

Name

Roll No.:

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each

Read the given passage and answer the questions (1-4) that follow:

The world beneath the ocean waves is full of mysteries. While much of the Earth's land has been explored, scientists estimate that nearly 80 percent of the ocean remains unmapped and unseen. Oceans cover more than two-thirds of our planet and are home to countless forms of life, from the smallest plankton to the gigantic blue whale. Each species has its own role in maintaining the delicate balance of the marine ecosystem.

One of the most fascinating discoveries in the deep sea has been the existence of bioluminescent creatures. These organisms produce their own light, often glowing in shades of blue or green. They use this light to attract prey, communicate with one another, or confuse predators. For example, the anglerfish uses a glowing lure on its head to draw smaller fish closer before snapping them up.

Oceans are not only important for marine animals but also for humans. They regulate Earth's climate, provide food, and even produce more than half of the oxygen we breathe. Yet, despite their importance, oceans face severe threats such as overfishing, plastic pollution, and rising temperatures due to global warming. If these problems are not addressed, many marine species could vanish, and the balance of life on Earth would be disturbed.

Exploring and protecting the oceans is therefore vital. By reducing waste, using resources responsibly, and supporting conservation projects, humans can help ensure that the mysterious world beneath the waves continues to thrive for generations to come.

1. Bioluminescent creatures are organisms that can _____.
 a) swim quickly b) produce their own light
 c) change their color permanently d) live without water
2. Identify the incorrect statement:
 a) Oceans cover more than two-thirds of the Earth.
 b) Anglerfish uses a glowing lure to attract prey.
 c) Oceans are less important for humans than for animals.
 d) Global warming affects the oceans.
3. The passage says, "**Many marine species could vanish if oceans are not protected.**" Which word would best replace '**vanish**' in this sentence without changing its meaning?
 a) fade away b) disappear c) be forgotten d) decline
4. What can we understand about the role of oceans in human life?
 a) They are mainly used for fishing. b) They are important only for transportation.
 c) They play a crucial role in maintaining life on Earth. d) They are less important than forests
5. In which of the following words is '**en**' NOT used as a prefix?
 a) Encourage b) Enrich c) Enjoy d) Enable
6. Which of the following is the antonym of '**loathe**'?
 a) Like b) Hate c) Love d) Enjoy
7. Identify the underlined part of speech in the sentence: She gave me a very cold stare before walking away.
 a) Noun b) Pronoun c) Adjective d) Adverb

8. The word **run** is used twice in the following sentence but in different ways. Identify the correct parts of speech for each use:
The runners had a quick run before the run of bad weather began.
- a) First run = Noun, Second run = Noun b) First run = Verb, Second run = Noun
c) First run = Noun, Second run = Adjective d) First run = Verb, Second run = Adverb
9. Choose the pair of words that are **antonyms**:
- a) Expand – Contract b) Borrow – Lend c) Accept – Receive d) Rise – Climb
10. Choose the correct sentence among the following options:
- a) I hadn't tasted the recipe now. b) His ideas are bright than his teacher's.
c) Noel runs 12 km every day to train himself for a marathon. d) Can't you know what I am saying?
11. Which of the following is an assertive sentence?
- a) Keep your shoes on the stand. b) You are not allowed to talk.
c) Can you help me in this situation? d) Oh, God! I can't believe this.
12. **Choose the correct contraction for the sentence:** She would have finished her homework on time.
- a) She'd've finished her homework on time. b) She would've finished her homework on time.
c) She'd of finished her homework on time. d) She would'v finished her homework on time.
13. **Identify the correct combination of phrases in the sentence below:**
The young boy in the red shirt was running quickly across the playground.
- a) The young boy in the red shirt → Noun Phrase,
was running quickly → Verb Phrase,
across the playground → Prepositional Phrase
- b) The young boy → Prepositional Phrase,
was running quickly → Noun Phrase,
across the playground → Verb Phrase
- c) The young boy in the red shirt → Verb Phrase,
was running quickly → Noun Phrase,
across the playground → Prepositional Phrase
- d) The young boy → Noun Phrase,
in the red shirt → Verb Phrase,
was running quickly across the playground → Prepositional Phrase
14. Read the sentence carefully:
The facilities at the small village school were a far cry from those at the modern city school.
How is the idiom '**far cry from**' used in this sentence?
- a) To show that the two schools are very similar
b) To show that the two schools are very different
c) To show that the village school is better than the city school
d) To show that the schools are both modern
15. Rearrange the following jumbled words to make a meaningful sentence:
People / easily open / how to make / in their lives / who know / the best use / the doors of success / of every moment.
- a) People who know how to make of every moment the best use easily open the doors of success in their lives.
b) People who know how to make the best use of every moment easily open the doors of success in their lives.
c) People easily open the doors of success who know in their lives how to make the best use of every moment.
d) People who know how to make the best use easily open every moment of the doors of success in their lives.
16. Choose the pair of words that are the closest in meaning:
- a) Assist – Help b) Demand – Request c) End – Finish d) See – Watch

