

Name

Roll No.:

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each

Read the passage and answer the questions that follow (1-3):

The elephant is a perpetual nomad. Being a very large and herbivorous animal, it needs vast areas to roam: constantly browsing, foraging, moving from place to place in search of food and water with the changing seasons. Elephants in India are primarily threatened because of habitat loss, shrinkage and degradation. The growing infrastructural and agricultural needs of India's burgeoning human population have led to increasing encroachment within and around elephant habitat, resulting in the fragmentation of wild habitats and a loss of the traditional movement paths of elephants.

This has forced elephants to move through human-use areas, contributing to increased human-elephant conflict, which often leads to loss of human and elephant lives. There are an estimated 30,000 wild elephants in India according to the Ministry of Environment study of 2012. This accounts for around 60% of the global population of Asian elephants, which has declined by about half, in just the last 60-odd years.

We can help this situation by spreading awareness about the importance of elephant corridors. These are traditional migratory paths that elephant herds have used for centuries, their location passed down from generation to generation. The Wild Life Trust (WTI), the government's Project Elephant and other NGOs have mapped 101 elephant corridors across the country. Protecting and securing these is of critical importance. Thus the WTI along with its partner NGO, are organizing the GajYatra, an awareness campaign to highlight the necessity of elephant corridors.

However, merely creating awareness is not enough. There is an urgent need for coordinated policy interventions and scientific land-use planning. Conservationists argue that without legal protection, these mapped corridors remain vulnerable to development projects such as highways, railways, and urban expansion. Legislative delays and lack of political will further complicate conservation efforts, leaving the corridors at the mercy of commercial interests.

Moreover, the plight of the elephant is a mirror to the broader challenges faced in balancing development and ecological preservation. As a keystone species, the elephant plays a critical role in maintaining forest ecosystems. Its decline signals a potential collapse of biodiversity in those regions. Unless immediate, long-term, and collaborative strategies are implemented, we may lose not just the elephant, but the rich natural heritage it symbolizes.

1. According to the passage, why are elephant corridors essential for elephant conservation?
 - a. They help elephants escape predators.
 - b. They connect zoos and reserves.
 - c. They are traditional paths used for migration and maintaining herd movement.
 - d. They help in the breeding of elephants.
2. What can be inferred about the author's opinion regarding government action on elephant conservation?
 - a. The government is doing everything possible.
 - b. Political will is strong and effective.
 - c. Legal protections are already sufficient.
 - d. The government needs to act faster and with stronger commitment.
3. What does the phrase "**at the mercy of commercial interests**" most likely mean in the context of paragraph 4?
 - a. Supported by businesses
 - b. Protected from development
 - c. Vulnerable to exploitation by developers
 - d. Funded by industrialists

Read the poem and answer the questions that follow (4-6):

Take this kiss upon the brow!
And, in parting from you now,
Thus much let me avow —
You are not wrong, who deem
That my days have been a dream;
Yet if hope has flown away
In a night, or in a day,
In a vision, or in none,

Is it therefore the less gone?
 All that we see or seem
 Is but a dream within a dream.

I stand amid the roar
 Of a surf-tormented shore,
 And I hold within my hand
 Grains of the golden sand —
 How few! yet how they creep
 Through my fingers to the deep,
 While I weep — while I weep!
 O God! Can I not grasp
 Them with a tighter clasp?
 O God! can I not save
 One from the pitiless wave?
 Is all that we see or seem
 But a dream within a dream?

