

Name

Roll No.:

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each

Read the given passage and answer the questions (1-3) that follow:

Golden apple snails (*Pomacea canaliculata*), native to South America, are notorious invaders, thriving in diverse environments. While studying their resilience, researcher Alice Accorsi made a surprising discovery: these snails can regenerate a complete, functional eye within a few months of losing one.

Scientists have long known that some animals can regrow tails, limbs, or even heads. Yet the apple snail's ability is remarkable because its eyes are camera-like, resembling human eyes with a lens, cornea, and retina. This similarity makes them excellent models for understanding how complex eyes develop and repair themselves. Such insights could, in the future, inspire treatments for eye diseases like macular degeneration.

Accorsi, now at the University of California, Davis, went a step further. By switching off a key gene needed for eye growth, she found that the snails failed to develop eyes and could not forage for food, though they survived when hand-fed. This highlighted the role of such genes not only in vision but possibly in brain development. Importantly, both humans and snails rely on similar genes for eye growth.

The real challenge lies in understanding how snails "switch on" regeneration. Researchers suspect humans may possess similar genetic controls, though inactive. If scientists can decode this molecular "music score" of regeneration, they may eventually awaken the same potential in people.

Other experts, however, caution that while this research is inspiring, medical applications may take decades. Regeneration in humans is far more complex, involving not just cells but also the nervous system, immune responses, and long-term integration with the brain. Still, even if the journey is long, studies like these provide essential stepping stones toward therapies once thought impossible.

As one scientist noted, Accorsi's breakthrough is like "landing on the moon." The next step is building the "space station"—a foundation for therapies that could help humans regain sight. While cures are far away, the discovery shines as a beacon of possibility, proving that nature may already hold the instructions—we just need the right conductor to orchestrate them.

1. Which detail from the passage **BEST** explains why apple snails may help scientists study human vision?
 - A) Their eyes contain lenses, corneas, and retinas like human eyes.
 - B) They are among the most invasive species in the world.
 - C) They can survive even if they are hand-fed without eyes.
 - D) They thrive in diverse environments such as aquariums and rivers.
2. Which of the following statements is **NOT** supported by the passage?
 - A) Apple snails share structural similarities in their eyes with humans, such as lenses and retinas.
 - B) Disabling certain genes in apple snails revealed how vision and brain development might be linked.
 - C) Apple snails could not survive to adulthood after losing their vision, even when hand-fed.
 - D) The discovery suggests potential insights into treating human blindness in the future.
3. In the phrase "**the discovery shines as a beacon of possibility**," the word "**beacon**" conveys the idea of:
 - A) A discouraging obstacle
 - B) A hopeful signal
 - C) A misleading distraction
 - D) A distant and unreachable dream

Read the given poem and answer the questions (Q 4-6) that follow:

Under the spreading chestnut-tree
the village smithy stands.
The smith, a mighty man is he,
with large and sinewy hands.
His brow is wet with honest sweat,

he earns whate'er he can.
 Week in, week out, from morn till night,
 you can hear his bellows blow,
 swinging his heavy sledge
 with a measured beat and slow.
 And children coming home from school
 love to see the flaming forge.
 He goes on Sunday to the church
 and hears his daughter's voice,
 singing in the village choir,
 and it makes his heart rejoice.
 He thinks of her mother's voice
 and wipes a tear out of his eyes.
 Toiling, rejoicing, sorrowing,
 onward through life he goes.
 Something attempted, something done,
 has earned a night's repose.
 Thus at the flaming forge of life
 our fortunes must be wrought.

