the tone and purpose of the passage?

- A) Analytical and persuasive — it presents evidence and encourages behavioural change.
- B) Descriptive and emotional — it praises women's superiority over men.
- C) Narrative and reflective — it recounts personal experiences about longevity.
- D) Critical and argumentative — it challenges scientific explanations of gendered lifespan.

Read the passage and answer the questions(Q4-6) which follow: (301 words)

In February 2022, a cyberattack on a leading Japanese automobile manufacturer forced the shutdown of five assembly plants for nearly two days. Investigators later discovered that the breach began with a malware-infected supplier system, halting production of more than 13 000 vehicles and causing losses of about \$250 million. What seemed like a small technical glitch exposed a critical truth: in the digital economy, a single compromised node can disrupt an entire network.

This incident reflects the paradox of modern efficiency. The "just-in-time" supply model, designed to reduce storage costs and speed up delivery, depends on seamless data flow among hundreds of partners. Yet that very interdependence makes industries vulnerable to disruption. When one link fails—through a cyberattack, system error, or delayed software update—the ripple effect can paralyse global trade.

A 2023 World Bank report found that more than 60 percent of international manufacturers rely on interconnected vendor platforms with limited cybersecurity audits. Experts warn that many firms invest heavily in automation but underinvest in cyber resilience. Dr Rina Mukherjee, a cyber-risk analyst, notes, "We have optimised every second of production time but ignored the seconds it takes for ransomware to spread."

Governments, too, have struggled to keep pace. Although several countries now require critical-infrastructure operators to conduct annual security reviews, implementation remains uneven. The result, according to the Global Cyber Index 2024, is a 40 percent rise in supply-chain intrusions since 2020. Analysts describe this as the "cumulative effect of inaction"—years of neglect that compound into systemic fragility.

The larger danger, experts argue, lies not in the breaches already known but in the undiscovered points of failure embedded deep within global networks. As organisations race toward digital transformation, the challenge is to make systems not only smarter but also stronger—so that the next innovation does not become the next vulnerability.

4. What does the phrase "**cumulative effect of inaction**" suggest in the context of the passage?

- A) The government's proactive measures against cyberattacks
- B) The growing impact of long-term neglect in cybersecurity
- C) A sudden, isolated event caused by hackers
- D) The resilience built through years of practice

5. Which statement best explains why the "**just-in-time**" model increases cyber risk?

- A) It relies on multiple disconnected servers.
- B) It demands constant connectivity among partners.
- C) It eliminates human oversight completely.
- D) It stores large quantities of spare components.

6. Which option best captures the central idea of the passage?

- A) Automation ensures both speed and safety in industries.
- B) Cyberattacks are unpredictable and unavoidable.
- C) Efficiency-driven systems can become fragile without security investment.
- D) Governments should control all private supply chains.

7. Which **idiom** best describes the situation in the sentence below? "*Whenever she was asked a question about her new novel, the author would get so excited that she would speak continuously, with her words racing and tumbling over each other in a blur.*"