4. What is the central theme of the poem?
 - a. The joy of childhood memories
 - b. The illusionary nature of reality and the inevitability of loss
 - c. The importance of holding on to dreams
 - d. A celebration of the natural world
5. Which of the following literary devices is most prominent in the lines:
 "Grains of the golden sand — / How few! yet how they creep / Through my fingers to the deep"?
 - a. Simile
 - b. Alliteration
 - c. Metaphor
 - d. Hyperbole
6. What does the poet's repeated question "Is all that we see or seem / But a dream within a dream?" most likely suggest?
 - a. The poet believes dreams are better than reality.
 - b. The poet is uncertain whether life itself is real or just an illusion.
 - c. The poet is describing a literal dream he had.
 - d. The poet finds comfort in the idea that life is a dream.
7. Which of the following best expresses the meaning of the phrase "cresting and crushing" as used in the sentence: "Imagine looking down in the vast expanse of the sea with its mighty waves cresting and crushing the sand..."?
 - a. Flowing gently and endlessly
 - b. Forming peaks and breaking forcefully
 - c. Foaming lightly and vanishing quickly
 - d. Splashing casually over the surface
8. Choose the correct sentence transformation from passive to active voice. A new car will have been bought by Bina by January.
 - a. Bina will buy a new car by January.
 - b. Bina will have bought a new car by January.
 - c. Bina will be buying a new car by January.
 - d. Bina will have been buying a new car by January.
9. Which of the following pairs correctly shows a word and its strict antonym?
 - a. Embezzle – Earn
 - b. Conquer – Surrender
 - c. Buy – Rent
 - d. Consider – Reject
10. After a decade of juggling multiple jobs, skipping vacations, and living frugally, Riya is finally out of the red. She can now afford to travel and invest in her dream project. What does the idiom "**out of the red**" most likely imply in this context?
 - a. Riya has been released from legal trouble.
 - b. Riya has emotionally recovered from a bad phase.
 - c. Riya is no longer in financial debt.
 - d. Riya has moved to a different place.
11. The discourse marker '**nonetheless**' in the sentence "The forecast predicted heavy rain all day. **Nonetheless**, the hikers decided to continue their journey up the mountain." is used to:
 - a. Justify a prior statement
 - b. Present a result
 - c. Contrast an unexpected decision with prior information
 - d. Provide an additional reason
12. Complete the sentence: Notwithstanding the lack of proper training,
 - a. the candidate failed to meet even the basic expectations
 - b. the team struggled throughout the competition
 - c. the athlete completed the triathlon in record time
 - d. the manager insisted on additional practice sessions
13. Choose the option which best expresses the given sentence in Indirect/Direct speech: She said to the teacher, "Kindly excuse my absence yesterday."
 - a. She requested the teacher to kindly excuse her absence yesterday.
 - b. She told the teacher to excuse her absence kindly.
 - c. She asked the teacher to excuse her absence yesterday.
 - d. She requested the teacher to excuse her absence the previous day.

