

Name

Roll No.:

General Instructions:

1. Read the questions carefully.
2. Attempt all the questions.
3. No negative marking.
4. Answers to be marked in the OMR sheet. Darken the bubble completely. Partially darkened bubbles will not be considered.
5. Question number 1 to 100 carries 1 mark each

Read the passage and answer the questions that follow:

High-altitude climbing is still a very dangerous task in spite of the availability of oxygen masks and other protective equipment which modern climbers take with them. These, of course, are indispensable accessories of climbing, but more important than these is the stamina of the climber, which ultimately determines the success of his attempt. Throughout his journey, death is his constant companion that he can keep at a distance only with his superb presence of mind. He has to tread every inch of the ground with the utmost care, for a false step may not only deal him a fatal blow but also bring disaster to the whole expedition. That is why all expeditions invariably take with them local guides who are experienced climbers and who have a thorough knowledge of the terrain. Moreover, a huge amount of capital is needed for financing these expeditions, and this is generally provided by governments or wealthy private organizations.

The primary objective of a mountaineering expedition is to reach the top of a high mountain, which in the past has resisted all attempts to conquer it. But it should not be presumed that the expedition is a complete failure if it does not reach its destination. Sometimes operations are temporarily suspended because of the loss of some valuable equipment or the sudden death of a very important member of the party. Every major expedition includes men who are interested in botany, geology, zoology, and various other branches of science, and these men carry equipment for recording their observations concerning the weather, the terrain, and different forms of life in higher altitudes. Other scientists, explorers, and expeditionists utilize the fruits of their observations. Thus, every unsuccessful expedition contributes to the success of later expeditions. The British expedition led by Colonel Hunt would have found their way to Everest much more difficult had earlier expeditions not armed them with useful knowledge about the death-dealing weather they had to encounter near the summit.

To ordinary people, mountaineering need not be a fearful journey in the land of snowstorms, where the brave adventurer is always coming face to face with death. They can scale less ambitious heights, rest their weary limbs under a quiet shelter, and feast their eyes on the distant landscape. In the company of friends, they can enjoy an outing near a waterfall or cross into the next valley with haversacks full of provisions dangling from their shoulders. All those who can afford to go to a hill station should seek this innocent pleasure, for it can be had without any risk to life or limb.

1. What is the primary reason expeditions hire local guides, according to the passage?
 - a. They carry the heavy equipment needed for the climb.
 - b. They are physically stronger than foreign climbers.
 - c. They are familiar with the terrain and experienced in climbing.
 - d. They reduce the cost of the expedition.
2. What does the phrase “**death-dealing weather**” (Paragraph 2) most likely mean?
 - a. Weather that is ideal for adventurous climbs
 - b. Weather that kills or causes fatal outcomes
 - c. Weather that changes frequently
 - d. Weather that inspires fear in scientists
3. Which of the following best describes the author’s tone and purpose in the third paragraph?
 - a. Cautionary and philosophical—to warn people against taking risks.
 - b. Humorous and casual—to entertain readers with a light view of mountaineering.
 - c. Informative and encouraging—to suggest that even ordinary people can enjoy safe hill adventures.
 - d. Scientific and technical—to explain the mechanics of safe climbing.

Read the poem and answer the questions that follow:

Let them not say: we did not see it.
We saw.
Let them not say: we did not hear it.
We heard.
Let them not say: they did not taste it.
We ate, we trembled.

Let them not say: it was not spoken, not written.
 We spoke,
 we witnessed with voices and hands.
 Let them not say: they did nothing.
 We did not-enough.
 Let them say, as they must say something:
 A kerosene beauty.
 It burned.
 Let them say we warmed ourselves by it,
 read by its light, praised,
 and it burned.