17. Identify the dependent and independent clause(s) in the sentence below:
Although Mira had completed her homework, she decided to revise again because the test was important.
- Although Mira had completed her homework → Independent; she decided to revise again → Dependent; because the test was important → Dependent.
 - Although Mira had completed her homework → Dependent; she decided to revise again → Independent; because the test was important → Dependent.
 - Although Mira had completed her homework → Dependent; she decided to revise again → Dependent; because the test was important → Independent.
 - Both Although Mira had completed her homework and because the test was important are independent, while she decided to revise again is dependent.
18. Choose the **best conjunction** to combine the two sentences into one meaningful sentence:
I drove to work. I sang in the car.
- I drove to work because I sang in the car.
 - I drove to work while I sang in the car.
 - I drove to work although I sang in the car.
 - I drove to work when I sang in the car.
19. Read the sentence below. It is written as a normal sentence (not as dialogue). How many punctuation marks are needed to make it correct?
Oh no I forgot to bring my notebook can you please lend me yours
- 2
 - 3
 - 4
 - 5
20. Choose the most suitable word/phrase to complete the sentence:
The committee decided to look the matter before giving their final verdict.
- at
 - into
 - over
 - onto
21. The time shown on the clock is 6 PM. What is the angle made by minute hand and hour hand?
- 0°
 - 60°
 - 90°
 - 180°
22. How many numbers between 300 and 500 are divisible by 7?
- 27
 - 28
 - 29
 - 30
23. The side of a square is increased by 3 times. Find the increase percentage in its area.
- 300%
 - 900%
 - 800%
 - 700%
24. $60 \div (12 + 3 \times 6 - 20 \div 2) = \text{-----}$
- 2
 - 3
 - 2.5
 - 4
25. If $\frac{a}{3} = \frac{b}{4} = \frac{c}{7}$, then $\frac{(a+b+c)}{c} = \text{-----}$.
- 7
 - 2
 - $\frac{1}{2}$
 - $\frac{1}{7}$
26. The number of marble slabs of size 20cm X 20cm required to pave the floor of a square room of side 3 metres is :
- 100
 - 150
 - 225
 - 250
27. Which is the smallest 6-digit number divisible by 111?
- 100121
 - 110011
 - 100111
 - 100011
28. The total number of edges + vertices in a cube is —
- 18
 - 19
 - 20
 - 21
29. If $24 \times 15 = 360$, then $2.4 \times 1.5 = ?$
- 3.6
 - 36
 - 0.36
 - 360
30. The sum of two consecutive even numbers is 130. What are the numbers?
- 64 and 66
 - 62 and 64
 - 60 and 70
 - 63 and 65
31. A man saves ₹2,400 per month. How much will he save in 1 year?
- ₹24,400
 - ₹28,800
 - ₹29,000
 - ₹30,000