- A) A word in edgewise
- B) Speak volumes
- C) Mile a minute
- D) Talk shop

8. Choose the sentence that follows the correct subject-verb agreement:
- Each of the research proposals submitted by the committee members were scrutinized by the panel before the funding announcement.
 - There is a dozen eggs and three loaves of artisanal bread needed for the charity bake sale this afternoon.
 - The majority of the electorate, despite widespread media coverage, remain unconvinced about the proposed infrastructure bill's benefits.
 - Mathematics, especially the advanced principles of calculus and topology, are essential for solving the complex computational problems facing the team.
9. Choose the correct sentence transformation from active to passive voice: The engineers realized that the extensive delay in the construction of the prototype had severely jeopardized the company's bid for the lucrative government contract.
- It was realized by the engineers that the company's bid for the lucrative government contract had been severely jeopardized by the extensive delay in the construction of the prototype.
 - That the extensive delay in the construction of the prototype had severely jeopardized the company's bid for the lucrative government contract was realized by the engineers.
 - The company's bid for the lucrative government contract has been severely jeopardized by the extensive delay in the construction of the prototype, which the engineers realized.
 - The extensive delay in the construction of the prototype was being realized to have jeopardized the company's bid for the lucrative government contract by the engineers.
10. Read the sentence carefully and answer the question below: "The new policy mandates stricter data encryption; **ergo**, all department heads must attend a security workshop next week to ensure compliance." The discourse marker "**ergo**" is used to:
- Signal a preceding cause or reason for the main statement.
 - Introduce a necessary conclusion or logical inference.
 - Soften a strong claim by presenting a less certain alternative.
 - Reiterate the central idea using different languages.
11. In which of the following sentences is the word stem used in a way that reflects its most natural and idiomatic collocation?
- The manager's sudden resignation stemmed a series of rumours about internal disputes.
 - Researchers are trying to stem the rapid spread of misinformation on social media.
 - The teacher stemmed her opinion on the firm belief that discipline is outdated.
 - The heated argument stemmed across several unrelated topics during the meeting.
12. Which word best fits the context of the sentence below? The museum director rejected the donor's elaborate marble statue, declaring it a piece of _____ artistry that was gaudy and worthless, fit for a carnival, not a historical collection.
- venerable
 - tawdry
 - auspicious
 - inchoate
13. Which meaning of the word "**censure**" best fits its use in the context of the sentence below? Despite his historically accurate reporting on the political scandal, the journalist faced an official censure from the news regulatory body for failing to disclose his own family's financial ties to one of the central figures.
- To subject material to official review for the purpose of removing objectionable content.
 - To publicly express severe disapproval or formal condemnation for a specific fault.
 - To forbid the use, publication, or public availability of certain sensitive information.
 - To provide an official estimate or statistical count of a population or resource pool.
14. How many punctuation marks are required to make the following passage grammatically accurate? The brilliant scientist Dr. Elena Rios a Nobel laureate from Argentina presented her new finding it was revolutionary but the skeptical audience was unconvinced they demanded proof I thought to myself Shes the smartest person here yet no one believes her Its frustrating What if her discovery is the answer
- 13
 - 14
 - 15
 - 16

15. Identify the sentence that correctly uses a **gerund or infinitive phrase** to complete its meaning:
- The marketing team will postpone to decide on the new logo until the survey results are finalized.
 - Before sending his application, Mr. Patel had spent two hours to check every item on the long requirements list.
 - The new regulations require every employee presenting their work at the quarterly meeting.
 - Sarah chose to focus on her immediate tasks rather than worrying about future promotions.
16. Choose the option that best expresses the sentence in indirect speech: The teacher said to the class, "You must submit your assignments by Friday, or you will lose marks."
- The teacher told the class that they must submit their assignments by Friday, or they would lose marks.
 - The teacher told the class that they had to submit their assignments by Friday, or they would lose marks.
 - The teacher said to the class that you must submit your assignments by Friday, or you will lose marks.
 - The teacher said to the class that they must submit their assignments by Friday, or they will lose marks.
17. Which of the following pairs correctly shows a word and its strict antonym, emphasizing a precise contrast in attitude or action?
- Eschew – Embrace
 - Exonerate – Disown
 - Mitigate – Intensify
 - Laud – Criticize
18. Identify the clause type in the following sentence: She completed the project early because she wanted to impress her manager.
- Noun clause
 - Adjective clause
 - Adverb clause
 - Relative clause
19. Choose the option that best retains the meaning of the original sentence: Had the company foreseen the market's shift toward smaller devices, they would not have invested so heavily in large desktop technology.
- The company did not anticipate the market change, resulting in heavy investment in technology that proved inefficient.
 - Since the company invested heavily in large desktops, they were unable to foresee the coming shift in the market.
 - The company's heavy investment in large desktop technology was the direct cause of the market's eventual shift.
 - The company, which foresaw the market shift toward smaller devices, chose to invest heavily in large desktop technology anyway.
20. How many different **literary devices** are used in the following passage? The city streets were a frozen maze of fear, each shadow whispering secrets of the night."
- Two – Metaphor, Personification
 - Three – Metaphor, Simile, Alliteration
 - Two – Hyperbole, Alliteration
 - Three – Personification, Irony, Metaphor
21. Rishabh, Rohan, and Kriti run a designer footwear start up specializing in handmade leather products. They operate from Mumbai and have recently expanded to online international markets. To maintain transparency, partners meet quarterly to review finances. It is observed that Rohan frequently withdraws funds for personal use, including monthly travel expenses and EMI payments. The firm recently amended its partnership deed to impose interest on drawings @10% per annum to discourage excessive withdrawals. Rohan withdrew ₹8,000 at the beginning of every month for an entire year. As per policy, average period of drawings is taken as 6 months. How much interest on drawings will be charged to Rohan?
- ₹4,800
 - ₹2,400
 - ₹3,200
 - ₹1,600
22. A firm producing biodegradable packaging materials is gaining recognition due to a government ban on single-use plastics. The partners Rhea and Mohit decide to admit Priya, a social media influencer, to strengthen marketing and brand outreach. The firm calculates average expected profits based on last five years' trend and determines capitalized value to be ₹15,00,000. The existing capital recorded in books is ₹9,00,000. Priya is given 1/5th share and must bring goodwill accordingly. What is the value of goodwill?
- ₹3,00,000
 - ₹6,00,000
 - ₹9,00,000
 - ₹15,00,000