4. Which of the following **BEST** captures both the central idea and tone of the poem?
 - A) The poem glorifies the physical strength of the blacksmith, using an admiring yet detached tone.
 - B) The poem celebrates honest labor and its moral dignity, expressed in a reverent and reflective tone.
 - C) The poem critiques the hardships of rural tradesmen in a bitter and sorrowful tone.
 - D) The poem emphasizes the fleeting nature of joy through an ironic and skeptical tone.
5. The word **sinewy** in the line "**with large and sinewy hands**" most likely means:
 - A) Lean but strong and resilient
 - B) Weak and lacking firmness
 - C) Elegant and refined in appearance
 - D) Thin and brittle like a twig
6. Which combination of **literary devices** is **MOST** clearly present in the lines "*Thus at the flaming forge of life / our fortunes must be wrought*"?
 - A) Simile and Personification
 - B) Alliteration and Metaphor
 - C) Hyperbole and Irony
 - D) Symbolism and Onomatopoeia
7. "*For book lovers, a hidden library filled with rare manuscripts is catnip.*"
 Here, the figurative use of **catnip** suggests—
 - A) Something irresistibly attractive, like a magnet for one's interest
 - B) A literal herb used as a symbol of tradition
 - C) A mild hobby or occasional distraction
 - D) A confusing puzzle that frustrates curiosity
8. Which of the following sentences shows the correct **subject-verb agreement** according to standard grammar rules?
 - A) Neither of the solutions appear convincing to the committee.
 - B) The number of applicants for the post is steadily increasing each year.
 - C) A bouquet of fresh roses were placed on the teacher's desk.
 - D) The jury are divided in their opinions on the final verdict.
9. Read the following sentence and choose the most appropriate meaning of the idiom "**give the benefit of the doubt**":
"Even though Rahul was late again, his friend decided to give him the benefit of the doubt."
 - A) To excuse someone completely without any reason.
 - B) To punish someone lightly instead of harshly.
 - C) To believe or trust someone even when not fully sure of their honesty.
 - D) To ignore repeated mistakes and stay silent.
10. Choose the correct pair of **discourse markers** to complete the sentence appropriately:
 The scientist's theory was initially dismissed by many colleagues, _____ new evidence strongly supported it. _____, his research won international recognition.
 - A) although / Nevertheless
 - B) however / Eventually
 - C) despite / Moreover
 - D) even though / In fact

11. Which of the following is the correct **passive voice transformation** of the sentence:
"The chairperson called the meeting to a close."
 A) The meeting was called to a close by the chairperson.
 B) The meeting was being called to a close by the chairperson.
 C) The meeting had been called to a close by the meeting.
 D) The meeting had been called close by the chairperson.
12. In the sentence below, which option correctly identifies the verbals?
"Walking through the park at dawn, she decided to capture the moment by painting the rising sun."
 A) Walking – Participle; to capture – Infinitive; painting – Gerund
 B) Walking – Gerund; to capture – Infinitive; painting – Participle
 C) Walking – Infinitive; to capture – Participle; painting – Gerund
 D) Walking – Participle; to capture – Gerund; painting – Infinitive
13. What is the synonym of the word '**VIVACIOUS**'?
 A) Lively B) Sombre C) Placid D) Melancholic
14. Which of the following sentences uses the **preposition** correctly?
 A) Would you like to come with me? B) Where did you graduate from?
 C) He lives near by the stream. D) I left my glasses besides my book.
15. Choose the **correct sentence**:
 A) She finished the assignment faster than anyone else.
 B) This is the more easiest recipe on the website.
 C) Of the two friends, Ramesh is the most taller.
 D) He is the most unique player in the team.
16. Change the following sentence into **indirect speech**:
"We had already eaten before we arrived, so we didn't taste the food," said Simon.
 A) Simon said that they had already eaten before they arrived, so they didn't taste the food.
 B) Simon said that they had already eaten before they arrived, so they hadn't tasted the food.
 C) Simon said they already ate before they arrived, so they didn't taste the food.
 D) Simon said that they had already eaten before they arrived, so they wouldn't taste the food.
17. Read the following sentences and the identifications of the verbs. How many are correctly identified as **transitive (T)** or **intransitive (I)**?
 i) She is considering joining a new club. (T)
 ii) The committee met to discuss the proposal. (I)
 iii) He sleeps peacefully after long walks. (T)
 iv) They agreed to postpone the meeting. (T)
 v) The baby cried loudly all night. (I)
 A) i), ii), and iii) only B) i), iv), and v) only C) ii) and v) only D) i) and iv) only
18. Identify the **clause** used in the sentence: '*That the museum cancelled the lecture disappoints me.*'
 A) Adverb clause B) Adjective clause C) Noun clause D) Relative clause
19. Identify the sentence in which **punctuation** is used correctly:
 A) "I can't believe it" she exclaimed; "This is amazing!"
 B) I bought apples, oranges, and; bananas from the market.
 C) My brother's friend, who lives in Delhi, is visiting us tomorrow.
 D) She said, "I'll see you at the park", and left immediately.
20. Which sentence contains a verb that is correctly identified as an **auxiliary verb**?
 A) She has written three essays for her literature class.
 B) The children playing in the park were laughing loudly.
 C) He enjoys reading books about history every evening.
 D) The sun rises in the east and sets in the west.
21. The number $\sqrt{5} + \sqrt{7}$ is:
 a) Rational b) Irrational c) Integer d) Whole number
22. If $a:b=2:3$ and $b:c=4:5$, then $a:b:c=?$
 a) 2 : 3 : 5 b) 4 : 6 : 5 c) 6 : 8 : 10 d) 8 : 12 : 15

