

MALAPPURAM SAHODAYA APTITUDE TEST 2024-25 DISTRICT LEVEL

Class: +2 PCB

Date: 04/01/2025

Marks: 100

Name of the Student: :.....

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each.

Read the passage given below and find the correct choices for questions 1-5 :

Climate change is one of the most pressing issues of our time. Rising temperatures, melting ice caps, and extreme weather events are all symptoms of a larger problem. The main culprit behind climate change is human activity, particularly the burning of fossil fuels such as coal, oil, and gas. The effects of climate change are far-reaching and devastating. Rising sea levels threaten coastal communities and cities, while droughts and heatwaves affect agriculture and food security. Climate change also has serious implications for human health, from heat stress and respiratory problems to the spread of disease. Despite the challenges, there are steps we can take to mitigate the effects of climate change. Transitioning to renewable energy sources, increasing energy efficiency, and protecting natural carbon sinks like forests are all critical. Governments, businesses, and individuals must work together to address this global problem.

On the basis of your understanding of the passage, answer the following questions given below by choosing the most appropriate option.

1.	What is the author's tone in the passage? A) Optimistic B) Pessimistic C) Neutral D) Sarcastic
2.	According to the passage, what can be done to mitigate the effects of climate change? A) Transitioning to renewable energy sources B) Increasing energy efficiency C) Protecting natural carbon sinks D) All of the above
3.	What is the author's purpose in writing the passage? A) To persuade readers to take action on climate change B) To inform readers about the effects of climate change C) To entertain readers with a story about climate change D) To analyze the economic impact of climate change
4.	Which of the following sentences best summarizes the main idea of the passage? A) Climate change is a natural phenomenon that cannot be stopped. B) Human activity is the main cause of climate change. C) The effects of climate change are limited to rising temperatures. D) Climate change can be mitigated through individual actions.
5.	What does the word "devastating" mean? A) Causing great damage or destruction. B) Causing minor damage or destruction. C) Having no impact or effect. D) Having a positive impact or effect.

6.	Choose the correct meaning of the idiom from the given choices: To have an axe to grind A) A private end to serve B) To fail to arouse interest C) Personal reason or motivation for doing something. D) To work for both sides.
7.	Identify the literary device: Commencement of words with the same sound. A) Pun B) Alliteration C) Transferred epithet D) Oxymoron.
8.	Which term best describes a sad song. A) Ditty B) Knell C) Dirge D) Lay.
9.	Our task had been completed before sunset. Select the suitable active voice of the above statement. A) We completed our task before sunset. B) We have completed our task before sunset. C) We complete our task before sunset. D) We had completed our task before sunset.
10.	Has anybody answered your question? Select the suitable passive voice of the above statement. A) Your question has been answered? B) Anybody has answered your question? C) Has your question been answered? D) Have you answered your question?
11.	Choose the correct option from the given choices I said to him, " Why are you working so hard?" A) I asked him why he was working so hard. B) I asked him why was he working so hard. C) I asked him why had he been working so hard. D) I asked him why he had been working so hard.
12.	Fill in the blank with correct preposition. That child died _____ heavy fever. A) at B) for C) of D) with.
13.	Select the pair which has the same relationship AFTER: BEFORE A) First: Second B) Present: Past C) Contemporary: Historic D) Successor: Predecessor
14.	Choose the correct form of the verb from the given choices: If they _____ next to each other on the plane, they wouldn't have got married. A) hadn't sat B) had sat C) sat D) didn't sit.
15.	Choose the correct option from the bracket. The cake tasted _____ sweet that I couldn't finish it. A) so B) such C) very D) too
16.	Identify the literary device in this sentence. " My life is a dream " . A) Alliteration B) Simile C) Metaphor D) Personification.
17.	Which dramatic technique involves a character speaking their thoughts aloud directly to the audience, often revealing their inner turmoil.? A) Aside B) Soliloquy C) Monologue D) Dialogue.
18.	A Haiku is a _____ poetic form. A) two- line B) three - line C) four - line D) six - line.