4. What is the central theme of the poem?
 - a. Human denial in the face of environmental decline
 - b. Nostalgia for a simpler, forgotten time
 - c. Collectivist accountability and the failure to act against irreversible damage
 - d. The poet's personal struggle with memory and emotion
5. Which of the following best describes the effect of the repetition in the poem?
 - a. It creates a musical rhythm and lightness
 - b. It emphasizes the speaker's confusion
 - c. It reinforces collective denial and shared guilt
 - d. It highlights a variety of unrelated experiences
6. The line "We did not-enough" most likely implies that:
 - a. The speaker is uncertain about their actions
 - b. The speaker believes their minimal actions were sufficient
 - c. The speaker feels remorse for insufficient effort
 - d. The speaker is justifying their inaction
7. Which idiom best describes the situation in the sentence below?
 "As we were tired, we went to sleep but were soon startled by a rustling noise which came from a very long and huge python-like serpent gliding swiftly towards us."
 - a. Let sleeping dogs lie
 - b. A bolt from the blue
 - c. On pins and needles
 - d. A snake in the grass
8. Choose the sentence that follows the correct subject-verb agreement:
 - a. The list of candidates, along with their documents and testimonials, were submitted to the examination board before the deadline.
 - b. The group of volunteers, who has been working tirelessly for months, are finally receiving the recognition they deserve.
 - c. Neither the senior editors nor the chief editor is willing to approve the article without a thorough review of its sources.
 - d. A series of workshops on digital ethics and data privacy have been organized by the university, which aim to train each student in responsible online behavior.
9. Choose the correct sentence transformation from passive to active voice. Who has been honoured by the principal?
 - a. Whom has the principal honoured?
 - b. The principal has honoured who?
 - c. Whom had the principal honoured?
 - d. Has the principal honoured whom?
10. Read the sentence carefully and answer the question below: He rarely helps others and, by the same token, no one comes to his aid when he is in trouble. The discourse marker "**by the same token**" is not used to:
 - a. Show a similar consequence or mirrored response
 - b. Express agreement in behaviour or attitude
 - c. Emphasize a contrast between two ideas
 - d. Highlight a reciprocal pattern of actions
11. In which of the following sentences is the word **ache** used in a way that reflects its most appropriate and typical collocation?
 - a. The therapist tried to ease the ache in his lower back through gentle massage.
 - b. After a warm bath, she hoped to relieve her ache and finally get some sleep.
 - c. He could barely endure the ache he caused his friend with harsh words.
 - d. The loud music at the concert ached his head beyond tolerance.
12. Which word best fits the context of the sentence below? Though she was greeted with silence and sidelong glances, she responded with a(n) _____ dignity that unsettled her critics.
 - a. aloof
 - b. composed
 - c. reticent
 - d. inscrutable
13. What does the phrase "**muddy fringe**" most likely refer to in this context?
 "The muddy fringe and the mangrove vegetation declared the gateway to the Bhitarkanika Wildlife Sanctuary in Odisha."
 - a. A narrow, dirty road built by locals
 - b. The outer edge of land covered in wet, marshy soil
 - c. A decorative border made from mangrove roots
 - d. The shoreline that is dry and sandy near the sanctuary
14. How many punctuation marks are required to make the following passage grammatically accurate? I spoke to God Its the end for me my God Please take me now Without any fear I opened my eyes and said to the lion Come and get me I m ready for you
 - a. 12
 - b. 13
 - c. 14
 - d. 15