23. If $l_1 \parallel l_2$ what is the value of x ?

- a) 90°
- b) 85°
- c) 75°
- d) 70°

24. In $\triangle ABC$, if median $BE =$ median CF then triangle is:

- a) Equilateral
- b) Isosceles
- c) Scalene
- d) None of these

25. If two circles touch externally, then the distance between their centers is equal to:

- a) Sum of their radii
- b) Difference of their radii
- c) Product of their radii
- d) Average of their radii

26. If $x = 2 + \sqrt{3}$, then the value of $\frac{x^3+1}{x^3}$ is:

- a) 14
- b) 26
- c) 52
- d) 28

27. Simplify: $(2x+3)^2 - (2x-3)^2$

- a) $12x$
- b) $24x$
- c) $18x$
- d) $36x$

28. A sum doubles itself in 10 years at simple interest. The rate of interest per annum is:

- a) 5%
- b) 8%
- c) 10%
- d) 12%

29. The mean marks are:

Marks	10	20	30	40	50
No. of students	2	4	6	5	3

- a) 30.5
- b) 31.5
- c) 33
- d) 36.5

30. A chord of a circle is equal to the radius of the circle. The angle subtended by the chord at a point on the minor arc is

- a) 150°
- b) 60°
- c) 30°
- d) 120°

31. The diagonals of a square are:

- a) Equal but not perpendicular
- b) Unequal but perpendicular
- c) Equal and perpendicular
- d) Unequal and bisect each other

32. If the radius of a cylinder is doubled and its height is tripled, the new curved surface area becomes:

- a) 3 times
- b) 4 times
- c) 5 times
- d) 6 times

33. The point of intersection of lines $2x + y = 8$ and $x - y = 1$ is:

- a) (3, 2)
- b) (2, 3)
- c) (3, 1)
- d) (2, 2)

34. D, E, F are mid points of the sides BC, CA and AB respectively of $\triangle ABC$, then $\triangle DEF$ is congruent to triangle?

- a) ABC
- b) AEF
- c) BFD, CDE
- d) AEF, FBD, EDC

35. If the radius of a sphere is halved, its volume becomes:

- a) $\frac{1}{2}$ of original
- b) $\frac{1}{4}$ of original
- c) $\frac{1}{8}$ of original
- d) $\frac{1}{6}$ of original

