Is pizza one of your favourite foods? If it is, you're not alone. Pizza is a very popular food. Every year, about three billion pizzas are sold in the United States. And kids like pizza more than any other type of food. Why do people love pizza so much? One reason is that pizza is easy to eat. You don't even need a knife or fork. Another reason is that there are many kinds of pizza. So no matter what your taste is, you can find a pizza you like. Pizza is also inexpensive. You can have a very tasty meal without spending a lot of money. And pizza lets you eat several different kinds of food at the same time. The sauce, the crust, the cheese, and the toppings all taste a little different. But they also taste very good together. Pizza has been around for longer than you might think. Ancient Egyptians and Greeks used to eat flat bread topped with olive oil and other things. Early Italians baked bread under hot stones. Then they topped the bread with spices and other ingredients. The pizza we know of began in 1889. It was made by Raffaele Esposito in Naples, Italy, in honor of a visiting king and queen. Many Italians came to the United States during the 1800s. They brought pizza with them. But most people in the United States did not know about pizza. It became popular after World War II. American soldiers ate pizza in Italy. They liked it and wanted more. When they came home from the war they wanted pizza at home. Soon pizza became popular all over the country!