32. A number is doubled and 9 is added. The result is 31. What is the number?
a) 10 b) 11 c) 12 d) 13
33. A car travels 240 km in 4 hours. Its speed is —
a) 40 km/h b) 50 km/h c) 60 km/h d) 70 km/h
34. A quadrilateral with all sides equal but no right angle is —
a) Square b) Rhombus c) Rectangle d) Trapezium
35. The marks of 5 students are 80, 85, 90, 95, and 100. The average marks = ?
a) 88 b) 90 c) 92 d) 93
36. In a bar graph showing fruits sold, if the bar for apples is 3 cm and for oranges is 5 cm, what is the ratio of apples to oranges sold?
a) 3 : 5 b) 5 : 3 c) 2 : 3 d) 1 : 2
37. The area of a square is 49 cm². Its perimeter is —
a) 21 cm b) 24 cm c) 28 cm d) 36 cm
38. Convert 2.75 into a fraction in simplest form.
a) $\frac{11}{4}$ b) $\frac{5}{2}$ c) $\frac{3}{4}$ d) $\frac{7}{4}$
39. The sum of angles of a quadrilateral is —
a) 90° b) 180° c) 270° d) 360°
40. Simplify: $\frac{3}{4} + \frac{2}{3} = ?$
a) $\frac{17}{12}$ b) $\frac{13}{12}$ c) $\frac{5}{7}$ d) $\frac{7}{12}$
41. A mixture of sand, salt, and iron filings is given. What is the most efficient method to separate these components?
a) Magnetic separation, filtration, and evaporation
b) Filtration, evaporation, and magnetic separation
c) Evaporation, magnetic separation, and filtration
d) Decantation, filtration, and magnetic separation
42. Which method would you use to separate a mixture of two liquids with different boiling points?
a) Filtration b) Distillation c) Crystallization d) Chromatography
43. What type of change occurs when iron rusts?
a) Physical change b) Chemical change c) Reversible change d) Periodic change
44. Which of the following is an example of a physical change?
a) Burning of wood b) Rusting of iron c) Melting of ice d) Digestion of food
45. What is the property of a magnet that allows it to attract certain materials?
a) Magnetism b) Electromagnetism c) Gravity d) Friction
46. Which of the following materials is ferromagnetic?
a) Iron b) Copper c) Aluminum d) Wood
47. What is the primary function of the skeletal system in human movement?
a) Circulation b) Movement and locomotion
c) Control and coordination d) Sensation and perception
48. Which type of muscle is responsible for voluntary movements?
a) Skeletal muscle b) Smooth muscle c) Cardiac muscle d) Adipose tissue
49. What is the primary function of carbohydrates in the human body?
a) Building and repairing tissues b) Providing energy
c) Regulating body functions d) Supporting immune function

50. Which nutrient is essential for the production of hemoglobin in red blood cells?
 a) Iron b) Calcium c) Vitamin C d) Potassium
51. What happens to air when it is heated?
 a) It contracts b) It expands c) It remains the same d) It disappears
52. Which of the following materials is a metalloid?
 a) Silicon b) Carbon c) Oxygen d) Nitrogen
53. What is the phenomenon that occurs when light passes from one medium to another?
 a) Reflection b) Refraction c) Diffraction d) Interference
54. Which type of mirror is used in a periscope?
 a) Plane mirror b) Concave mirror c) Convex mirror d) Spherical mirror
55. What is the function of a fuse in an electric circuit?
 a) To increase the voltage b) To decrease the resistance
 c) To protect the circuit from overloading d) To control the current
56. Which device is employed to quantify the flow of electric charge in a circuit?
 a) Ammeter b) Voltmeter c) Ohmmeter d) Multimeter
57. What is the SI unit of acceleration?
 a) m/s b) m/s² c) km/h d) cm/s
58. An object is moving with a constant velocity. What is its acceleration?
 a) Positive b) Negative c) Zero d) Increasing
59. . Which substance is commonly used as a preservative in food products?
 a) Sodium chloride b) Sodium benzoate c) Citric acid d) Sugar
60. Which kingdom includes organisms that are eukaryotic and heterotrophic?
 a) Monera b) Protista c) Fungi d) Animalia
61. Which of the following is a literary source of history?
 a) Tools b) Inscriptions c) Coins d) Ancient books
62. Which is a better way to promote equality in schools?
 a) Give more marks to boys b) Separate sports for girls only
 c) Equal opportunities for both boys and girls d) Allow only boys to speak
63. In a school, students speak different languages at home — Hindi, Tamil, Bengali, and Marathi — but they all sing the National Anthem together every morning. What value does this show?
 a) Religious diversity b) Unity in diversity c) Social inequality d) Lack of discipline
64. Ravi marks 0° latitude on his globe. Which line is this?
 a) Prime Meridian b) Tropic of Cancer c) Equator d) Arctic Circle
65. A city has more than 10 lakh people. Which local body governs it?
 a) Municipal Council b) Gram Panchayat c) Municipal Corporation d) District Board
66. A scientist is studying penguins and ice sheets. On which continent is she most likely working?
 a) North America b) Antarctica c) Europe d) Africa
67. The world's deepest ocean is—
 a) Arctic Ocean b) Pacific Ocean c) Atlantic Ocean d) Indian Ocean
68. How does the Indian Constitution promote unity in diversity?
 a) By forcing everyone to follow one culture b) By giving everyone equal rights and freedom
 c) By dividing people on religion d) By supporting only one language