19.	A poem that reflects upon death or loss is _____. A) Epic B) Pastoral Poetry C) Elegy D) Ode.
20.	Which of the following sentences is grammatically correct? A) Me and my friend went to the park. B) My friend and I went to the park. C) I and my friend went to the park. D) My friend and me went to the park.
21.	Choose the correct option from the given choices. Although he was _____, he remained optimistic about the future. A) Wealthy B) Destitute C) Jubilant D) Fortunate
22.	Read the following statements and fill in the gaps using correct question tags. We often go out for dinner on weekends, _____ ? A) Don't we? B) Do we? C) Does we? D) Doesn't we?
23.	Choose the correct meaning of idiom "To face the music " means _____ A) to be greeted rudely. B) to be offered warm hospitality. C) to be on the front seat in a music concert. D) to bear the consequences.
24.	Choose the correct option from the given choices: We _____ off old clothes and bought new ones for Diwali. A) cost B) coast C) caste D) cast
25.	Fill in the blank using the correct form of the verb given in the bracket. By this time next year, I _____ (take) all my exams. A) will take B) will have taken C) have taken D) take.
26.	If the symbols followed by consonants interchange their positions within the group, then which element is third from the right end? B @ C 7 N R % 5 \$ G 6 K M & 4 S # P U 5 A) U B) # C) P D) 5
27.	Gaurav walks 20 metres towards North. He then turns left and walks 40 metres. He again turns left and walks 20 metres. Further, he moves 20 metres after turning to the right. How far is he from his original position? A) 20 metres B) 30 metres C) 50 metres D) 60 metres
28.	 For the picture shown above which one of the following is the correct picture representing reflection with respect to the mirror shown as the dotted line A)  B)  C)  D) 

29.	Which of the four possible options represents the cube in its folded form?  A  B  C  D  E 
30.	What would the 3D shape look like from above?  A) A C) C B) B D) D (A)  (B)  (C)  (D) 
31.	Errata: Books : : Flaws : ? A) Manuscripts B) Metals C) Speech D) Charter
32.	Earthquake is to Tremor as Thunder is to _____. A) Lightning B) Storm C) Roar D) Strike
33.	Paw : Cat :: Hoof : ? A) Lamb B) Elephant C) Lion D) Horse
34.	Look at this series: 14, 28, 20, 40, 32, 64, ... What number should come next? A) 52 B) 56 C) 96 D) 128
35.	Look at this series: 8, 6, 9, 23, 87, ... What number should come next? A) 128 B) 226 C) 324 D) 429
36.	Which of the following diagrams indicates the best relation between Women, Mothers and Engineers ? A)  B)  C)  D) 
37.	Complete the pattern: FAG, GAF, HAI, IAH, _____ A) JAK B) HAL C) HAK D) JAI
38.	DEF, DEF2, DE2F2, _____, D2E2F3 A) DEF3 B) D3EF3 C) D2E3F D) D2E2F2
39.	Play is to actor as concert is to _____ A) Symphony B) Musician C) Piano D) Percussion

40.	Here are some words translated from an artificial language. moolokarn means blue sky wilkospadi means bicycle race moolowilko means blue bicycle Which word could mean "racecar"? A) Wilkozwet B) Spadiwilko C) Moolobreil D) Spadivolo																	
41.	Statements: In a one-day cricket match, the total runs made by a team were 200. Out of these 160 runs were made by spinners. Conclusions: 1. 80% of the team consists of spinners. 2. The opening batsmen were spinners. A) Only conclusion I follows B) Only conclusion II follows C) Either I or II follows D) Neither I nor II follows																	
42.	A, B, C, D and E are sitting on a bench. A is sitting next to B, C is sitting next to D, D is not sitting with E who is on the left end of the bench. C is on the second position from the right. A is to the right of B and E. A and C are sitting together. In which position is A sitting? A) Between B and D B) Between B and C C) Between E and D D) Between C and E																	
43.	If A + B means A is the mother of B; A - B means A is the brother B; A % B means A is the father of B and A x B means A is the sister of B, which of the following shows that P is the maternal uncle of Q? A) Q - N + M x P B) P + S x N - Q C) P - M + N x Q D) Q - S % P																	
44.	If P \$ Q means P is the brother of Q; P # Q means P is the mother of Q; P * Q means P is the daughter of Q in A # B \$ C * D, who is the father? A) D B) B C) C D) Data is inadequate																	
45.	In a certain code 'MISSIONS' is written as 'MSIISNOS'. How is 'ONLINE' written in that code? A) OLNIE B) ONILEN C) NOILEN D) LNOENI																	
46.	In certain code 'FROZEN' is written as 'OFAPSG'. Then how would 'MOLTEN' be written in that code? A) OFPOMN B) OFSMPN C) OFUMPN D) OFUMON																	
47.	Select a suitable figure from the four alternatives that would complete the figure matrix. <table><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr></table> <table><tr><td></td><td></td><td></td><td></td></tr><tr><td>(1)</td><td>(2)</td><td>(3)</td><td>(4)</td></tr></table> A) 1 B) 2 C) 3 D) 4														(1)	(2)	(3)	(4)
(1)	(2)	(3)	(4)															
48.	Select a suitable figure from the four alternatives that would complete the figure matrix. <table><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td></tr></table> <table><tr><td></td><td></td><td></td><td></td></tr><tr><td>(1)</td><td>(2)</td><td>(3)</td><td>(4)</td></tr></table> A) 1 B) 2 C) 3 D) 4														(1)	(2)	(3)	(4)
(1)	(2)	(3)	(4)															