36. In a class, the mean weight of 10 students is 45 kg. If 60 kg is included, the approx. new mean weight is:

- a) 45.5 kg
- b) 46 kg
- c) 47 kg
- d) 48 kg

37. If $a+b+c=0$, then $a^3+b^3+c^3=$?

- a) $3abc$
- b) $-3abc$
- c) 0
- d) $a + b + c$

38. The measure of each interior angle of a regular hexagon is:

- a) 120°
- b) 135°
- c) 140°
- d) 150°

39. The area of triangle formed by the lines $x=0$, $y=0$, $x+y = 4$ is:

- a) 4 sq units
- b) 6 sq units
- c) 8 sq units
- d) 16 sq units

40. The sum of opposite angles of a cyclic quadrilateral is always:
 a) 90° b) 120° c) 150° d) 180°
41. What happens to the density of a substance when it changes from solid to liquid state?
 a) Increases b) Decreases c) Remains the same d) Depends on the substance
42. What is the unit of energy in the International System of Units (SI)?
 a) Joule b) Newton c) Watt d) Pascal
43. A machine lifts a load of 100 N to a height of 5 m. How much work is done?
 a) 50 J b) 100 J c) 500 J d) 1000 J
44. Which form of energy is associated with the motion of particles in a substance?
 a) Kinetic energy b) Potential energy c) Thermal energy d) Electrical energy
45. What type of friction occurs when an object is stationary and a force is applied to it?
 a) Static friction b) Kinetic friction c) Rolling friction d) Fluid friction
46. A force of 20 N acts on an object, causing it to accelerate at 4 m/s^2 . What is the mass of the object?
 a) 5 kg b) 10 kg c) 20 kg d) 40 kg
47. Which force opposes the motion of an object through a fluid?
 a) Gravity b) Normal force c) Tension d) Drag
48. What is the force that attracts objects with mass towards each other?
 a) Gravity b) Electromagnetism c) Strong nuclear force d) Weak nuclear force
49. The gravitational force between two objects depends on their:
 a) Masses and distance b) Velocities and distance
 c) Accelerations and distance d) Energies and distance
50. What is the acceleration due to gravity on Earth's surface?
 a) 9.8 m/s^2 b) 10 m/s^2 c) 11.2 m/s^2 d) 12.5 m/s^2
51. CNG is a liquified gas, but as it flows out the liquid changes to gaseous state. Which property is associated with this?
 a) Rigidity lowers b) Temperature lowers c) Pressure increases d) Pressure decreases
52. A car accelerates from 0 to 30 m/s in 5 seconds. What is its acceleration?
 a) 5 m/s^2 b) 6 m/s^2 c) 10 m/s^2 d) 15 m/s^2
53. Which law relates the force applied to an object and its resulting acceleration?
 a) Newton's first law b) Newton's second law
 c) Newton's third law d) Law of conservation of momentum
54. Which method of solid waste disposal involves burning waste materials?
 a) Landfilling b) Composting c) Recycling d) Incineration
55. What is the main function of the cell membrane?
 a) To control the cell's activities
 b) To provide structure and support
 c) To regulate the movement of materials in and out of the cell
 d) To produce energy for the cell
56. What is the primary function of chromoplasts, a type of plastid?
 a) To synthesize proteins
 b) To store starch and pigments
 c) To produce chlorophyll for photosynthesis
 d) To impart color to fruits and flowers through pigment synthesis
57. What is the most effective way to manage weeds in a crop field, considering the development of herbicide resistance?
 a) Continuous use of a single herbicide b) Alternating between different herbicides
 c) Integrated Weed Management (IWM) approach d) Using crop rotation alone
58. What is the significance of crossing over during meiosis?
 a) It increases genetic variation by exchanging genetic material between homologous chromosomes
 b) It reduces genetic variation by eliminating genes
 c) It ensures that daughter cells are identical to parent cells
 d) It occurs only in somatic cells

59. What is the primary difference between sexual and asexual reproduction?
- Sexual reproduction produces more offspring
 - Asexual reproduction involves two parents
 - Sexual reproduction involves the fusion of gametes, resulting in genetic variation
 - Asexual reproduction is slower than sexual reproduction
60. **Case Study:** A city is experiencing a significant increase in solid waste generation, leading to overflowing landfills and environmental concerns. The city council is considering implementing a new solid waste management plan.
- Question :** What would be the most effective approach for the city to manage its solid waste, considering the need to reduce landfill waste, conserve natural resources, and minimize environmental impacts?
- Implementing a single-stream recycling program
 - Increasing the number of landfills
 - Implementing a waste-to-energy incineration program
 - Adopting a comprehensive waste management plan that includes reduction, reuse, recycling, and composting
61. The wind blowing in the Northern Plains during summers is known as
- Kaal Baisakhi.
 - Loo
 - Trade winds.
 - None of the above.
62. What is the total length of India's coastal line?
- About 7,516 km
 - About 4,516 km
 - About 6,500 km.
 - About 8,516 km
63. Who am I?
I come all the way from Tibet, but the moment I step into Arunachal Pradesh, I get a brand-new name — Dihang. Later, I spread my charm all over Assam and beyond.
Who am I?
- The Ganga.
 - The Brahmaputra
 - The Indus.
 - The Kaveri
64. Ramesh, a young engineer from Uttar Pradesh, moved to Bangalore in search of better job opportunities. He found a well-paying job in a multinational company and settled down in the city. What term describes Ramesh's movement from Uttar Pradesh to Bangalore?
- Domestic migration
 - Occupational migration
 - Internal migration
 - None of the above.
65. Complete the series:
Alluvial Plains : Alluvial rocks :: Peninsular Plateau : _____
- Sedimentary and metamorphic rocks.
 - Alluvial and sedimentary rocks
 - Igneous and metamorphic rocks.
 - Sedimentary and Alluvial
66. Assertion (A): The Reign of Terror was a period of severe political repression during the French Revolution.
Reason (R): Maximilian Robespierre wanted to protect the Republic from its 'enemies'.
- Both A and R are true and R is the correct explanation of A.
 - Both A and R are true but R is not the correct explanation of A.
 - A is true but R is false.
 - A is false but R is true.
67. I rocked a serious moustache, loved five-year plans more than five-star meals, and ruled the USSR with an iron fist after Lenin. Look at my picture and guess — who am I?