23. A & B are partners running a chain of music training centres. They decide to admit C, a well-known playback singer, believing his brand image will boost admissions. C is told to bring goodwill based on expected revenue impact. C deposits only ₹36,000 due to temporary unavailability of funds; this represents just 60% of the goodwill required. Partners plan to adjust the remaining goodwill through capital accounts. The firm uses capitalisation method. What is total goodwill?
 A) ₹60,000 B) ₹90,000 C) ₹1,20,000 D) ₹36,000
24. A fitness training academy has three partners: Rahul (senior trainer), Mehul (tech lead), and Zoya (nutrition expert), sharing profits 5:3:2. Rahul decides to retire due to a government job offer. Before retirement, the firm updates asset values. Building value increases by ₹80,000 due to recent infrastructure upgrades, while outdated supplement stock worth ₹20,000 must be written off. The firm needs to calculate Rahul's share of revaluation profit. How much should Rahul receive?
 A) ₹20,000 B) ₹30,000 C) ₹40,000 D) ₹50,000
25. Aryan, Ved, and Neel run a consultancy agency that assists students in obtaining student visas. Neel handles UAE migration, a segment that had fewer clients this year due to policy restrictions. The partnership deed states Neel is guaranteed a minimum profit of ₹1,20,000 annually by Aryan and Ved in ratio 3:2. Total firm profit for the year is ₹2,40,000; Neel's actual share based on equal distribution is only ₹80,000. How much must Ved contribute towards the shortfall?
 A) ₹8,000 B) ₹12,000 C) ₹16,000 D) ₹24,000
26. Assertion (A): The sale of an oven for ₹1,00,000 when its book value was ₹1,40,000 results in a loss recorded in the Realisation Account.
 Reason (R): In dissolution, assets realised and liabilities settled are recorded through the Realisation Account to determine profit or loss.
 A) Both A and R are true, and R is the correct explanation of A
 B) Both A and R are true, but R is not the correct explanation of A
 C) A is true, but R is false
 D) A is false, but R is true
27. A photography studio dissolves, and partners auction assets. Sameer, who plans to become a full-time freelancer, takes over a camera valued at ₹60,000 in the books for an agreed price of ₹45,000. Accountant must pass a correct entry to reflect takeover through Realisation A/c. Which is the correct entry?
 A) Realisation Dr 60,000 To Sameer 60,000 B) Sameer Dr 45,000 To Realisation 45,000
 C) Realisation Dr 15,000 To Sameer 15,000 D) Sameer Dr 60,000 To Realisation 60,000
28. Assertion (A): Raj will receive ₹28,800 as annual interest on loan converted from his capital balance.
 Reason (R): Interest on loan to a retiring partner is charged on outstanding loan balance at the agreed rate.
 A) Both A and R are true, and R is the correct explanation of A
 B) Both A and R are true, but R is not the correct explanation of A
 C) A is true, but R is false
 D) A is false, but R is true
29. A digital marketing firm shifts from long-term retained earnings to short-term profit distribution for reinvestment. The firm holds credit balance of ₹90,000 in P&L A/c and ₹60,000 in General Reserve. Partners share profits 3:2:1 and decide to transfer accumulated profits to capital accounts before restructuring. How much does Partner C receive?
 A) ₹15,000 B) ₹20,000 C) ₹30,000 D) ₹25,000
30. A law consultancy using fluctuating capital system invests in cyberlaw case management software. Partner A contributes ₹50,000 to fund this advancement but later withdraws ₹20,000 for family medical emergencies. Firm needs to calculate net effect on his capital. What is the net effect?
 A) Increase ₹50,000 B) Increase ₹30,000 C) Increase ₹20,000 D) Increase ₹10,000
31. A salon partnership terminates due to licensing disputes. Realisation of assets totals ₹4,80,000. Liabilities total ₹1,80,000. Cash on hand prior to dissolution is ₹20,000. Partners want to determine total cash available for distribution. How much cash available?
 A) ₹3,00,000 B) ₹3,20,000 C) ₹2,80,000 D) ₹2,40,000