14. Select the sentence that follows the rules of subject–verb agreement:
- Neither the players nor the coach are available for the match.
 - Each of the students in the group have completed their assignments.
 - The committee, along with several advisors, has reached a decision.
 - A bouquet of red roses and white lilies were placed on the table.
15. Identify the option in which the main verb and auxiliary verbs are incorrectly labelled.
- I have seen that film already. (Auxiliary – have, Main – seen)
 - We have no intention of leaving. (Auxiliary – have, Main – leaving)
 - He has been working since morning. (Auxiliary – has, been; Main – working)
 - She has a pet parrot at home. (Main – has)
16. Identify the clause type in the sentence: “The reason why he left early is still unknown.”
- Adjective clause
 - Adverb clause
 - Noun clause
 - Main clause
17. What does the word **ephemeral** most likely describe in general usage?
- Something that is confusing or hard to understand
 - Something that is brief and short-lived
 - Something that is painful or emotionally draining
 - Something that is repetitive and predictable
18. How many punctuation marks are required to make the following passage grammatically correct? The Principal announced Students must submit their project proposals by Monday Therefore the library will remain open this weekend However only reference books may be borrowed
- 8
 - 5
 - 7
 - 6
19. Identify the transformation that best retains the meaning of the sentence: “Nobody could answer the question.”
- The question baffled everyone despite repeated attempts.
 - No one was capable of responding to the question.
 - The question received no answers from the students.
 - Everyone hesitated to respond due to its difficulty.
20. How many different literary devices are used in the following sentence? “Like shattered glass on velvet, the stars glittered in the midnight sky, whispering secrets to the moon.”
- One – Simile
 - Two – Simile, Imagery
 - Three – Simile, Imagery, Personification
 - Four – Simile, Imagery, Personification, Alliteration
21. Which of the following is not a function of Statistics?
- Economic forecasting
 - Economic equilibrium
 - Political equilibrium
 - Construction of economic models
22. In Plural sense, which of the following is not a characteristic of Statistics?
- Aggregate of Data
 - Only expressed in words
 - Affected by multiplicity of causes
 - Collected in a systematic manner
23. Rohan submitted a school project on the growth of the IT industry in India. He follows the steps listed below. Arrange the steps in logical order:
- Using average and correlation coefficients to analyze numerical information
 - Collection of data about market share and revenue of various IT service providers
 - Organization of data in proper sequence
 - Presentation of data in the form of tables diagrams and graph
 - Interpretation of data by determining the degree of relationship between various economic variables expressed
- i , iii, v, ii, iv
 - i , iv, v, ii, iii
 - ii , iii, iv, v, i
 - iii, iv, v, i, ii
24. Statement Based Question
- Statement 1: Non-economic activities are concerned with creation of money.
 - Statement 2: Teacher teaching his own son are related to Non-economic activities
- Both the statement are true
 - Both the statement are false
 - Statement 1 is true and Statement 2 is false
 - Statement 2 is true and Statement 1 is false
25. The election poll of various news papers shows most of the seats in India is expected to win by BJP and also the various other news channels predict the same. The finding of the opinion polls of various news channels are based on.
- Secondary data
 - Sample data
 - Census
 - None of the above

26. There are two statements given below, marked as Assertion (A) and Reason (R). Read the statements and choose the correct option.
 Assertion (A): Sampling bias arises from recording of incorrect responses.
 Reason (R): Non-response occurs if an interviewer is unable to contact a person listed in the sample or a person from the sample refuses to respond.
- Both Assertion (A) and Reason (R) is true but Reason (R) is the correct explanation of Assertion (A)
 - Both Assertion (A) and Reason (R) is true but Reason (R) is not the correct explanation of Assertion(A).
 - Assertion (A) is true but Reason (R) is false.
 - Assertion (A) is false but Reason (R) is true
27. Pre-testing of the questionnaire is called as.....
- Mailing questionnaire
 - Census
 - Sampling survey
 - Pilot Survey
28. Primary data is more useful when
- High degree of accuracy is required
 - Less time is available
 - Source of origin is not important
 - All of the
29. Read the following statements carefully and choose the correct alternatives given below:
 Statement 1 – Technique which gives every item of the universe an equal chance of being selected is called as Non-random sampling.
 Statement 2 – The most complete and continuous demographic record of population is provided by, ' National Sample Survey Organisation'.
- Alternatives:
- Both statements are true.
 - Both statements are false.
 - Statement 1 is true and Statement 2 is false.
 - Statement 2 is true and Statement 1 is false.
30. To draw meaningful conclusions from raw data is a tedious task because :
- They are highly unorganized
 - They are often very large and cumbersome to handle
 - They do not yield to statistical methods easily
 - All of these
31. Tally marks determines :
- Class width
 - Class boundary
 - Class limit
 - Class frequency
32. Read the following statements carefully and choose the correct alternatives given below:
- Statement 1: A mass of data in its crude form is called raw data.
 - Statement 2: Quality of data involves less than one characteristic, it is called manifold classification.
- Both the statement are true
 - Both the statement are false
 - Statement 1 is true and Statement 2 is false
 - Statement 2 is true and Statement 1 is false.
33. Read the following statements carefully and choose the correct alternatives given below:
 Assertion (A): In the case of exclusive class intervals, upper limit is not included
 Reason (R): In the case of exclusive class intervals, we have to decide in advance which class limit is to be excluded.
- Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A)
 - Both Assertion (A) and Reason (R) are true and Reason (R) is not the correct explanation of Assertion (A)
 - Assertion (A) is true but Reason (R) is false.
 - Assertion (A) is false but Reason (R) is true.
34. Special purpose table is also known as:
- Reference table
 - Simple table
 - Complex table
 - Summary table
35. Which of the following frequency diagram uses cumulative frequency distribution?
- Bar diagram
 - Frequency curve
 - Histogram
 - Ogive
36. Read the following statements carefully and choose the correct alternatives given below
 Assertion (A) :- Table is the Consequence of tabulation
 Reason (R) : Tabulation is systematic and logical presentation of numeric Data in row and columns
- Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A)
 - Both Assertion (A) and Reason (R) are true and Reason (R) is not the correct explanation of Assertion (A)
 - Assertion (A) is true but Reason (R) is false.
 - Assertion (A) is false but Reason (R) is true.