15. Identify the correct use of an infinitive:
- He prefers to studying in the morning.
 - She avoided to speak during the meeting.
 - He plans to study all night.
 - To walk alone at night seemed risky.
16. Choose the option that best expresses the sentence in indirect speech: Rita said to her friend, "Did you enjoy the movie last night?"
- Rita asked her friend whether she had enjoyed the movie the previous night.
 - Rita told her friend that she enjoyed the movie the previous night.
 - Rita asked her friend if she has enjoyed the movie last night.
 - Rita asked her friend did she enjoy the movie last night.
17. Which of the following pairs correctly shows a word and its strict antonym?
- Condone – Censure
 - Abstain – Delay
 - Deride – Demand
 - Succumb – Sustain
18. Identify the clause type in the sentence: "What she decided to do surprised everyone at the meeting."
- Adjective clause
 - Adverb clause
 - Noun clause
 - Relative clause
19. Identify the transformation that best retains the meaning of the sentence: "She rarely missed a day of work, even during difficult times."
- She was often present at work unless it was absolutely impossible.
 - She never stayed home from work, even when she was unwell.
 - Her attendance at work was consistent, even in challenging circumstances.
 - She worked regularly but took leave when things got tough.
20. How many different literary devices are used in the following sentence?
"The thunder growled like a jealous beast, shaking the trembling trees with its fury."
- One – Simile
 - Two – Simile, Personification
 - Three – Simile, Personification, Alliteration
 - Four – Simile, Personification, Alliteration, Onomatopoeia
21. Consider the following species
- $$\underset{(a)}{[\text{CoF}_6]^{3-}} \quad \underset{(b)}{[\text{Fe}(\text{CN})_6]^{3-}} \quad \underset{(c)}{[\text{Mn}(\text{CN})_6]^{3-}}$$
- The correct order of their spin only magnetic moment is
- (a) > (b) > (c)
 - (c) > (b) > (a)
 - (b) > (a) > (c)
 - (a) > (c) > (b)
22. Moles of permanganate ions required to oxidise one mole of iodide ions in faintly alkaline medium is
- 5
 - 5/2
 - 2
 - 3/2
23. Which among the following ions undergoes reduction most easily?
- Fe^{2+}
 - Co^{2+}
 - Zn^{2+}
 - Cu^{2+}
24. From the following select the one which is not an example of corrosion.
- Rusting of iron object
 - Production of hydrogen by electrolysis of water
 - Tarnishing of silver
 - Development of green coating on copper and bronze ornaments
25. In acidic solution HNO_2 disproportionates in to
- N_2 and HNO_3
 - NO and HNO_3
 - N_2 and NO_2
 - N_2O and HNO_3
26. The pair of lanthanoid ions which are diamagnetic is
- Ce^{3+} and Eu^{2+}
 - Gd^{3+} and Eu^{3+}
 - Pm^{3+} and Sm^{3+}
 - Ce^{4+} and Yb^{2+}
27. Gadolinium has a low value of third ionisation enthalpy because of
- high exchange enthalpy
 - high electronegativity
 - high basic character
 - small size
28. Which among the following compounds gives alkene when passed over heated copper at 573K?

29. The compound which does not form iodoform when treated with NaOI is
- Acetophenone
 - Acetone
 - Acetaldehyde
 - Benzophenone

30. The solution which shows negative deviation from Raoult's law
 a. Chloroform and acetone b. Ehanol and acetone c. Acetone and carbon disulphide d. Acetone and benzene
31. Standard Gibbs free energy change for the given cell reaction is

$$\text{Zn(s)} + 2\text{Ag}^+(\text{aq}) \rightarrow \text{Zn}^{2+}(\text{aq}) + 2\text{Ag(s)}$$
 (Given : $E^\circ_{\text{Zn}^{2+}/\text{Zn}} = -0.76\text{V}$; $E^\circ_{\text{Ag}^+/\text{Ag}} = 0.80\text{V}$)
 a. $-301.08\text{kJ mol}^{-1}$ b. $-204.12\text{kJ mol}^{-1}$ c. -40.53kJ mol^{-1} d. $-500.17\text{kJ mol}^{-1}$
32. If 18 g of glucose is dissolved in 250 g of water then freezing point of the solution will be (K_f of water = $1.86\text{ K kg mol}^{-1}$)
 a. -1.74°C b. -0.25°C c. -0.74°C d. -1.3°C
33. Which among the following has weakest acidic character?
 a. H_2O b. H_2Te c. H_2Se d. H_2S
34. In mischmetal the percentage of lanthanoid metal is approximately
 a. 75% b. 80% c. 65% d. 95%
35. Most basic compound among the following in aqueous medium is

36. A certain charge is divided in a ratio $x:y$ so that when kept at a finite distance, the electrostatic force of repulsion is maximum. The ratio $x:y$ is
 a. 2:1 b. 4:1 c. 1:1 d. 1:2
37. A metallic sphere of radius R is charged to a potential V . The magnitude of electric field at a distance $r(>R)$ from the centre of the sphere is
 a. $\frac{V}{r}$ b. $\frac{Vr}{R^2}$ c. $\frac{VR}{r^2}$ d. zero
38. The current in the part of electric circuit is