32. Assertion (A): Nick's capital increases by ₹25,000 under fluctuating capital method.
Reason (R): Under fluctuating capital method, capital increases due to additional contributions and decreases due to drawings.
- Both A and R are true, and R is the correct explanation of A
 - Both A and R are true, but R is not the correct explanation of A
 - A is true, but R is false
 - A is false, but R is true
33. A logistics firm admits a new partner who has expertise in government warehouse tenders. Partners agree not to record goodwill in books to avoid inflation of intangible assets. Instead, goodwill adjustment is done through capital accounts. Which is the correct treatment?
- New Partner Dr To Old Partners
 - Goodwill Dr To Old Partners
 - Old Partners Dr To New Partner
 - No entry needed
34. A chemical company producing lab reagents earns average profits of ₹1,50,000. Industry's normal return is 12% on capital employed of ₹10,00,000. Investors evaluate company's goodwill before acquisition using super profit methodology. What is the super profit?
- ₹50,000
 - ₹20,000
 - ₹30,000
 - ₹10,000
35. X and Y are property developers sharing profits 3:2. They admit Z for 1/4th share due to Z's architectural expertise. New profit ratio becomes 3:2:3 due to renegotiation. Firm must calculate sacrifice ratio for compensation. What is the sacrificing ratio:
- 3:2
 - 2:1
 - 1:1
 - 1:2
36. Assertion (A): When Vikram's shares are forfeited, ₹3,600 is transferred to Share Forfeiture Account.
Reason (R): Share Forfeiture Account is credited with calls paid by the shareholder before forfeiture.
- Both A and R are true, and R is the correct explanation of A
 - Both A and R are true, but R is not the correct explanation of A
 - A is true, but R is false
 - A is false, but R is true
37. TechVision Pvt. Ltd., a growing AI company, plans to build a research centre and signs a contract to acquire land worth ₹18,00,000 from VR Developers. Instead of paying cash, the company issues fully paid equity shares of ₹10 each at a premium of 20%. Directors believe issuing shares avoids immediate cash strain and helps maintain liquidity for hiring new data scientists. How many shares were issued to VR Developers?
- 1,50,000
 - 1,80,000
 - 2,25,000
 - 2,00,000
38. A company forfeited 500 shares of ₹10 each held by investor Pratham because he failed to pay allotment and final call. He had earlier paid ₹6 per share. Later, the company reissued these shares fully paid at ₹9 per share to raise funds for expansion into rural microfinance markets. The accountant needs to compute gains transferred to Capital Reserve on reissue. What is the amount transferred to Capital Reserve?
- ₹500
 - ₹750
 - ₹1,000
 - ₹1,500
39. Metro Builders Ltd decides to redeem preference shares worth ₹8,00,000 at 10% premium as part of restructuring to improve credit ratings. The board resolves that redemption will be fully funded through accumulated profits because external borrowing costs are high. Law requires transfer to CRR when redemption is done out of profits. What is the amount transferred to CRR?
- ₹8,00,000
 - ₹8,80,000
 - ₹80,000
 - Nil
40. To expand charging stations across major highways, EV ChargeGrid Ltd issues 12% debentures worth ₹12,00,000 at a premium of 25%. Premium is received in cash and will be used for installation of high-voltage transformers. The accountant must record journal entries correctly. Which entry is correct?
- Bank Dr 15,00,000 To Debentures 15,00,000
 - Bank Dr 15,00,000 To Debentures 12,00,000 To Premium 3,00,000
 - Debenture A/c Dr 15,00,000 To Bank 15,00,000
 - Bank Dr 12,00,000 To Debentures 12,00,000
41. A publishing company raises funds by issuing 1,00,000 shares at par and uses the proceeds to purchase government bonds as a long-term investment. The company wants to classify both transactions correctly