49.	In the following question, find out which of the answer figures (a), (b), (c) and (d) completes the figure matrix? Problem Figure:  Answer Figures:  A) (a) B) (b) C) (c) D) (d)
50.	In the following question, find out which of the answer figures (a), (b), (c) and (d) completes the figure matrix? Problem Figure:  Answer figures:  A) (a) B) (b) C) (c) D) (d)
51.	Three charges $+Q, q, +Q$ are placed respectively, at distance $0, d/2$ and d from the origin, on the x-axis. If the net force experienced by $+Q$ placed at $x=0$ is zero, then value of q is A) $+Q/4$ B) $-Q/2$ C) $+Q/2$ D) $-Q/4$
52.	In an interference experiment the ratio of amplitudes of coherent waves is $(a_1/a_2)=(1/3)$. The ratio of maximum and minimum intensities of fringes will be A) 4 : 1 B) 9 : 1 C) 2 : 1 D) 18 : 1
53.	A magnetic needle of magnetic moment 6.7×10^{-2} Am² and moment of inertia 7.5×10^{-6} kgm² is performing simple harmonic oscillations in a magnetic field of 0.01 T . Time taken for 10 complete oscillations is A) 6.65 s B) 8.89 s C) 6.98 s D) 8.76 s
54.	A parallel plate capacitor has $1\mu\text{F}$ capacitance. One of its two plates is given $+2\mu\text{C}$ charge and the other plate, $+4\mu\text{C}$ charge. The potential difference developed across the capacitor is A) 3 V B) 2 V C) 5 V D) 1 V
55.	Photon of frequency f has a momentum associated with it. If c is the velocity of light, the momentum is A) f/c B) hf/c C. hf/c^2 D. hfc
56.	A convergent doublet of separated lenses, corrected for spherical aberration, has a resultant focal length of 10 cm . The separation between the two lenses is 2 cm . The focal lengths of the component lenses are A) 10cm, 12cm B) 16cm, 18cm C) 12cm, 14cm D) 18cm, 20cm
57.	A nucleus disintegrates into two nuclear parts which have their velocities in the ratio 2:1. The ratio of their nuclear sizes will be A) $2^{1/3}:1$ B) $1:2^{1/3}$ C) $3^{1/2}:1$ D) $1:3^{1/2}$

58.	A coil of 50 turns carrying a current of 2 A in a magnetic field of 0.5 T. The torque acting on the coil is  coil 10 cm 8 cm A) 0.4 Nm clockwise B) 0.8 Nm anticlockwise C) 0.4 Nm anticlockwise D) 0.8 Nm anticlockwise
59.	The shortest wavelength of Paschen series in hydrogen spectrum is 8182. The first member of the Paschen series is nearly A) 13400 B) 15400 C) 16700 D) 18700
60.	Six cells, each of emf 5 V and internal resistance 0.1Ω are connected as shown in Figure. The reading of the ideal voltmeter V is  A) 0 V B) 15 V C) 5 V D) 30 V
61.	Two equal resistances when connected in series to a battery consume electric power of 60 W . If these resistances are now connected in parallel combination to the same battery, the electric power consumed will be A) 30 W B) 60 W C) 120 W D) 240 W
62.	At absolute zero, silicon (si) acts as A) non-metal B) metal C) insulator D) none of these
63.	Two coaxial solenoids are made by winding thin insulated wire over a pipe of cross-sectional area $A=10\text{cm}^2$ and length $=20\text{cm}$. If one of the solenoids has 300 turns and the other 400 turns, their mutual inductance is $\mu_0=4\pi\times10^{-7}\text{TmA}^{-1}$ A) $4.8\pi\times10^{-4}\text{H}$ B) $4.8\pi\times10^{-5}\text{H}$ C) $2.4\pi\times10^{-4}\text{H}$ D) $2.4\pi\times10^{-5}\text{H}$
64.	Assume that a radio station is about 200 km away from your location and the station operates at 972 kHz . How long does it take for an electromagnetic signal to travel from the station to you and how many wave crests does it send out per second A) $555\mu\text{s}$ and 0.972×10^5 crests per second B) $555\mu\text{s}$ and 97.2×10^7 crests per second C) $666\mu\text{s}$ and 9.72×10^5 crests per second D) $666\mu\text{s}$ and 972×10^5 crests per second
65.	The relation between the charge flow ΔQ through the circuit of resistance r and the change in the magnetic flux $\Delta\phi_B$ is A) $\Delta Q = \frac{\Delta\phi_B}{r}$ B) $\Delta Q = \frac{r}{\phi_B}$ C) $\Delta\phi_B = \frac{\Delta Q}{r}$ D) $\Delta\phi_B = \frac{\Delta Q}{r^2}$
66.	In the depression of freezing point experiment A) vapour pressure of the solution is less than that of pure solvent B) vapour pressure of the solution is more than that of pure solvent C) only solute molecules solidify at the freezing point D) only solvent molecules solidify at the freezing point.