37. Match the columns

Column 1	Column2
i. At the top of each column in the table ,a column designation is given to explain figures of the column	a. Title
ii. it is given at the top or at the beginning of the title of the table.	b. Table number
iii. It has to be clear ,brief and carefully worded.	c. Caption
iv. The main parts which contains the actual data	d. Body of the table

a. i-(c) ,ii-(b) ,iii -(a) ,iv-(d)

b. i-(b) ,ii-(c) ,iii -(d) ,iv-(a)

c. i-(a) ,ii-(b) ,iii -(c) ,iv-(d)

d i-(d) ,ii-(b) ,iii -(a) ,iv-(c)

38. The most appropriate measure of central tendency in case of data of varying importance

a. Combined mean

b. Weighted mean

c. Assumed mean

d. All of these

39.If there are two groups containing 30 and 20 observations and having 50 and 60 as arithmetic means, then the combined arithmetic mean is

a. 51

b. 54

c. 53

d. 52

40.Ramu is a farmer .He grows food grains on his land in a village called Palapur in Buxar district of UP. The village consist of 200 small farmers . Ramu has 4 acres of land. You are interested to see if the land owned by Ramu is above what most of the farmers owned. Which of the following measures of central tendency would you use.

a. Arithmetic mean

b. Quartile

c. Median

d. Mode

41.Read the following statements carefully and choose the correct alternatives given below

Assertion(A): The correlation between height and weight of a person is positive.

Reason (R): Positive correlation means the movement of two variables in the same direction.

a. Both assertion and reason are true and reason is the correct explanation of assertion.

b. Both assertion and reason are true and reason is not the correct explanation of assertion.

c. Assertion is true and reason is false.

d. Assertion is false and reason is true.

42. Which of the following statements is not true?

a. The correlation is said to be linear if the ratio of change between two variables is constant

b. Linear correlation is indicated by a straight line on the graph paper

c. Linear correlation is always positive

d. If there are two variables X and Y then change in X/Change in Y is constant, it will be linear correlation.

43. When $r = 1$ all points in a scatter diagram would lie

a. On a straight line directed from lower left to upper right

b. On a straight line

c. On a straight line directed from upper left to lower right

d. Both a and b

44.Read the following statements; Choose one of the correct alternatives

Statement 1:A ratio or an average of ratios expressed as a percentage is called an index number.

Statement 2 :The value of base time period serves as the standard point of comparison

a. Both the statement are true

b. Both the statement are false

c. Statement 1 is true and Statement 2 is false

d. Statement 2 is true and Statement 1 is false.

45. Read the following statements - Assertion (A) and Reason (R). Choose one of the correct alternatives given below:

Assertion (A): The problem of making choice is called economic problem.

Reason (R): Economizing resources is the essence of economic problem.