 a. 1A b. 1.7A
 c. 2.5A d. 0.7A
39. The insulating property of air breaks down at the intensity of electric field. The maximum charge that can be given to a sphere of diameter 5m is about
 a. $2 \times 10^{-5}\text{C}$ b. $2 \times 10^{-3}\text{C}$ c. $4 \times 10^{-6}\text{C}$ d. $6 \times 10^{-3}\text{C}$
40. Alpha particle having 1 MeV energy describes a circle of radius x in uniform perpendicular magnetic field. A proton of same energy will describe in same field a circle of radius
 a. x b. $x/2$ c. $2x$ d. $\sqrt{2}x$
41. In a meter bridge, a standard resistor R ohm is connected in left gap and two identical wires A and B are connected one after the other in right gap, the balancing length measured from left gap is 50 cm. If two wires are connected in parallel and put in right gap, the balancing length measured from left gap would be (in cm)
 a. 25 b. 60 c. 66.7 d. 80
42. Which of the following group is diamagnetic?
 a. Magnesium, aluminium, copper b. Aluminium, water and manganese
 c. Copper, hydrogen and silver d. Copper, hydrogen and aluminium

43. The period of oscillation of a magnet in earth's field is T . The period of oscillation when an extra field twice of the earth's field is applied in the same direction is
- T
 - $2T$
 - $3T$
 - $\frac{T}{\sqrt{3}}$
44. When a metallic surface is illuminated with radiation of wavelength λ , the stopping potential is V . If the same surface is illuminated with radiation of wavelength 2λ , the stopping potential is $V/4$. The threshold wavelength for metallic surface is
- 2λ
 - 3λ
 - $5\lambda/2$
 - 5λ
45. Which of the following need not be necessarily obeyed in a nuclear reaction?
- Conservation of charge
 - Conservation of mass-energy
 - Conservation of angular momentum
 - Conservation of mass
46. An electromagnetic pulse of energy 3×10^{-2} J is incident on a perfectly reflecting mirror produces an impulse of
- 3×10^{-10} kg m/s
 - 10^{-10} kg m/s
 - 6×10^{-10} kg m/s
 - 2×10^{-10} kg m/s
47. The most popular use of a Zener diode is as
- Voltage regulator
 - Rectifier
 - Detector
 - Oscillator
48. Which of the following statement is not true for photons?
- Their rest mass is zero
 - They travel through free space
 - They cannot produce interference
 - they travel with speed equal to that of light waves
49. The principal section of glass prism ($\mu = 1.5$) is an equilateral triangle. A ray is incident normally on one of the faces. The angle between this ray and the ray that leaves the prism is
- 60°
 - 90°
 - 120°
 - 180°
50. In Young's double slit experiment using white light, the central fringe is white. What colour will you see nearest to central fringe?
- Violet
 - Yellow
 - Red
 - Green
51. During "gene cloning" which is called as gene taxi?
- Vaccine
 - Plasmid
 - Bacterium
 - Protozoa
52. The basis of DNA fingerprinting is
- The double helix
 - Errors in base sequence
 - Polymorphism in sequence
 - DNA replication
53. The innermost wall layer of microsporangium nourishing the developing pollen grains is known as
- Endodermis
 - Tapetum
 - Endothecium
 - Sporogenous tissue
54. The main function of the mammalian corpus luteum is to produce
- Estrogen only
 - Progesterone
 - Human chorionic gonadotropin
 - Relaxin only
55. Two biogas plants are set up in two villages: one in a cold mountainous area and the other in a tropical plain. After 3 months, biogas production is significantly higher in the tropical village. What is the most valid biological reason?
- Higher methane content in the tropic region.
 - Methanogenic archaea are more active at higher temperature
 - Greater organic waste availability in tropical villages
 - Low oxygen in mountainous areas inhibits metanogenesis.
56. In lac operon I gene codes for
- Inducer of lac operon
 - Repressor of lac operon
 - Hydrolysis of disaccharide
 - Permease
57. Commonly used vectors for human genome sequencing are:
- T-DNA
 - BAC and YAC
 - Expression vectors
 - T/A cloning vectors
58. In a mature embryosac the central cell is
- single nucleate
 - binucleate
 - four nucleate
 - eight nucleate
59. Antivenom injection contains preformed antibodies while polio drops that are administered into the body contain
- Harvested antibodies
 - Gamma globulin
 - Attenuated pathogens
 - Activated pathogens

