When nothing very interesting was happening on the water, he would go down on his knees and take a handful of sand. Through his fingers ran the sand until only small stones and shells were left. Then, with a large sweep of his arm and with as much strength as he could muster, Peter would throw the shells away as far as he could. At other times, he would go on his back and gaze up at the clouds, his hands idly searching the sand at his sides. He never stopped playing with the sand and feeling it run through his fingers, however much he was absorbed by the changes in the clouds. Occasionally, some fishing boats came close enough to the beach for Peter to see what the fishermen were doing. Then with his hands clasped, he would look and look, while his whole body moved with the boat from side to side. Not far away, a small group of laborers huddled together under a part of the cement housing above a 16-meter-deep well used to pump water for irrigation. Suddenly, Manik and his mother heard the laborers scream. When the two got to the well, they were told that a five-year-old boy named Hariya had fallen in through a side opening in the structure. Ignoring his mother's fears, Manik quickly knotted together lengths of flimsy rope belonging to the laborers and asked them to lower him into the dark well. "I hope the rope holds," he thought. As he descended, Manik noticed the metal rungs on the wall of the well. He grabbed hold of one and started climbing down when he saw the boy clinging to a pipe running up the well's center. Grabbing the child, Manik started to climb praying that the old rungs wouldn't give away and plunge them both into the churning water below. Their luck held and within a few minutes, Manik clambered to ground level and handed over Hariya to his sobbing father. The man fell at Manik's feet and offered him some money as a reward. Refusing the cash, Manik took Hariya and his family to a nearby eatery and offered them steaming tea to warm them up.