Alternatives:

a. Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A)

b. Both Assertion (A) and Reason (R) are true and Reason (R) is not the correct explanation of Assertion (A)

c. Assertion (A) is true but Reason (R) is false.

d. Assertion (A) is false but Reason (R) is true.

46. A farmer can produce 400 Kg of mustard on a piece of land. With the same resource the farmer could also produce 200 Kg of Gram. What is the opportunity cost of producing mustard?
- a. 400kg b. 600 kg c. 200kg d. 800 kg
47. Gokul : My maize harvest this year is poor.
 Ramesh : Don't worry .Price increase will compensate for fall in quantity supplied
 Reena : Climate affects crop yields .Some years are bad ,others are good.
 Neena : The government ought to guarantee that our income will not fall.
 In this conversation ,the normative statement is made by
- a) Gokul b) Ramesh c) Reena d) Neena
48. Read the paragraph carefully and answer the given questions: In economics, a consumer is an economic agent, who consumes a good or service for satisfaction of his wants. Every individual consumer is a rational consumer and understands his best interest. However, in certain circumstances, we can observe that people buy goods or services without their choice or needs, due to the influence of external factors. In such situations utility is derived by mere purchase of goods and not from its consumption. Such buying we could see during the festive seasons.
- Rationality of a consumer depends upon which of the following factor.
- a. Utility from the consumption of a good b. Consumer's taste and preferences
 c. Based upon the habit of a consumer. d. All of the above.
49. Read the following statements carefully and choose the correct alternative from the following.
 Statement 1: Law of diminishing marginal utility doesn't hold true in absence of continuous consumption.
 Statement 2: A consumer consumes one good and is in equilibrium. He will get more utility when the price of the good falls.
- a. Both statements are true b. Both statements are false
 c. Statement 1 is true and statement 2 is false d. Statement 1 is false and statement 2 is true.
50. In which of the following cases will the Price elasticity of demand is less elastic?
- a. Goods which can put to multiple use
 b. Goods on which the consumers will spend small proportion of their income
 c. Goods whose consumption can be postponed
 d. None of the above.
51. Statement 1: availability of substitutes makes demand less elastic
 Statement II: Substitute goods have less elastic in demand.
 Alternatives:
- a. Both the statements are true b. Both the statements are false
 c. Statement 1 is true and Statement 2 is false d. Statement 2 is true and Statement 1 is false
52. From the set of statements given in column I and column II choose the correct pair of statement.
- | COLUMN 1 | COLUMN 2 |
|-----------------------|---|
| A. Demand | (i) Specific quantity to be purchased against a specific price of the commodity |
| B. Substitute goods | (ii) Bread and Butter |
| C. Normal goods | (iii) Income effect is negative |
| D. Increase in Demand | (iv) More of a commodity is purchased at its existing price |
- Alternatives:
- a. A – (i) b. B – (ii) c. C – (iii) d. D – (iv)
53. If two goods are complementary then rise in the price of one results in;
- a. Rise in demand for the other c. Fall in demand for the other
 b. Rise in demand for both d. Fall in demand for both
- 54 .Read the following statements - Assertion (A) and Reason (R). Choose one of the correct alternatives given below:
 Assertion : The price elasticity of demand is negative number
 Reason : the demand for goods is negatively related to the price of the goods
 Alternatives:
- a. Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A)
 b. Both Assertion (A) and Reason (R) are true and Reason (R) is not the correct explanation of Assertion (A)
 c. Assertion (A) is true but Reason (R) is false.
 d. Assertion (A) is false but Reason (R) is true.