	Choose the most appropriate answer from the options given below. A) A only B) B and C only C) A and C only D) A and D only
67.	The equation that is incorrect is A) $(\Delta_m^\circ)_{\text{H}_2\text{O}} = (\Delta_m^\circ)_{\text{HCl}} + (\Delta_m^\circ)_{\text{NaOH}} - (\Delta_m^\circ)_{\text{NaCl}}$ B) $(\Delta_m^\circ)_{\text{NaBr}} - (\Delta_m^\circ)_{\text{NaI}} = (\Delta_m^\circ)_{\text{KBr}} - (\Delta_m^\circ)_{\text{NaBr}}$ C) $(\Delta_m^\circ)_{\text{NaBr}} - (\Delta_m^\circ)_{\text{NaCl}} = (\Delta_m^\circ)_{\text{KBr}} - (\Delta_m^\circ)_{\text{KCl}}$ D) $(\Delta_m^\circ)_{\text{KCl}} - (\Delta_m^\circ)_{\text{NaCl}} = (\Delta_m^\circ)_{\text{KBr}} - (\Delta_m^\circ)_{\text{NaBr}}$
68.	If 50 % of a reaction occurs in 100 second and 75% of the reaction occurs in 200 second, the order of this reaction is A) 1 B) 2 C) zero D) 3
69.	For a reaction of order n, the unit of the rate constant is (a) $\text{mol}^{1-n} \text{L}^{n-1} \text{s}^{-1}$ (b) $\text{mol}^{1-n} \text{L}^{1-n} \text{s}^{-1}$ (c) $\text{mol}^{1-n} \text{L}^{1-n} \text{s}$ (d) $\text{mol}^{1-n} \text{L}^{2n} \text{s}^{-1}$
70.	What is the magnetic moment for Mn 2+ ion? A) 5.92 B.M. B) 2.80 B.M. C) 8.95 B.M. D) 9.55 B.M.
71.	Indicate the complex / complex ion which did not show any geometrical isomerism. A) $[\text{Co}(\text{NH}_3)_4\text{Cl}_2]^+$ B) $[\text{Co}(\text{NH}_3)_3(\text{NO}_2)_3]$ C) $[\text{Co}(\text{CN})_5(\text{NC})]^{3-}$ D) $[\text{CoCl}_2(\text{en})_2]$
72.	The compound C_7H_8 undergoes the following reactions: $\text{C}_7\text{H}_8 \xrightarrow{3\text{Cl}_2/\Delta} \text{A} \xrightarrow{\text{Br}_2/\text{Fe}} \text{B} \xrightarrow{\text{Zn}/\text{HCl}} \text{C}$ The product C is A) <i>m</i>-bromotoluene B) <i>o</i>-bromotoluene C) 3-bromo-2,4,6-trichlorotoluene D) <i>p</i>-bromotoluene.
73.	Incorrect method of preparation for alcohols from the following is A) reaction of ketone with RMgBr followed by hydrolysis B) hydroboration-oxidation of alkene C) ozonolysis of alkene D) reaction of alkyl halide with aqueous NaOH .
74.	In Reimer-Tiemann reaction, the reagent used is A) $\text{CHCl}_3, \text{aq. NaOH}$ B) $[\text{O}], \text{I}_2/\text{NaOH}$ C) $\text{NaOH}, \text{CO}_2, \text{H}^+$ D) $\text{NaHCO}_3, \text{Cu}, \Delta$
75.	Reaction between benzaldehyde and acetophenone in presence of dilute NaOH is known as A) Aldol condensation B) Cannizzaro's reaction C) Cross Cannizzaro's reaction D) Cross Aldol condensation.
76.	The major product of the following reaction is $\text{R}-\text{C}=\text{N}$ $\xrightarrow{(1)\text{AlH}(\text{i-Bu})_2 \rightarrow (2)\text{H}_2\text{O}}$ A) RCOOH C) RCONH_2 B) RCHO D) RCH_2NH_2