- in its cash flow statement for investors. What is the correct classification?
- A) Financing inflow & Investing outflow B) Operating inflow
C) Investing inflow D) No cash effect
42. Assertion (A): Conversion of debentures into equity shares does not create any cash flow. Reason (R): Conversion of a liability into share capital is a non-cash financing transaction.
- A) Both A and R are true, and R is the correct explanation of A
B) Both A and R are true, but R is not the correct explanation of A
C) A is true, but R is false
D) A is false, but R is true
43. A shareholder defaults on payment of call money and shares are forfeited. Later, the shares are reissued fully paid at a price higher than unpaid amount. Company earns a profit on reissue, which must be classified appropriately. What is the correct effect?
- A) Increase in Capital Reserve B) Decrease in Share Capital
C) Increase in Current Liabilities D) Increase in Discount Allowed
44. Assertion (A): Discount on issue of debentures is a capital loss amortised over the life of the debenture. Reason (R): Discount on issue of debentures is treated as a revenue expense since it arises from financing activity.
- A) Both A and R are true, and R is the correct explanation of A
B) Both A and R are true, but R is not the correct explanation of A
C) A is true, but R is false
D) A is false, but R is true
45. A company announces redemption of debentures next year at 5% premium. As per Schedule III, amount payable must be disclosed under correct classification. It is shown under:
- A) Other Current Liabilities B) Fixed Assets
C) Current Assets D) Reserves & Surplus
46. Due to heavy oversubscription, AquaPure Ltd applies pro-rata allotment. Excess money from application is adjusted towards allotment rather than refunded. What is the accounting outcome?
- A) Excess money transferred to Allotment A/c B) Entire excess refunded
C) Credited to Capital Reserve D) No effect on Allotment A/c
47. A transport company faces delayed customer payments and is unable to pay debenture interest at year-end. This unpaid amount must be shown appropriately in the balance sheet. It will be shown as:
- A) Current liability B) Non-current liability
C) Contra equity item D) Deferred revenue
48. A company declares bonus shares from accumulated profits to reward shareholders without distributing cash. After issue, total paid-up capital increases but reserves reduce by same amount. What is the total effect on equity:
- A) No change in total equity B) Total equity increases
C) Reserves increase D) Total equity decreases
49. A shareholder has not paid final call. Company prepares balance sheet under Schedule III. What is the calls in arrears will appear as:
- A) Deduction from Subscribed Capital B) Current Liability
C) Non-current Liability D) Other Equity Addition
50. Machinery is acquired from a vendor in exchange for issue of fully paid shares. No cash is used. This is:
- A) Non-cash financing transaction B) Investing inflow
C) Financing outflow D) Operating activity
51. "Urban Threads" is a fast-fashion apparel brand that initially launched seasonal collections but recently switched to a weekly micro-collection strategy inspired by global brands like Zara. Due to this shift, their inventory levels changed significantly. For the financial year, the business reported total net sales of ₹20,00,000, and after accounting for cost per design category, recorded gross profit of ₹8,00,000. Inventory auditing revealed that the opening stock was valued at ₹2,00,000, while closing stock increased to ₹3,00,000 as unsold premium jackets remained in stores due to economic slowdown. Management