55. Which of the following statement is "FALSE"?
- Increase in quantity demanded is a situation of extension of demand
 - Change in demand is indicated by movement along the demand curve
 - Rise in price of substitute good leads to increase in its own demand
 - Demand curve is drawn on the assumption that except price, all other determinants of demand remain constant.
56. Mr. Gurpreet is planning to start a new business. He has set up a suitable factory space, purchased machinery and computer systems and hired key managerial personnel. Identify which of the following is not a fixed factor of production.
- Purchase of machinery
 - Building for factory space
 - Hiring of managerial personnel
 - All of the above
57. Which of the following statements is incorrect with respect to Production function?
- Production function shows the maximum quantity of output that can be produced for various quantities of inputs used.
 - Production function shows different combinations of output that can be produced for given quantities of inputs used.
 - A production function is defined for a given technology
 - None of the above
58. A firm is operating with 3 workers and the production is 146 units. Now that it has decided to add another worker and it was noticed that the production went up to 170 units. Based on the above information, calculate the Marginal product of 4th unit of worker.
- 170 units
 - 46 units
 - 24 units
 - 146 units
59. A firm, while keeping its price constant, is able to sell more of its output. What will be the shape of the MR curve of the firm?
- MR curve will be upward sloping
 - MR curve will be downward sloping
 - MR curve will be a horizontal straight line
 - MR curve will be a vertical straight line
60. Read the two statements labelled as Assertion (A) & Reason (R) and choose the correct option from the below.
 Assertion (A): Production capacity remains constant in the short run
 Reason (R): Production can be increased only by increasing variable factors of production.
- Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A).
 - Both Assertion (A) and Reason (R) are true but Reason (R) is not the correct explanation of Assertion (A).
 - Assertion (A) is true but the Reason (R) is false.
 - Both Assertion (A) and Reason (R) are false
61. In case of perfect competition, price is determined at;
- Equilibrium price of the firm
 - Equilibrium price of the industry
 - Equality between MR and MC
 - Equality between MR and AR
62. Read the following statements carefully and choose the correct alternative from the following:
 Statement 1: In Perfect competition selling costs are very high.
 Statement 2: Selling cost refers to cost of advertisement of the product.
 Alternatives:
- Both the statements are true.
 - Both the statements are false.
 - Statement 1 is true and Statement 2 is false
 - Statement 2 is true and Statement 1 is false
63. Mr. Rahman opens a new bakery in his own building. He acts as a cashier and he hires 3 other workers. Identify the implicit cost of his business
- Salary paid to hired workers
 - Rent of the bakery premise
 - The wages that go to the cashier
 - Both b & c
64. The period of time, when supply is fully adjusted to change in demand is called
- Short period
 - Very short period
 - Mid-period
 - Long period
65. Which of the following statement is correct in case of non-viable industry?
- Supply curve lies above Demand curve.
 - Supply curve lies below demand curve
 - Supply curve and Demand curve intersect each other
 - Supply curve coincide with Demand curve.
66. Read the following statements carefully and choose the correct alternative from the following:
 Statement 1: Price floor is also known as support price which is normally fixed below the equilibrium price to protect the producers.
 Statement 2: Price ceiling is the Government fixed price, which is normally above the equilibrium price.
 Alternatives:
- Both the statements are true.
 - Both the statements are false.
 - Statement 1 is true and Statement 2 is false
 - Statement 2 is true and Statement 1 is false.