60. In sewage treatment plants, improper aeration in the secondary treatment phase leads to an increase in foul odour. Which microbial change is primarily responsible?
- Proliferation of anaerobic bacteria causing incomplete organic matter degradation.
 - Decline in methanogens reducing methane production.
 - Overgrowth of *Azobacter* leading to nitrogen gas release.
 - Disappearance of activated sludge leading to poor water filtration.
61. Following a government scheme, a village's total fertility rate decreased drastically, but malnutrition in children remained high. Which conclusion can be drawn?
- Family planning directly improves child nutrition
 - Reducing fertility rate doesn't guarantee better child health without parallel nutrition programs
 - Family planning methods cause adverse effects on newborns
 - Lower fertility rate increases the dependency rate causing malnutrition.
62. Riya and Siya are medical students discussing assisted reproductive technologies (ART). Riya says, "In certain cases, fertilisation can occur inside the female body but implantation consistently fails." Siya suggests, "In such couples, an Art where the embryo is transferred at blastocyst stage is preferred".
- ZIFT
 - GIFT
 - IUI
 - ICSI
63. During a fertility treatment, a doctor observes that multiple follicles are maturing in the ovary. Which hormone is likely being administered, and what is the potential risk of over stimulation?
- Progesterone; risk of implantation failure
 - LH; risk of tubal pregnancy
 - FSH; risk of multiple births
 - Estrogen; risk of amenorrhea
64. A city plans to introduce bio-composters for urban waste management. Which microbial property would be most useful in accelerating composting, and why?
- Enzymatic breakdown of cellulose by fungi
 - Cell wall rigidity in actinomycetes
 - Anaerobic metabolism of yeast
 - Antibiotic production by *Penicillium*
65. In a survey, two villages A and B implemented different population control strategies. Village A used awareness campaigns and free contraceptive distribution, village B added women's skill development programs. After a year, Village B reported a sharper decline in birth rates. Which factor likely contributed most to this?
- Better contraceptive brands
 - Empowerment led to delayed marriages and planned families
 - Increased male sterilization in village B
 - Higher medical infrastructure in village B
66. What is an important reason for the conservation of natural resources?
- Disturb the ecological balance
 - Preserve the biological diversity
 - Disruption of quality of the environment
 - Hampering the biological species
67. What is the correct full form of IUCN?
- International Union for Conservation of Nuts
 - International Union for Conservation of Nature
 - International Union for Conservation of Natural habitat
 - International Union for Conservation of Numbers
68. _____ is now an Extinct Animal.
- Quoll
 - Tasmanian devil
 - Tasmanian tiger
 - Pademelon
69. Which is a common Non-Renewable Source ?
- Silica
 - Uranium
 - Hot spring
 - Crude oil
70. How Much Forest Cover Is To Be Maintained As Per The National Forest Policy of 1988?
- 11% for plains and 37% for hills.
 - 33% for plains and 67% for hills.
 - 23% for plains and 17% for hills.
 - None of these.
71. Five friends - A, B, C, D, and E - are grouped into two teams. The following conditions apply:
- A and B are not in the same team.
 - C and D are in the same team.
 - E is in a team with only one other person.
- Which of the following team combinations is possible?
- Team 1: A, C, D; Team 2: B, E
 - Team 1: E, C; Team 2: A, B, D
 - Team 1: A, C; Team 2: B, D, E
 - Team 1: A, D; Team 2: B, C, E
72. Six friends - A, B, C, D, E, and F - are standing in a line. The following conditions apply:
- A is taller than B but shorter than C.
 - D is shorter than E but taller than F.
 - B is taller than E.
- Who is the shortest?
- A
 - B
 - E
 - F