- wants to assess inventory efficiency to decide whether to continue weekly launches or revert to seasonal cycles. What is the company's inventory turnover ratio?
- A) 2 times B) 3 times C) 4 times D) 5 times
52. "PowerGrid Mobility Ltd." manufactures electric vehicle batteries. To expand internationally, it borrowed significantly from foreign banks. As a result, its debt-equity ratio increased sharply from 0.6 to 1.8 within a year. Shareholders raised concerns during the annual general meeting about financial stability and bankruptcy risk. The CFO argued that debt was cheaper than equity infusion and would increase return on equity, but the finance committee warned that such leverage could strain future solvency. Which interpretation is most appropriate?
- a) Financial risk has increased due to dependence on debt
b) Company's solvency position has improved
c) Short-term liquidity has improved significantly
d) Profitability automatically increases due to higher debt
53. "FreshCart Mart," a chain of mini-supermarkets, introduced a model where customers pay via UPI/cash while suppliers grant 45-day credit. Due to Diwali sales, stock turnover increased rapidly and cash was collected instantly, but the company placed bulk orders on credit from wholesalers. As a result, current liabilities became significantly higher than current assets. The CFO noticed that despite strong sales, balance sheet showed negative working capital, causing confusion among employees who assumed the business was performing poorly. What does negative working capital indicate?
- a) Current liabilities exceed current assets
b) Company is facing a decline in profitability
c) Fixed assets are undervalued
d) Solvency position is very strong
54. Assertion (A): Operating efficiency of TechNova Electronics has decreased. Reason (R): Operating ratio increased from 60% to 85% due to rise in operating costs.
- a) Both A and R are true, and R is the correct explanation of A
b) Both A and R are true, but R is not the correct explanation of A
c) A is true, but R is false
d) A is false, but R is true
55. "WellnessFit Gym Franchise" expanded rapidly by offering EMI-based membership plans. The company reported quick assets of ₹3,00,000, including cash reserves and receivables. Inventory, consisting of protein supplements and fitness accessories, was valued at ₹50,000. Current liabilities, mainly salary dues and electricity bills, stood at ₹1,50,000. Investors plan to assess liquidity strength to approve a new loan request. What is the current ratio?
- a) 2:1 b) 2.33:1 c) 1.67:1 d) 1.5:1
56. Assertion (A): The Return on Equity (ROE) of SkillBridge Ed-Tech Pvt. Ltd. is 20%. Reason (R): ROE is calculated as Net Profit after tax divided by Shareholders' Equity.
- a) Both A and R are true, and R is the correct explanation of A
b) Both A and R are true, but R is not the correct explanation of A
c) A is true, but R is false
d) A is false, but R is true
57. A premium restaurant pays rent annually in advance to secure prime location rights. At start of year, prepaid rent was ₹60,000, but after 12 months the prepaid balance reduced to ₹20,000 as most of the period was consumed. The accountant must adjust expenses in Profit & Loss A/c. The management wants to know impact on profitability. What is the effect on profit?
- a) Expenses increase and profit decreases b) Expenses decrease and profit increases
c) Profit increases with no effect on expenses d) No financial impact occurs
58. A corporate IT firm purchases new laptops for employees. Older laptops, fully functional but outdated, are sold to employees at exactly book value to avoid loss or gain. Cash is collected and deposited into bank. HR wants to classify this transaction correctly in cash flow reporting. Which treatment is correct?
- a) Investing activity cash inflow with no effect on profit
b) Operating revenue inflow
c) Financing activity inflow
d) Exceptional item impacting net profit

59. "Organic Brown Foods" procures imported wheat and cocoa. Due to inflation, input costs have risen sharply. The company earlier followed FIFO, which showed higher profit because cheaper old stock was used first. This year, auditors recommend moving to Weighted Average to reflect more realistic valuation. The finance manager predicts the change will alter cost of goods sold and reported profits. Which is most likely effect?
- Profit decreases under Weighted Average in inflation
 - Profit increases significantly
 - No impact on profitability
 - Cash flow dramatically increases
60. "SkyMall Limited" operates shopping centres in metropolitan areas not prone to natural disasters. Unexpectedly, a massive flash flood occurred due to sudden dam release, damaging property worth crores. Since such an event was not predictable and doesn't relate to core business operations, auditors must classify the loss correctly in financial statements. How should this loss be reported?
- As an Exceptional Item
 - As an Operating Expense
 - As a Contingent Liability
 - As Depreciation Expense
61. "Evergreen Bottlers Pvt. Ltd." manufactures glass water bottles and uses heavy molding machines purchased three years ago. Due to frequent use, the machines have significantly depreciated, and this year the accountant recorded depreciation of ₹70,000. When preparing the Cash Flow Statement using the indirect method, the finance manager explains to trainees that depreciation does not involve actual cash outflow but reduces accounting profit. He further clarifies that to arrive at cash generated from operating activities, certain non-cash expenses must be adjusted back. How should this depreciation be treated in the Cash Flow Statement?
- Added back to Net Profit under Operating Activities
 - Deducted as a Cash Outflow under Operating Activities
 - Recorded as an Investing Activity Outflow
 - Recorded as a Financing Activity Inflow
62. Assertion (A): Sale proceeds of ₹40,000 from old furniture are shown under Investing Activities in Cash Flow Statement.
Reason (R): Sale of fixed assets results in an investing inflow, whereas loss or profit on sale does not affect cash flow classification.
- Both A and R are true, and R is the correct explanation of A
 - Both A and R are true, but R is not the correct explanation of A
 - A is true, but R is false
 - A is false, but R is true
63. "Green Harvest Organics Ltd." declared a final dividend during its Annual General Meeting. The dividend totaling ₹1,20,000 was paid to shareholders through online transfer. Management wants to classify dividend treatment accurately as per AS-3 for Cash Flow Statements. The accountant also clarifies that this payment relates to financing decisions rather than routine business operations. How should the dividend payment be classified?
- Financing Activity
 - Operating Activity
 - Investing Activity
 - Not Recorded in Cash Flow Statement
64. "Trident RoboTech" manufactures industrial robots and recently purchased an advanced welding robot for ₹4,00,000 to meet bulk export orders. Due to cash shortage, the company paid ₹2,00,000 immediately via bank transfer and agreed to pay the remaining amount later. The accountant must evaluate how this transaction affects cash flows for the year. What will be the cash flow impact?
- Investing Activity – Cash Outflow of ₹2,00,000
 - Investing Activity – Cash Outflow of ₹4,00,000
 - No cash flow since partly credit
 - Operating Activity – Cash Outflow of ₹2,00,000