67. Which of the following factors results in a forward shift of supply curve?
- Increase in factor prices
 - Increase in taxes by government
 - Improvement in technology
 - Increase in price of the commodity
68. When supply curve is vertical straight line, the commodity is said to have:
- Unitary elastic supply
 - Perfectly elastic supply
 - Relatively elastic supply
 - Perfectly inelastic supply
69. Identify the correctly matched pair of items from the following
- TR reaches its maximum — MR is maximum
 - TR rises at an increasing rate — MR falls but positive
 - TR rises at a decreasing rate — MR increases
 - TR is falling — MR is negative
70. Case-Based Question
- Read the case carefully and answer the question below:
- During a sudden surge in onion prices, the government fixed the maximum retail price of onions at ₹40 per kg, which was lower than the market equilibrium price. As a result, long queues were seen at ration shops, and some people started hoarding onions for illegal resale.
- What does this scenario illustrate?
- Imposition of a price floor leading to surplus
 - Imposition of a price ceiling causing excess demand
 - Free market equilibrium
 - Increase in producer surplus
71. A set of five boxes - P, Q, R, S, and T - are arranged in a row. Each box contains a different number of balls: 2, 4, 6, 8, and 10. The following conditions apply:
- Box P contains more balls than box R.
 - Box S contains fewer balls than box Q.
 - Box T contains more balls than box P.
- Which box contains the most balls?
- P
 - Q
 - S
 - T
72. A survey of 100 students was conducted to determine their favorite sports. The results were grouped into three categories: Team Sports, Individual Sports, and Water Sports. The following data was collected.
- 40 students liked Team Sports.
 - 30 students liked Individual Sports.
 - 30 students liked Water Sports.
 - How many students liked exactly two categories of sports?
- 10
 - 20
 - 30
 - 40
73. Memory : Amnesia :: Vision : ?
- Blindness
 - Eyesight
 - Glasses
 - Spectacles
74. In a row of students, A is 7th from the left and B is 9th from the right. If they interchange their positions, A becomes 11th from the left. How many students are there in the row?
- 18
 - 19
 - 20
 - 21
75. Folding a paper in half along one diagonal and then folding it in half along the other diagonal results in what shape?
- Rhombus
 - Rectangle
 - Parallelogram
 - Trapezoid
76. What happens when a paper is folded in half multiple times?
- It decreases in thickness
 - It remains the same thickness
 - It increases in thickness
 - It becomes transparent
77. Which word does NOT belong with the others?
- index
 - glossary
 - chapter
 - book
78. Statements: All tubes are handles. All cups are handles. Conclusions: All cups are tubes. Some handles are not cups.
- Only conclusion I follows
 - Only conclusion II follows
 - Either I or II follows
 - Neither I nor II follows
79. CUP : LIP :: BIRD :
- GRASS
 - FOREST
 - BEAK
 - BUSH
80. In the word 'MATHS', which pair of letters shows rotational symmetry?
- M and A
 - H and S
 - T and H
 - M and S
81. A cube is painted on all its faces and then cut into 64 identical smaller cubes. How many of these smaller cubes have exactly two faces painted?
- 24
 - 32
 - 40
 - 48

82. A person is looking at a building from the front. Which of the following views would they see?

- a. Top view b. Front view c. Side view

83. Army : General :: Company : ?

- a. Director b. Manager c. Employee d. Worker

84. Choose the alternative which is closely resembles the mirror image of the given combination.

TARAIN1014A

(1) AƆƆ0101AƆAƆ

(3) AƆ0101AƆAƆ

(2) AƆ0101AƆAƆ

(4) AƆ0101AƆAƆ

a. 1

b. 2

c. 3

d. 4

85. Which one will replace the question mark ?

A ₂	C ₄	E ₆
G ₃	I ₅	?
M ₅	O ₉	Q ₁₄

a. L10

b. K15

c. I15

d. K8

86. What is the primary function of the Casparian strip in plant roots?

- a. To facilitate water uptake b. To regulate solute transport
c. To provide structural support d. To produce hormones

87. Which of the following is an example of a learned behavior in animals?

- a. Migration patterns in birds b. Instinctive nesting behavior in birds
c. Habituation to a stimulus d. Reflexive response to a stimulus

88. What is the permissible noise level in a residential area at night?

- a. 35 dB b. 40 dB c. 45 dB d. 50 dB

89. When did the Environment Protection Act come into force in India?

- a. 1986 b. 1992 c. 2000 d. 2005

90. What is the title of the Brundtland Report?

- a. "Our Common Future" b. "Sustainable Development"
c. "Environmental Protection" d. "Climate Change"

91. What is the name of the NASA mission that successfully landed humans on the Moon?