69. Which material was first used by humans to make tools?
 a) Bronze b) Stone c) Iron d) Copper
70. The Indus Valley Civilization developed mainly in which present-day countries?
 a) India and Nepal b) India and Pakistan c) India and Afghanistan d) India and Bangladesh
71. Which of the following statements best explains why rivers were called the "cradles of civilization"?
 a) They provided natural protection b) They supported fertile soil, farming, and trade
 c) They were easy to cross d) They were used only for fishing
72. The total number of States and Union Territories in India (as of 2024) is..
 a) 28 States and 8 Union Territories b) 29 States and 7 Union Territories
 c) 26 States and 9 Union Territories d) 30 States and 6 Union Territories
73. You are asked to create a model of an ancient city. What would you include?
 a) Skyscrapers b) Temples, wells, and granaries c) Shopping malls d) Flyovers
74. You are given a map. Which tool will help you find directions?
 a) Legend b) B. Scale c) Compass d) Grid
75. If coal is overused, what could be a good alternative energy source?
 a) Petrol b) Natural gas c) Solar power d) Diesel
76. The Vedas are related to which historical period?
 a) Gupta Empire b) Mughal Empire c) British Era d) Vedic Age
77. What was the main reason ancient traders travelled to other countries?
 a) To become kings b) To trade goods like spices and silk
 c) To conquer land d) To spread religion
78. Which feature best defines a civilization?
 a) Nomadic lifestyle b) Settled life with organized cities and writing system
 c) Hunting and gathering d) Only farming
79. What was the most important discovery of early humans?
 a) Wheel b) Fire c) Iron d) Paper
80. Why should we conserve natural resources?
 a) To ensure they last for future generations b) Because they are unlimited
 c) To waste more energy d) To pollute the environment
81. What will come next in the given sequence?
 64, 49, 36, 25
 a) 10 b) 15 c) 18 d) 16
82. If 17th of a month is Sunday then which day of the week will be coming 5 times in that month?
 a) Tuesday b) Monday c) Saturday d) Thursday
83. If '+' is denoted as 'x', '-' as '/', 'x' as '-' and '/' as '+'. What is the value of
 $10 + 5 - 3 / 1 \times 7 = \text{-----}$.
 a) $\frac{32}{3}$ b) -6 c) $\frac{-50}{3}$ d) 0
84. Ravi told Ram, "yesterday I defeated the only brother of the daughter of my grandmother". Whom did Ravi defeat?
 a) Father b) Brother c) Son d) Father –in –law
85. If 3rd December, 1990 is Sunday. What day is 3rd January, 1991?
 a) Tuesday b) Wednesday c) Thursday d) Friday
86. CAT : DDY :: BIG : ?
 a) CLL b) CLM c) CML d) CEP

87. If SHARP is coded as 58034 and PUSH as 4658, then RUSH is coded as
 a) 3568 b) 3658 c) 3685 d) 3583
88. Choose the odd one out :
 a) Brother b) Niece c) Cousin d) Uncle
89. Complete the series : U, O, I, _____, _____
 a) E, A b) C, A c) A, E d) A, C
90. Select that combination of numbers in which letters arranged accordingly form a meaningful word.
A C P E T S
1 2 3 4 5 6
 a) 163425 b) 234156 c) 563412 d) 653421
91. The Great Wall of China was mainly built to —
 a) Mark China's boundary b) Protect from northern invaders
 c) Improve transport d) Attract tourists
92. Who was the first person to step on the Moon?
 a) Yuri Gagarin b) Neil Armstrong c) Edwin Aldrin d) Rakesh Sharma
93. "The Bard of Avon" refers to —
 a) Charles Dickens b) William Shakespeare c) Mark Twain d) Robert Frost
94. The word autobiography means —
 a) A life story written by another person b) A short story
 c) A life story written by oneself d) A play based on history
95. Vitamin C deficiency causes —
 a) Rickets b) Scurvy c) Beriberi d) Night blindness
96. Which ocean is the largest?
 a) Indian Ocean b) Pacific Ocean c) Atlantic Ocean d) Arctic Ocean
97. The Grammy Awards are presented for excellence in —
 a) Acting b) Music c) Sports d) Writing
98. Which of the following is a non-flowering plant?
 a) Rose b) Mango c) Fern d) Hibiscus
99. Who is known as the "Master Blaster" of Indian cricket?
 a) Virat Kohli b) M.S. Dhoni c) Sachin Tendulkar d) Kapil Dev
100. P.V. Sindhu is associated with which sport?
 a) Tennis b) Badminton c) Table Tennis d) Squash