65. "Riverdale Realty Ltd." acquired a land parcel worth ₹10,00,000 to build a commercial complex. Instead of paying cash, the company issued equity shares to the landowner. Since no cash was used, the accountant must classify the transaction correctly while preparing Cash Flow Statements. How should this be classified?
- Non-Cash Financing and Investing Transaction
 - Investing Activity – Cash Outflow ₹10,00,000
 - Financing Activity – Cash Inflow ₹10,00,000
 - Operating Activity – No Cash Impact
66. "CareConnect Hospitals" operates multiple branches with centralized billing. Whenever a patient is discharged from one branch, the billing, pharmacy deduction, medical supplies, and payroll system update instantly across all other branches. Doctors can track reports in real time, and management receives instant dashboards showing revenue. The IT team explains that this eliminates manual posting and improves accuracy. Which type of processing system is used?
- Real-time processing system
 - Batch processing system
 - Manual accounting system
 - Traditional MIS reporting
67. During system upgrade, "SilverOak Textiles" migrated all financial records to new ERP software. While comparing old ledgers to digital trial balance, the audit team found mismatch in balances. Investigation revealed that during migration, some ledger codes were converted incorrectly because item codes with alphabets like "LA1" were mistakenly processed as "L41" by software. What type of error occurred?
- Transcoding error
 - Logical processing error
 - Validation error
 - Compliance error
68. Assertion (A): Metro Foods Supermarket uses Authorization Control to restrict access rights in accounting software.
Reason (R): Authorization Control ensures only users with specific rights can make modifications, preventing fraud and misuse of data.
- Both A and R are true, and R is the correct explanation of A
 - Both A and R are true, but R is not the correct explanation of A
 - A is true, but R is false
 - A is false, but R is true
69. A retail chain expands nationwide and shifts its accounting to a cloud platform. Branch managers update sales from different cities, and the head office sees consolidated data instantly. The CFO appreciates that inventory levels and cash collections are visible in real time, enabling faster business decisions compared to earlier offline Tally-based systems. What is the major advantage?
- Real-time multi-user access from multiple locations
 - Higher dependency on offline storage
 - Lower processing speed
 - Reduced scalability due to centralization
70. "Quantum Analytics Ltd." faced cyber-attacks that corrupted local computers. Learning from this, the company implemented a new system where data is saved across multiple encrypted cloud servers located in different states. Even if one server is compromised, data can still be restored without loss. This practice is known as:
- Data backup and disaster recovery
 - Data redundancy
 - Data compression
 - Data validation

Read the following information carefully and answer the questions given below. (71 & 72)

Six boys A, B, C, D, E and F are marching in a line, their positions arranged according to their heights, the tallest at the back. F is between A and B. E is shorter than D but taller than C who is taller than A. E and F have two boys between them. A is not the shortest.

71. Where is E?
- Between A and B
 - Between A and C
 - Between C and D
 - In front of C

72. Who is shortest?

- A) E B) B C) C D) F

73. Ashish leaves his house at 20min to seven in the morning, reaches Kunal's house in 25min, they finish their breakfast in another 15 min and leave for their office which takes another 35min. At what time do they leave Kunal's house to reach their office?

- A) 7:40 am B) 7:20 am C) 7:45 am D) 8:15 am

74. Select a figure from amongst the Answer Figures which will continue the same series as established by the five Problem Figures.