77.	Carboxylic acids have higher boiling points than aldehydes, ketones and even alcohols of comparable molecular mass. It is due to their A) formation of intramolecular H-bonding B) formation of carboxylate ion C) more extensive association of carboxylic acid via van der Waals' forces of attraction D) formation of intermolecular H-bonding
78.	The reaction, $\frac{1}{2} \text{H}_{2(g)} + \text{AgCl}_{(s)} \rightleftharpoons \text{H}^+_{(aq)} + \text{Cl}^-_{(aq)} + \text{Ag}_{(s)}$ occurs in which of the given galvanic cell? A) $\text{Ag} \text{AgCl}_{(s)} \text{KCl}_{(\text{sol}^n)} \text{AgNO}_3 \text{Ag}$ B) $\text{Pt} \text{H}_{2(g)} \text{HCl}_{(\text{sol}^n)} \text{AgNO}_{3(\text{sol}^m)} \text{Ag}$ C) $\text{Pt} \text{H}_{2(g)} \text{KCl}_{(\text{sol}^n)} \text{AgCl}_{(s)} \text{Ag}$ D) $\text{Pt} \text{H}_{2(g)} \text{HCl}_{(\text{sol}^n)} \text{AgCl}_{(s)} \text{Ag}$
79.	Which of the following amines can be prepared by Gabriel phthalimide reaction? A) Triethylamine B) n-Butylamine C) t-Butylamine D) neo-Pentylamine
80.	Among the following compounds most basic amino acid is A) histidine B) serine C) asparagine D) lysine.
81.	In 'rivet popper hypothesis', Paul Ehrlich compared the rivets in an airplane to: A) species within a genus B) genetic diversity C) ecosystem D) genera within a family
82.	Given below are two statements: Statement I: The Indian Government has set up GEAC, which will make decisions regarding the validity of GM research. Statement II: Biopiracy is the term used to refer to the use of bio- resources by native people. In the light of the above statements, choose the correct answer from the options given below: A) Statement I is true but Statement II is false B) Statement I is false but Statement II is true C) Both Statement I and Statement II are true D) Both Statement I and Statement II are false
83.	Snow-blindness in Antarctic region is due to A) Inflammation of cornea due to high dose of UV-B radiation B) High reflection of light from snow C) Damage to retina caused by infra-red rays D) Freezing of fluids in the eye by low temperature
84.	Given below are two statements: Statement I: Electrostatic precipitator is most widely used in thermal power plant. Statement II: Electrostatic precipitator in thermal power plant removes ionising radiations In the light of the above statements, choose the most appropriate answer from the options given below: A) Both Statement I and Statement II are incorrect. B) Statement I is correct but Statement II is incorrect. C) Statement I is incorrect but Statement II is correct. D) Both Statement I and Statement II are correct.
85.	The pioneer species in a hydrarch succession are: A) Filamentous algae B) Free-floating angiosperms C) Submerged rooted plants D) Phytoplanktons