73. What type of symmetry does a snowflake have after folding a piece of paper and cutting it?
 a. Rotational symmetry
 b. Reflectional symmetry
 c. Translational symmetry
 d. Bilateral symmetry
74. Paw : Cat :: Hoof :
 a. Lamb
 b. Horse
 c. Elephant
 d. Tiger
75. Five siblings - A, B, C, D, and E - are of different ages. The following conditions apply:
 - A is older than B but younger than C.
 - D is younger than E but older than A.
 - B is not the youngest.
 Who is the eldest?
 a. A
 b. B
 c. C
 d. D
76. Statement: Anger is energy, and how to channelize it is in itself a skill. Assumptions: I. Anger need to be channelized.
 a. If only assumption I is implicit
 b. If only assumption II is implicit
 c. If either I or II is implicit
 d. If neither I nor II is implicit
77. The angles of rotation (rotational symmetry) of an equilateral triangle are:
 a. 90° , 180° , 270°
 b. 120° , 240° , 360°
 c. 60° , 120° , 180°
 d. 45° , 90° , 135°
78. A person is facing north. They turn 90 degrees clockwise, then 180 degrees counterclockwise, and finally 90 degrees clockwise again. In which direction are they facing now?
 a. North
 b. South
 c. East
 d. West
79. Find the two words that best complete the following sentence: Although she appeared _____, Susan was actually quite _____ in the meeting.
 a. timid, vocal
 b. confident, shy
 c. aggressive, passive
 d. happy, disappointed
80. Choose the word that is most opposite in meaning to 'acerbic.'
 a. kind
 b. harsh
 c. sweet
 d. bitter
81. Find out which of the figures (1), (2), (3) and (4) can be formed from the pieces given in figure (X).
- a. 1
 b. 2
 c. 3
 d. 4
82. Choose the alternative which is closely resembles the water-image of the given combination.
- QUARREL
 (1) QUAEREL (2) QUAEREL
 (3) QUAEREL (4) QUAEREL

a. 1
 b. 2
 c. 3
 d. 4
83. The houses of A and B face each other on a road going north-south; A's being on the western side. A comes out of his house, turns left, travels 5 km, turns right, travels 5 km to the front of D's house. B does exactly the same and reaches the front of C's house. In this context, which one of the following statements is correct?
 a. C and D live on the same street.
 b. C's house faces south.
 c. The houses of C and D are less than 20 km apart.
 d. None of the above
84. Look at this series: 53, 53, 40, 40, 27, 27, . . . What number should come next?
 a. 12
 b. 14
 c. 27
 d. 53
85. Identify the figure that completes the pattern.
- a) 1
 b) 2
 c) 3
 d) 4
86. Which of the following is a characteristic of a closed circulatory system?
 a. Blood bathes organs directly
 b. Blood is confined to blood vessels
 c. Blood pressure is low
 d. Blood flow is slow

87. What is the primary goal of the Kyoto Protocol?
- To reduce greenhouse gas emissions
 - To promote sustainable development
 - To protect biodiversity
 - To address ozone depletion
88. What is the primary goal of bioremediation?
- To clean up pollutants in the environment using living organisms
 - To develop new pharmaceuticals
 - To improve agricultural yields
 - To enhance water purification systems
89. What is the primary function of a spectrophotometer?
- To measure the intensity of light
 - To analyze the structure of molecules
 - To detect the presence of specific chemicals
 - To measure the absorbance of light by a sample
90. With which country did India sign the Panchsheel Treaty?
- China
 - Nepal
 - Bhutan
 - Pakistan
91. Recently, where was the 'National Conclave: Sangathan Swasthya Samridhi' inaugurated?
- Bengaluru
 - New Delhi
 - Chennai
 - Bhopal
92. India Post Payments Bank (IPPB), recently marked its 7th foundation day, operates under which ministry?
- Ministry of Home Affairs
 - Ministry of Commerce
 - Ministry of Finance
 - Ministry of Communication
93. Who is the current minister of external affairs in India?
- Dr. S. Jayasankar
 - Nirmala Seetharaman
 - Rajanath Singh
 - Amith Shah
94. Who is the author of the novel "To Kill a Mockingbird"?
- F. Scott Fitzgerald
 - Harper Lee
 - Jane Austen
 - J.K. Rowling
95. What is the primary purpose of social media platforms?
- To provide news and current events
 - To facilitate communication and networking
 - To promote products and services
 - To entertain the audience
96. What is the primary format of a documentary film?
- Fiction
 - Non-fiction
 - Drama
 - Comedy
97. What is the primary format of a documentary film?
- Fiction
 - Non-fiction
 - Drama
 - Comedy
98. What is the primary ethical consideration for journalists?
- To sensationalize news for better ratings
 - To prioritize speed over accuracy
 - To maintain objectivity and impartiality
 - To promote personal opinions and biases
99. What is the final step in the decision-making process?
- Identifying options
 - Evaluating options
 - Making a choice
 - Reviewing the outcome
100. What makes a goal effective?
- Being vague and general
 - Being specific and achievable
 - Being unrealistic and ambitious
 - Being easy and unchallenging