Problem Figures:

Answer Figures:

- A) (5) B) (4) C) (3) D) (2)

75. The positions of how many digits in the number 2451479638 will remain same when the first half and the second half of the digits are arranged in ascending order separately?

- A) Only one B) Two C) None D) Three

76.

- A) 320 B) 274 C) 262 D) 132

77. X – Z means X is the mother of Z; X x Z means X is the father of Z and X+Z means X is the daughter of Z. Now, if M – N x T+Q, then which of the following is not true?

- A) T is N's daughter B) N is wife of Q
C) M is mother-in-law of Q D) Q is wide on N

78. In a certain code language 'DLEGYLC' is written as 'ENGLAND'. How will 'HLBDY' be written in that code?

- A) INDIA B) INDFZ C) NDOIA D) JNDEA

79. In a row of boys, Karthik is seventh from the left and Sufi is twelfth from the right. If they interchange their positions, Karthik becomes twenty second from the left. How many boys are there in the row?

- A) 19 B) 29 C) 31 D) 33

80. Complete the series : 1, 9, 17, 33, 49, 73,

- A) 97 B) 98 C) 99 D) 100

81. A square paper is folded into half diagonally, and then along the midline again. If a small triangle is cut at the closed corner, what figure appears when unfolded?

- A) One triangle B) Two triangles C) Four triangles D) A star-like pattern

82. If the mirror is placed along a diagonal of a square, what happens to the square's image?

- A) No change B) It overlaps exactly
C) It becomes a rectangle D) It flips to the other side

83. A pyramid has a square base. How many vertices does it have?

- A) 4 B) 5 C) 6 D) 8

84. Fire : Heat :: Rain : ?

- A) Cloud B) Thunder C) Flood D) Wetness

85. A cube is placed such that its edge is along each of the three coordinate axes (x, y, z). How many faces of the cube will be visible from the front view?

- A) 1 B) 2 C) 3 D) 4

86. What is the only known animal species considered biologically immortal (meaning it can revert to a juvenile form and restart its life cycle)?
 A) Axolotl B) *Turritopsis dohrnii* C) Greenland Shark D) Hydra
87. Which country has won the FIFA World Cup the most number of times?
 A) Argentina B) Germany C) Italy D) Brazil
88. At which session did the Indian National Congress adopt the resolution of 'Poorna Swaraj' (Complete Independence)?
 A) Bombay Session 1920 B) Lahore Session 1929
 C) Karachi Session 1931 D) Calcutta Session 1933
89. Which social media platform is primarily best suited for professional networking and job hunting?
 A) Facebook B) Instagram C) LinkedIn D) TikTok
90. In mass communication and advertising, the word "media" is often used as a singular collective noun. The original Latin singular form of "media" is:
 A) Median B) Medius C) Medium D) Intermediate
91. Which is the largest island in the world (excluding continents)?
 A) Madagascar B) Borneo C) Greenland D) New Guinea
92. In which field did Amartya Sen win the Nobel Prize?
 A) Physics B) Chemistry C) Economics D) Peace
93. Which article of the Indian Constitution guarantees the Right to Equality?
 A) Article 19 B) Article 21 C) Article 14 D) Article 32
94. At what temperature are Celsius and Fahrenheit scales equal?
 A) 0° B) 100° C) -40° D) -2730
95. What are *Glenochrysa zeylanica* and *Indophanes barbara*, recently discovered in Kerala?
 A) New species of fungi B) Neuroptera species
 C) Types of bacteria D) Newly identified marine mammals
96. Who is considered the "Father of the Paralympic Movement" for his work with injured World War II veterans?
 A) Pierre de Coubertin B) Antonio Maglio
 C) Sir Ludwig Guttmann D) Juan Antonio Samaranch
97. Which term refers to the study of speech sounds of a given language and their function within that language's sound system?
 A) Phonetics B) Phonology C) Syntax D) Morphology
98. Which Indian-born British author received the Dayton Peace Prize Lifetime Achievement Award in November 2025?
 A) Arundhati Roy B) V.S. Naipaul C) Jhumpa Lahiri D) Salman Rushdie
99. Which company developed the "Arattai" messaging application?
 A) Reliance Jio B) TCS (Tata Consultancy Services) C) Zoho Corporation D) Infosys
100. What is considered a core value in healthy relationships?
 A) Suspicion B) Control C) Trust D) Superiority