- Karl Marx
- Vladimir Lenin
- Joseph Stalin.
- Leon Trotsky

68. Find out the INCORRECT statement/statements
- The British Government used Mahogany wood to build ships for royal Navy.
 - Search parties were sent from England to India for forest resources.
 - Natural forests were cleared to cultivate Tea, Coffee and Rubber trees.
 - The British thought that forests were productive, useful land
- Options
- 1 and 4.
 - 2 and 3
 - 3 and 4.
 - 2 and 4

69. Breaking News – 1933 Edition!

"The German Parliament passes a shocking new law! With just one vote, the Chancellor can now make laws without needing approval from the Reichstag. Critics fear this could turn democracy into dictatorship!"
What is this headline referring to?

- a) To give Lenin constitutional rights
- b) To give Hitler dictatorial powers
- c) To establish democracy in France
- d) To create new jobs in England

70. Examine the cartoon carefully

This picture is related to which of the following?

- a) Public distribution system
- c) Famine
- b) Election.
- d) None of the above

71. **A. Assertion:** Democracy provides a better method to deal with differences and conflicts.

R. Reason: Democracy is all about Political competition and power play.

- a) Both A and R are true and R is the correct explanation of A
- b) Both A and R are true but R is not the correct explanation of A
- c) A is true R is false.
- d) A is false R is true.

72. Treasure Hunt – Human Capital Edition

You've discovered a secret formula for a country's real wealth – but it's not gold, oil, or machines. It's the skills, knowledge, and talent of its people! Which of the following is the real treasure that builds this "human capital"?

- a) Building factories and industries.
- b) Training and education of individuals
- c) Construction of roads and infrastructure.
- d) Exploration of natural resources

73. Statement (A): People with BPL ration cards receive essential commodities at subsidised rates.

Reason (R): They are issued to people whose earnings are less than the poverty line.

Choose the correct option:

- a) Both A and R are true, and R is the correct explanation of A.
- b) Both A and R are true, but R is not the correct explanation of A.
- c) A is true, but R is false.
- d) A is false, but R is true.

74. I transformed farming in India with high-yield seeds, modern machinery, and better techniques. I'm not about trees, water, or hospitals... Who am I?

Options:

- A) Afforestation
- B) Green Revolution
- C) Water Conservation
- D) Health Movement

75. India needs to maintain a buffer stock of food grains to ensure everyone gets enough. Which organization takes care of this?

- A) Food Corporation of India (FCI)
- B) World Trade Organization (WTO)
- C) National Food Security Act (NFSA)
- D) Indian Council of Agricultural Research (ICAR)

76. Match these guiding values with their meanings.

- A) Sovereign. (i) government will not favour any particular religion
- B) Republic. (ii) People will have supreme right to make decisions without outside Interference
- C) Fraternity. (iii) Head of the state is an elected person
- D) Secular. (iv) There should be a feeling of brotherhood among all the people

Options

- a) A-(iii), B-(i), C-(ii), D-(IV)
- b) A-(ii), B-(iii), C-(iv), D-(i)
- c) A-(i), B-(IV), C-(iii), D-(ii)
- d) A-(IV), B-(iii), C-(i), D-(ii)