86.	Given below are two statements: Statement I: Gause's 'Competitive Exclusion Principle' states that two closely related species competing for the same resources cannot co- exist indefinitely and competitively inferior one will be eliminated eventually. Statement II: In general, carnivores are more adversely affected by competition than herbivores. In the light of the above statements, choose the correct answer from the options given below: A) Both Statement I and Statement II are false. B) Statement I is correct Statement II is false. C) Statement I is incorrect but Statement II is true. D) Both Statement I and Statement II are true.
87.	In gene therapy of Adenosine Deaminase (ADA) deficiency, the patient requires periodic infusion of genetically engineered lymphocytes because: A) Retroviral vector is introduced into these lymphocytes. B) Gene isolated from marrow cells producing ADA is introduced into cells at embryonic stages C) Lymphocytes from patient's blood are grown in culture, outside the body. D) Genetically engineered lymphocytes are not immortal cells.
88.	Upon exposure to UV radiation, DNA stained with ethidium bromide will show A) Bright blue colour B) Bright yellow colour C) Bright orange colour D) Bright red colour
89.	Select the correct group of biocontrol agents. A) Trichoderma, Baculovirus, Bacillus thuringiensis B) Oscillatoria, Rhizobium, Trichoderma C) Nostoc, Azospirillum, Nucleopolyhedrovirus D) Bacillus thuringiensis, Tobacco mosaic virus, Aphids
90.	Which of the following is not a step in Multiple Ovulation Embryo Transfer Technology (MOET)? A) Cow is administered hormone having LH like activity for super ovulation B) Cow yields about 6-8 eggs at a time C) Cow is fertilized by artificial insemination D) Fertilized eggs are transferred to surrogate mothers at 8-32 cell stage
91.	Which of the following reasons is mainly responsible for graft rejection in transplantation of organs? A) Cell-mediated response B) Inability of recipient to differentiate between 'self' and 'non-self' tissues/cells C) Humoral immune response only D) Auto-immune response
92.	A population of a species invades a new area. Which of the following condition will lead to Adaptive Radiation? A) Area with large number of habitats having very low food supply B) Area with a single type of vacant habitat C) Area with many types of vacant habitats D) Area with many habitats occupied by a large number of species
93.	What is the correct order (old to recent) of periods in Paleozoic era? A) Silurian, Devonian, Permian, Carboniferous B) Silurian, Devonian, Carboniferous, Permian C) Permian, Devonian, Silurian, Carboniferous D) Silurian, Carboniferous, Permian, Devonian

94.	Given below are two statements: Statement I: RNA interference takes place in all Eukaryotic organisms as method of cellular defense. Statement II: RNAi involves the silencing of a specific mRNA due to a complementary single-stranded RNA molecule that binds and prevents translation of mRNA In the light of the above statements, choose the correct answer from the options given below. A) Statement I is true but Statement II is false. B) Statement i is false but Statement II is true. C) Both Statement 1 and Statement II are true. D) Both Statement I and Statement II are false.
95.	A normal girl, whose mother is haemophilic marries a male with no ancestral history of haemophilia. What will be the possible phenotypes of the offsprings? (a) Haemophilic son and haemophilic daughter. (b) Haemophilic son and carrier daughter. (c) Normal daughter and normal son. (d) Normal son and haemophilic daughter. Choose the most appropriate answer from the options given below: A) (b) and (d) only B) (a) and (b) only C) (b) and (c) only D) (a) and (d) only
96.	Frequency of recombination between gene pairs on same chromosome as a measure of the distance between genes to map their position on chromosome, was used for the first time by A) Sutton and Boveri B) Alfred Sturtevant C) Henking D) Thomas Hunt. Morgan
97.	Lippe's loop is a type of contraceptive used as: A) Cervical barrier B) Vault barrier C) Non-Medicated IUD D) Copper releasing IUD
98.	Which of the following statements are true for spermatogenesis but do not hold true for Oogenesis? (a) It results in the formation of haploid gametes (b) Differentiation of gamete occurs after the completion of meiosis (c) Meiosis occurs continuously in a mitotically dividing stem cell population (d) It is controlled by the Luteinising hormone (LH) and Follicle Stimulating Hormone (FSH) secreted by the anterior pituitary (e) It is initiated at puberty Choose the most appropriate answer from the options given below A) (c) and (e) only B) (b) and © only C) (b), (d) and (e) only D) (b), (c) and (e) only
99.	The part marked as 'x' in the given figure is  A) Endosperm B) Thalamus C) Endocarp D) Mesocarp
100.	Arrange the sequence of different hormones for their role during gametogenesis. (A) Gonadotropin LH stimulates synthesis and secretion of Androgen (B) Gonadotropin releasing hormone from hypothalamus (C) Androgen stimulates spermatogenesis (D) Gonadotropin FSH helps in the process of spermiogenesis (E) Gonadotropins from anterior pituitary gland. Choose the correct answer from the options given below: A) (E), (A), (D), (B), (C) B) (C), (A), (D), (E), (B) C) (B), (E), (A), (C), (D) D) (D), (B), (A), (C), (E)