77. What is the role of opposition parties in a democratic government?
- To support the ruling party unconditionally
 - To provide constructive criticism and alternative policies
 - To hinder the work of the government
 - To ensure the ruling party remains in power
78. If money in hand is like fuel for a car's daily ride, then a company's machines are like _____ for its long journeys.
- Human capital.
 - Fixed capital
 - Working capital.
 - Physical capital
79. Which of the following statements is not true about small-scale manufacturing in villages?
- Farmers engage in it to supplement their income
 - Farmers take help of their family members
 - The production is done mostly at home
 - Farmers produce articles for their own use
80. You are visiting a city in India, famous for its forests and mountains, where the Imperial Forest Research Institute was established. Which city are you in?
- Dehradun.
 - Delhi
 - Calcutta.
 - Kanpur
81. If **JANUARY** is written as **JNAYAUR** then **DECEMBER** will be written as :
- DCMEEEBR
 - RBEEMCD
 - DECBEREM
 - None of these
82. Find the value of : $x(x-a)(x-b)(x-c)(x-d)\dots(x-z)$
- $x^n - (a+b+c+d+\dots+z)$
 - $x^2 + ax^3 + bx^4 + \dots$
 - 0
 - cannot be determined
83. A group of friends are sitting in an arrangement- each one at one corner of a hexagon. Radha is sitting opposite to Radhesh, Jyotsna is sitting next to Sadhna, Neeta is sitting opposite to Sadhna but not next to Radha, Meena has a person sitting between Radhesh and herself. Who is sitting opposite Jyotsna?
- Neeta
 - Radhesh
 - Meena
 - Sadhna
84. If Thursday was the day after the day before yesterday five days ago. What is the least number of days ago when Sunday was three days before the day after tomorrow?
- Two
 - Three
 - Four
 - Five
85. Select a figure from amongst the Answer Figures which will continue the same series as established by the five Problem Figures.
- Problem Figures: Answer Figures:
-
- (A) (B) (C) (D) (E) (1) (2) (3) (4) (5)
- (1)
 - (3)
 - (5)
 - (4)
86. Which of the following diagrams correctly represents Elephants, Wolves, Animals ?
- -
 -
 -
87. In a row of certain persons, Alex is sitting 285 from the left end and 412 from the right end. Find out the total number of persons in that row?
- 699
 - 698
 - 697
 - 696
88. Complete the series: 3, 6, 18, 72, _____
- 144
 - 216
 - 288
 - 360
89. Ahmed is taller than Salim. Salim is not as tall as Ahmed but taller than Akbar. Sohan too is not as tall as Salim but taller than Akbar. Ben is shorter than Akbar. If they stand in height order then who will be in the middle?
- Salim
 - Akbar
 - Ahmed
 - Sohan
90. If 'A*B' means A is the mother of B; 'AxB' means A is the husband of B, then which of the following equations shows that 'P' is the father of 'Q'?
- $Q*MxP$
 - $P*Q$
 - $Q*P$
 - $PxM*Q$
91. What is the primary function of the press in a democratic society?
- To entertain the public
 - To inform and educate the public
 - To promote government policies
 - To advertise products
92. Who is the Indian batsman who recently scored his 52nd ODI century?
- Rohit Sharma
 - Virat Kohli
 - Shubman Gill
 - KL Rahul

93. Who was awarded the 2025 Nobel Prize in Literature?
a) László Krasznahorkai b) Maria Corina Machado c) John Clarke d) Susumu Kitagawa
94. What is a recent achievement in space exploration?
a) Firefly Aerospace's lunar lander successfully landed on the Moon
b) NASA's Lucy probe discovered a new asteroid
c) SpaceX launched its 100th Starlink satellite
d) The International Space Station was decommissioned
95. Who is the author of the famous novel "Midnight's Children"?
a) Salman Rushdie b) Arundhati Roy
c) Vikram Seth d) Amitav Ghosh
96. What is the ability to express your thoughts, feelings, and opinions in a clear and respectful way called?
a) Assertiveness b) Aggressiveness
c) Passiveness d) Avoidance
97. What is the term for the process of trees absorbing carbon dioxide from the atmosphere, reducing the greenhouse effect?
a) Ozone depletion b) Carbon sequestration
c) Greenhouse effect d) Climate change
98. What is the name of the extinct bird that was native to Mauritius and is known for its distinctive beak?
a) Dodo b) Passenger Pigeon
c) Great Auk d) Moa
99. In which present-day Indian state did the Chipko movement originate in 1973?
a) Himachal Pradesh b) Madhya Pradesh
c) Uttarakhand d) Kerala
100. Which word was selected as the Oxford Word of the Year 2024?
a) AI b) Climate Crisis
c) Pandemic d) Brain rot
